1. GENERAL INFORMATION

Eurizon Fund (hereafter referred to as the "Fund") was established in the Grand Duchy of Luxembourg on 27 July 1988 in accordance with the Law of 30 March 1988 regulating Undertakings for Collective Investment. The Fund is subject to part I of the Luxembourg Law of 17 December 2010 relating to Undertakings for Collective Investment, as amended.

The Fund is a joint ownership of transferable securities and other financial assets as authorized by the law, managed by the Management Company on the basis of the risk spreading principle, on behalf of and in the sole interest of the co-owners (the "Unitholders"), who are committed only to the extent of their investment. Since 1 December 2025, as a result of the merger of Eurizon Capital S.A. into Eurizon Capital SGR S.p.A., Eurizon Capital SGR S.p.A. acting through its Luxembourg Branch is the Management Company of the Fund (hereafter referred to as the "Management Company").

There is no maximum limit set on the amount of wealth or the number of Units of jointly owned property which comprise the assets of the Fund. The minimum net assets of the Fund are to be at least EUR 1 250 000,00.

In order to offer investments with different levels of risks, the Fund is an umbrella fund subdivided into a wide range of Sub-Funds (each "the Sub-Fund" and together "the Sub-Funds").

The Sub-Funds which are active as at 31 December 2025 are listed below:

(1)The Sub-Fund was launched on 7 October 2025.
(2)The Sub-Fund was launched on 17 December 2025.
(3)The Sub-Fund Eurizon Fund - Bond Emerging Markets In Local Currencies ESG was renamed Eurizon Fund - Bond Emerging Markets In Local Currencies on 23 May 2025.
(4)The Sub-Fund was launched on 12 December 2025.
(5)The Sub-Fund Eurizon Fund - Equity USA was renamed Eurizon Fund - Top US Research on 1 December 2025.
(6)The Sub-Fund was launched on 8 October 2025.
(7)The Sub-Fund Eurizon Fund - Absolute High Yield was renamed Eurizon Fund - High Yield Short Term on 1 December 2025.
(8))The Sub-Fund was launched on 29 October 2025.

The different Units which are available to investors for all Sub-Funds are detailed in the prospectus of the Fund.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Fund keeps the books of each Sub-Fund in its respective currency and the financial statements are prepared in Euro in accordance with the Luxembourg regulations relating to Undertakings for Collective Investment and in particular using the following rules:

a) Presentation of the financial statements

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment in transferable securities (UCITS) and with generally accepted accounting principles. The financial statements have been prepared on a going concern basis, using the official/tradeable net asset value as at 31 December 2025 or a technical net asset value as at 31 December 2025.

A technical net asset value as at 31 December 2025 is used for the following Sub-Funds:

Eurizon Fund - Flexible Multistrategy
Eurizon Fund - Italian Equity Opportunities
Eurizon Fund - Bond Italy Floating Rate LTE
Eurizon Fund - Bond JPY LTE
Eurizon Fund - Equity Italy Smart Volatility
Eurizon Fund - Cash EUR
Eurizon Fund - Sustainable Japan Equity
Eurizon Fund - Dynamic Asset Allocation

b) Valuation of investment securities

Investment securities, including zero-coupon bonds and money market instruments quoted on an official stock exchange or on another regulated market are valued according to the last known Closing or Bid price at the time when the valuation is carried out, and, in the event of being quoted on several markets, according to the last known Closing or Bid price of the principal market.

Valuation of investment securities, including zero-coupon bonds and money market instruments, not quoted on an official stock exchange or on another regulated market is fixed in a reasonable way on the basis of the sale prices anticipated cautiously and in good faith or, in the absence of a market value, according to the probable value in the reasonable estimation of the Board of Directors of the Management Company.

The value of each investment in open-ended funds is based on the last known Net Asset Value on the Valuation Day.

If there is no relevant quotation or if the quotations are not representative of the fair value, the evaluation is done in good faith by the Board of Directors of the Management Company.

c) Net realised profit / (loss) on sales of investments

Realised profits or losses made on the sales of investments are calculated according to the average weighted cost.

d) Option contracts

Option contracts quoted on an official stock exchange or on another regulated market are valued according to the last known market price or, if there are several markets, according to the last known price of the principal market.

Option contracts not quoted on an official stock exchange or on another regulated market are valued at their last known market value or, in the absence of a market value, according to their probable market value in the reasonable estimation of the Board of Directors of the Management Company.

The market value of option contracts is recorded in the Statement of Net Assets.

In the case of options on futures, no premium margin is required because here a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting profits and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process. Unrealised profits and losses are recorded in the Statement of Net Assets. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

The variation of unrealised profits and losses on option contracts is recorded in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on option contracts".

e) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at forward foreign exchange rate for the remaining period to run until maturity at the date of valuation.

Unrealised profits and losses are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on forward foreign exchange contracts".

f) Future contracts

Commitments related to future contracts are recorded off balance sheet and future contracts are valued according to the last available contract price.

Unrealised profits and losses on future contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on future contracts".

Guarantee deposits and margin calls are recorded under the Statement of Net Assets under the headings "Other banks and broker accounts" and "Amounts due to brokers", if any.

g) Swap contracts

Swaps are, in general, contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s).

Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparty.

Unrealised profits and losses on swap contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on swap contracts".

All the Swap contracts are presented at clean price, except for Inflation Swap contracts which are presented at dirty price, therefore the interests related to Swap contracts are recorded under the heading "Interest received/paid on swap contracts" in the Statement of Changes in Net Assets.

h) Reverse repurchase agreements

Reverse repurchase agreements (reverse repos) consist in a purchase of securities with a simultaneous agreement to resell them at a specific future date and price. The sale price corresponds to the purchase price increased by an interest rate. These operations, if any, including accrued interest, are recorded in the Statement of Net Assets under the heading "Reverse repurchase agreements".

For reverse repurchase agreements, interest returns which consist in the difference between the purchase price and the sale price of the securities are accounted for on a pro rata temporis basis over the course of the operation and recorded in the accounts in the Statement of Changes in Net Assets under the heading "Net income from investments".

i) Combined statements of the Fund

The combined statements correspond to the sum of the statements of each Sub-Fund. Cross Sub-Funds investments (where one Sub-Fund has invested in another Sub-Fund of the Fund) and related inter-fund accounts have not been eliminated for presentation purposes of the combined statements. Cross Sub-Funds investments represent 1,41% of the combined net assets with value of EUR 920 782 859,43 as at 31 December 2025. Excluding the cross Sub-Funds investments from the calculations, the combined net assets as at 31 December 2025 is EUR 64 431 013 697,71. Cross Sub-Funds investments are disclosed in the Portfolio as at 31 December 2025 for the respective Sub-Funds.

j) Cost of purchase of securities in portfolios

For securities in currencies other than the base currency of the Sub-Fund, the purchase price is converted in the base currency of the Sub-Fund based on the closing exchange rates of the day of purchase.

k) Income

Dividends are recognised on the date on which the shares/units concerned are quoted "ex-dividend", net of withholding tax. Interest is calculated on a pro rata temporis basis and recorded net of withholding tax.

Interest income from debt securities is recognised daily on an accruals basis and the amortisation of premiums and accretion of discounts is recognised daily on a straight line basis.

l) Swing Pricing

On business days when the net value of a Sub-Fund's units purchased or redeemed exceeds 2% of the Sub-Fund's total net assets, the Management Company may value that Sub-Fund's assets at offer price or bid price, respectively. This adjustment reflects an assessment of the overall costs incurred in buying and selling investments to satisfy purchases or sales of units (understanding that a Sub-Fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations).

This mechanism was not activated during the year ended 31 December 2025.

m) Translation of items expressed in foreign currencies

Assets and liabilities in foreign currencies are converted into the base currency of the Sub-Fund at the closing exchange rates of the final day of the financial year.

Income and expenses in currencies other than the base currency of the Sub-Fund are converted into the base currency of the Sub-Fund at the closing exchange rates in force on the day of the transaction.

The resulting realised and unrealised profit or loss made on foreign exchange is included in the Statement of Changes in Net Assets; any unrealised profit or loss on cash positions, assets receivable and liabilities payable denominated in currencies other than the base currency of the Sub-Fund being recorded under the heading "Change in unrealised appreciation / (depreciation) on foreign currencies".

The exchange rates as at 31 December 2025 are the following:

n) Contingent assets

As of 31 December 2025, some Sub-Funds of the Fund are involved in the assertion of claims arising from securities in the insolvency proceeding of Wirecard AG. In the context of this procedure, the following Sub-Funds could receive, with no certainty, compensations related to losses:

Eurizon Fund - Bond Corporate EUR Short Term
Eurizon Fund - Bond Corporate EUR
Eurizon Fund - Top European Research
Eurizon Fund - Equity Small Mid Cap Europe
Eurizon Fund - Absolute Prudent

As of 31 December 2025, some of the Sub-Funds of the Fund are involved in some collective legal actions ("Class Actions"). In the context of these procedures, these Sub-Funds could receive, with no certainty, compensations related to losses occurred in the course of previous financial periods. As of 31 December 2025, the following procedures are pending:

Sub-Funds	Action name
Eurizon Fund - Equity Emerging Markets LTE	ALIBABA GROUP HOLDING LIMITED BANCO BRADESCO S.A. DOUYU INTERNATIONAL HOLDINGS LIMITED
Eurizon Fund - Equity China Smart Volatility	ALIBABA GROUP HOLDING LIMITED
Eurizon Fund - Equity Emerging Markets Smart Volatility	ALIBABA GROUP HOLDING LIMITED

Eurizon Fund - Flexible Equity Strategy	APPLE, INC. QUALCOMM INCORPORATED
Eurizon Fund - Conservative Allocation	APPLE, INC. QUALCOMM INCORPORATED

As of 31 December 2025, some of the Sub-Funds of the Fund are involved in withholding tax reclaim procedures on the basis of the principles set forth in recent judgments by the European Court of Justice and other tax reclaims mechanisms. In this context, the Sub-Funds listed hereunder could recover, with no certainty, unduly levied withholding taxes on dividends in the following jurisdictions:

Sub-Fund	Country
Eurizon Fund - Equity World Smart Volatility	Germany
Eurizon Fund - Italian Equity Opportunities	Germany
Eurizon Fund - Top European Research	Germany
Eurizon Fund - Equity Small Mid Cap Europe	Germany, Portugal
Eurizon Fund - Asian Equity Opportunities	South Korea
Eurizon Fund - Sustainable Global Equity	Germany
Eurizon Fund - Equity Innovation	Germany
Eurizon Fund - Absolute Prudent	Germany
Eurizon Fund - Active Allocation	Germany
Eurizon Fund - Flexible Equity Strategy	Germany, Portugal
Eurizon Fund - Conservative Allocation	Germany, Portugal
Eurizon Fund - Flexible Europe Strategy	Portugal

As regards specifically Eurizon Fund - Italian Equity Opportunities, reclaimed amounts related to unduly levied withholding taxes on dividends perceived from Italian companies in 2020 were recognised in the net asset value of the Sub-Fund on 20 January 2025 and are then removed from contingent assets caption as of 31 December 2025.

o) Valuation of instruments in the Money Market Sub-Funds

As regards the valuation of the assets of the Sub-Funds authorised as money market funds in accordance with Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds, such assets are valued by using mark-to-market method (means the valuation of positions at readily available close out prices that are sourced independently, including exchange prices, screen prices, or quotes from several independent reputable brokers) whenever possible.

When using mark-to-market method:

- such assets are valued at the more prudent side of bid and offer unless the asset can be closed out at mid-market;

- only good quality market data are used; such data are assessed on the basis of all of the following factors:

  - the number and quality of the counterparties;
  - the volume and turnover in the market of the asset of the money market fund;
  - the issue size and the portion of the issue that the money market fund plans to buy or sell.

The Net Asset Value of any Unit Class in Sub-Funds authorised as money market funds shall be calculated at least daily and rounded to the nearest basis point or its equivalent when the Net Asset Value is published in a currency unit.

The following Sub-Funds have been identified as falling under the scope of the Money Market Fund Regulation (EU) 2017/1131 (the "Regulation") and accordingly fulfill the requirements of the Regulation:

Sub-Fund	Type of MMF	Impact on the pricing policy
Eurizon Fund - Money Market EUR T1	Standard Variable NAV	No impact
Eurizon Fund - Money Market USD T1	Standard Variable NAV	No impact
Eurizon Fund - Cash EUR	Standard Variable NAV	No impact

3. BANKS, BANK OVERDRAFTS, OTHER BANKS AND BROKER ACCOUNTS, AND AMOUNTS DUE TO BROKER

As at 31 December 2025, the counterparty for the "Banks" and "Bank overdrafts" accounts is State Street Bank International GmbH, Luxembourg Branch for all the Sub-Funds.

The amount of broker accounts disclosed in the Statement of Net Assets "Other banks and broker accounts" / "Amounts due to brokers" if any, are presented net.

The following table shows the actual split between positive and negative broker accounts:

Sub-Funds	Positive Broker Cash	Negative Broker Cash	Net Broker Cash

4. SUBSCRIPTION TAX

The Fund is governed by Luxembourg tax laws applicable to investment funds. It is up to prospective purchasers of Units of the Fund to inquire about the laws and rules applicable to the acquisition, holding and possibly sale of Units, taking into account their residence or nationality.

As legislation now stands, the Fund is subject to a Luxembourg tax at an annual rate of 0,05% calculated and payable quarterly on the Net Asset Value of each Sub-Fund at the end of each quarter in question. The rate of the annual subscription tax is fixed at 0,01% for the Sub-Funds or Classes of Units, if the Units in these Sub-Funds or Classes are reserved for one or more Institutional Investors, as well as for Sub-Funds whose exclusive aim is the collective investment in money market instruments and/or deposits with credit institutions.

The value of the assets represented by units/shares held in other Luxembourg UCIs shall be exempt from the subscription tax, provided such UCIs have already been subject to the subscription tax in Luxembourg.

5. OTHER CHARGES AND TAXES

The caption "Other charges and taxes" is mainly composed of foreign taxes and securities lending fees with the exception of Eurizon Fund - Equity Emerging Markets LTE, Eurizon Fund - Equity Emerging Markets Smart Volatility, Eurizon Fund - Bond Emerging Markets in Local Currencies, Eurizon Fund - SLJ Local Emerging Markets Debt, Eurizon Fund - Equity Emerging Markets New Frontiers and Eurizon Fund - Active Allocation which also include an offset of the cash movements on the RUB currency.

The auditors fees, expenses involved in preparation, printing and filing of administrative documents and explanatory memoranda with any authorities and bodies, expenses related to preparation, distribution and publication of notices to Unitholders, including publication of Net Asset Value per Unit on newspapers distributed in countries in which the Units are offered or sold or on any other recognised and legally binding media, fees relative to registration with any institution or authority, and the fees relative to the Fund's listing on a stock exchange are borne by the Management Company.

6. MANAGEMENT FEE

The Management Company, as remuneration for its services, is entitled to receive a management fee calculated according to the Net Asset Value of each Sub-Fund of the Fund. For the year ended 31 December 2025, the rates in force for each Sub-Fund are the following:

	Annual management fee rate by Unit Class:

(53) The Sub-Fund was launched on 29 October 2025.
(54) Class R was launched on 31 October 2025.
(55) Class Z was launched on 30 October 2025.

Classes M and MD do not bear any management fees.

In each Sub-Fund of the Fund, this fee is payable monthly and calculated on the basis of the average Net Asset Value over the month.

Investments done by each Sub-Fund in units/shares of UCITS and/or other UCI may lead investors to support twice certain expenses such as subscriptions fees, redemptions fees, depositary fees, administrative fees and management fees.

The total amount of the management commissions applied on the "group-related" UCITS or UCI in which a Sub-Fund may invest as well as the total amount of any rebates of the management commissions applied on UCITS or UCI managed by third companies are transferred to the respective Sub-Fund on a quarterly basis and registered in the Statement of Changes in Net Assets under the heading "Other income" as follows (in EUR):

(1) The Sub-Fund Eurizon Fund - Bond Emerging Markets In Local Currencies ESG was renamed Eurizon Fund - Bond Emerging Markets In Local Currencies on 23 May 2025.
(2) The Sub-Fund was launched on 12 December 2025.
(3) The Sub-Fund Eurizon Fund - Equity USA was renamed Eurizon Fund - Top US Research on 1 December 2025.
(4) The Unit Class has been launched during the fiscal year 2024, therefore an extended calculation period was considered. The negative balance of performance fees at year-end is due to the fact that performance fees calculated at year-end were lower than the performance fees accrued as at previous year-end. A net negative balance at Sub-Fund level is recorded in the Statement of Changes in Net Assets under the heading Other income.
(5) The Sub-Fund was merged into Eurizon Fund - Absolute Prudent on 12 December 2025.
(6) The Sub-Fund Eurizon Fund - Absolute High Yield was renamed Eurizon Fund - High Yield Short Term on 1 December 2025.

For the below Sub-Funds there was no performance fees recorded during the year ended 31 December 2025 even if they are subject to a performance fee:

Eurizon Fund - Aggregate Green Bonds Short Term, Eurizon Fund - Green Euro Credit, Eurizon Fund - Bond Aggregate EUR, Eurizon Fund - Global Bond, Eurizon Fund - Global Bond Aggregate, Eurizon Fund - Global Bond High Yield, Eurizon Fund - Euro Emerging Markets Bonds, Eurizon Fund - Equity China A, Eurizon Fund - Equity Planet, Eurizon Fund - Equity Circular Economy, Eurizon Fund - Absolute Green Bonds, Eurizon Fund - Absolute Return Solution, Eurizon Fund - Bond Flexible, Eurizon Fund - China Opportunity and Eurizon Fund - Trend Solution.

8. ADMINISTRATION FEE

The administration fee is paid to the Management Company as the main entity with responsibility for operational, compliance, accounting and legal activities of the Fund.

Out of this fee, the Management Company pays the services provided by the Administrative Agent, Depositary Bank, Registrar and Transfer Agent and the Paying Agent.

This fee, which represents a percentage of the average Net Asset Value of each Sub-Fund, is accrued daily and is paid each month in arrears.

For the year ended 31 December 2025, the rates in force for each Sub-Fund are the following:

[16] The Sub-Fund Eurizon Fund - Bond Emerging Markets In Local Currencies ESG was renamed Eurizon Fund - Bond Emerging Markets In Local Currencies on 23 May 2025.
[17] The Sub-Fund was launched on 12 December 2025.
[18] The Sub-Fund Eurizon Fund - Equity USA was renamed Eurizon Fund - Top US Research on 1 December 2025.
[19] The Sub-Fund was merged into Eurizon Fund - Absolute Prudent on 12 December 2025.
[20] The Sub-Fund Eurizon Fund - Absolute High Yield was renamed Eurizon Fund - High Yield Short Term on 1 December 2025.

For the year ended 31 December 2025, no transaction costs have been recorded for the other Sub-Funds.

Furthermore, in accordance with the practices of the bond markets, a bid-offer spread is applied to securities purchase or sale transactions. According to this principle, the selling and buying prices applied by the broker to a given transaction are not identical and the difference between them constitutes the broker's remuneration.

13. CHANGES IN THE COMPOSITION OF PORTFOLIO

The list of movements in the portfolio composition for the financial year from 1 January 2025 to 31 December 2025 is available at the Management Company's registered office.

14. DIVIDEND DISTRIBUTIONS

15. SECURITIES LENDING TRANSACTIONS

The Fund may lend securities but only under the conditions and procedures specified by recognised clearing systems or by another first-bank financial institution specialized in this kind of operations.

The Fund has entered into a securities lending agreement with a specialized financial institution, authorizing the latter to carry out lending transactions of the Fund's securities. In relation to its lending transactions, the Fund must receive security of a value which, at the conclusion of the lending agreement, must be at least equal to the value of the global valuation of the securities lent.

This collateral must be given in the form of cash and/or highly liquid equity securities that are traded on main regulated markets and/or securities issued or guaranteed by member states of the OECD or by their local authorities or by supranational institutions and organizations with EU, regional and worldwide scope and blocked in favor of the Fund until termination of the lending contract.

All collateral received by the Fund under the securities lending agreement is transferred under a title transfer arrangement. The collateral is held in custody by a sub-custodian of the depositary for the duration of the transaction.

The following summarises the value of securities lent analysed by borrowing counterparty as at 31 December 2025:

Sub-Fund	Currency	Counterparty	Counterparty's country of incorporation	Market Value of Securities Lent as at 31/12/2025 (in EUR)	% of Net Assets	% of the Sub-Fund's total lendable assets	Market Value of the collateral received for the securities lent

16. RUSSIA UKRAINE CONFLICT

The direct exposure of the products established by the Fund to Russia, Belarus and Ukraine securities was relatively low at the beginning of Russia's invasion of Ukraine on 24 February 2022, with no Sub-Fund reporting an exposure in excess of 5% of its total net assets. Nevertheless, the Management Company closely monitors the evolution of international sanctions, operational restrictions and disruptions relating to the Russian securities and markets as they adversely impact, or could impact, the ability of these Sub-Funds to operate on such securities and/or related local cash accounts. Liquidity and valuation issues related to these securities are monitored on a continuous basis by the Management Company so as to ensure the interests of the investors are preserved. In particular, as at 31 December 2025, certain securities are valued on the basis of fair valuation procedures, which may result in such securities being deemed to have a near-zero or zero value. In addition, no accrued interests are recorded for bonds denominated in roubles and value adjustments are posted to offset the value of Type S cash accounts (segregated) as non-resident investors are currently restricted from any deliveries or receipts of cash with respect to such accounts.

Considering the persisting liquidity constraints related to the conflict, the Board of Directors of Eurizon Capital S.A. has resolved on 11 December 2024, in the best interest of the Unitholders and with immediate effect to liquidate the Sub-Fund Eurizon Fund - Bond Emerging Markets LC LTE. The liquidation process begun on 12 December 2024 and proceeds resulting from the monetization of all

liquid assets were paid before year-end. In light of the extraordinary conditions prevailing for assets held in Russia, including Type S cash accounts, the Board of Directors cannot anticipate a closure date for the liquidation. Unitholders will receive the final liquidation proceeds, if any, when the Sub-Fund will dispose of these assets again and will be able to sell and/or repatriate them.

The securities and cash balances held by Eurizon Fund - Bond Emerging Markets LC LTE are valued at nil and are detailed as follows:

Security Name	Quantity
Russia Federal Bonds - OFZ 8.15% 03/02/2027	136 750 000,00

Eurizon Fund II - Enhanced Constant Risk Contribution	RD	RD	1,169189879	
	R	R	0,979977598	
	Z	Z	0,952785241	

The Sub-Fund Eurizon Fund - Euro Bond Short Term has been launched on 17 December 2025.

18. SUBSEQUENT EVENTS

The following Unit Classes of Sub-Funds contributed in kind their assets at a 1:1 ratio on 6 February 2026, with the receiving Sub-Funds being launched as a result of the contributions:

Merging Sub-Fund	Unit Class of merging Sub-Fund	Share Class of receiving Sub-Fund	Receiving Sub-Fund
Eurizon Fund - Bond EUR Long Term LTE	Z	Z	YourIndex SICAV - YIS 5+ Year EMU Government Bond
Eurizon Fund - Bond EUR Medium Term LTE	Z	Z	YourIndex SICAV - YIS 3-5 Year Government Bond
	ZD	ZD	
Eurizon Fund - Bond EUR Short Term LTE	Z	Z	YourIndex SICAV - YIS 1-3 Year Government Bond
	ZD	ZD	
Eurizon Fund - Bond USD LTE	Z	Z	YourIndex SICAV - YIS US Government Bond
	Z2	Z2	
	ZD	ZD	
	ZH	ZH	
Eurizon Fund - Bond USD Short Term LTE	Z	Z	YourIndex SICAV - YIS 1-3 Year US Government Bond
	Z2	Z2	
	ZH	ZH	
Eurizon Fund - Global Bond LTE	Z	Z	YourIndex SICAV - YIS Global Government Bond
	ZH	ZH	

TOTAL EXPENSE RATIO

The Total Expense Ratio (TER) has been calculated in accordance with the current version of the "Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes" of the Asset Management Association Switzerland (AMAS) of 16 May 2008 (version dated 5 August 2021).

The TER is calculated for the financial year from 1 January 2025 until 31 December 2025:

Sub-Funds	Class	TER (with performance fees)	TER (without performance fees)
Eurizon Fund - Bond EUR Short Term LTE	C	0,33%	0,33%
Eurizon Fund - Bond EUR Short Term LTE	CD	0,33%	0,33%

Unit Class liquidated during the year has not been included.

PERFORMANCE

The historical performance has been calculated in accordance with the current version of the "Guidelines for the Calculation and Disclosure of Performance of Collective Investment Schemes" of the Asset Management Association Switzerland (AMAS) of 16 May 2008 (version dated 5 August 2021).

Historical performance is not an indicator of current or future performance. The performance data does not take into account commissions and fees charged for the issue and redemption of Units.

The benchmark included in the below table is used for measuring performance and refers to the Institutional base class "Z". Benchmark performance data are only disclosed for Sub-Funds with unit classes distributed in Switzerland.

(17)The Sub-Fund was merged into Eurizon Fund - Absolute Prudent on 12 December 2025.

(18)The Sub-Fund was merged into Eurizon Fund - Absolute Prudent on 12 December 2025.

Information for investors in Switzerland (Unaudited)

1) The country of origin of the Fund is Luxembourg.

2) The representative is Reyl & Cie Ltd., Rue du Rhône 4, CH-1204 Geneva.

3) The paying agent is Reyl & Cie Ltd., Rue du Rhône 4, CH-1204 Geneva.

4) The prospectus, the Key Information Documents (KID), the management regulations, the list of purchases and sales, as well as the annual and semi-annual reports can be obtained free of charge from the representative.

SECURITIES FINANCING TRANSACTIONS REGULATION

The Securities Financing Transactions Regulation ("SFTR") introduced disclosure requirements for securities financing transactions and total return swap contracts.

A security financing transaction is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement,
- securities or commodities lending and securities or commodities borrowing,
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction.

Securities Lending

The following provides an analysis of the maturity tenor of securities on loan as at 31 December 2025 (the analysis is based on the contractual maturity date of the securities on loan):

Sub-Fund	1 day	2 to 7 days	8 to 30 days	31 to 90 days	91 to 365 days	More than 365 days	Open transactions (in EUR)	Total
Eurizon Fund - Bond EUR Short Term LTE						20 507 711,70		20 507 711,70
Eurizon Fund - Bond EUR Long Term LTE						51 912 853,60		51 912 853,60
Eurizon Fund - Bond USD LTE					17 377 295,11	313 227 672,81		330 604 967,92
Eurizon Fund - Bond USD Short Term LTE					5 633 280,78	55 793 247,52		61 426 528,30

Eurizon Fund - Equity Emerging Markets Smart Volatility							4 995 887,90	4 995 887,90
Eurizon Fund - Equity World Smart Volatility							26 792 365,16	26 792 365,16

Total Return Swaps

The following summarises the aggregate value of total return swaps, analysed by counterparty as at 31 December 2025:

Sub-Fund	Currency	Counterparty	Counterparty's country of incorporation	Total Return Swaps	% of Net Assets
Eurizon Fund - Equity Emerging Markets LTE	EUR	J.P. Morgan SE	Germany	304 598,43	0,03
Eurizon Fund - Equity China Smart Volatility	EUR	J.P. Morgan SE	Germany	184 105,67	0,14
Eurizon Fund - Equity China Smart Volatility	EUR	Morgan Stanley Bank AG	Germany	162 773,75	0,13
Eurizon Fund - Equity Emerging Markets Smart Volatility	EUR	J.P. Morgan SE	Germany	111 500,63	0,03
Eurizon Fund - Equity Emerging Markets Smart Volatility	EUR	Morgan Stanley Bank AG	Germany	325 025,58	0,10
Eurizon Fund - Equity China A	EUR	Morgan Stanley Bank AG	Germany	131 743,76	0,05

The following table details provide an analysis of the maturity tenor of total return swaps transactions outstanding as at 31 December 2025:

Sub-Fund	Currency	1 day	2 to 7 days	8 to 30 days	31 to 90 days	91 to 365 days	More than 365 days
	(Absolute values)						
Eurizon Fund - Equity Emerging Markets LTE	EUR				304 598,43		

Sub-Fund	Currency	1 day	2 to 7 days	8 to 30 days	31 to 90 days	91 to 365 days	More than 365 days
	(Absolute values)						
Eurizon Fund - Equity China Smart Volatility	EUR					346 879,42	
Eurizon Fund - Equity Emerging Markets Smart Volatility	EUR				325 025,58	111 500,63	
Eurizon Fund - Equity China A	EUR					131 743,76	

The above maturity tenor analysis has been based on the contractual maturity date of the relevant total return swap transaction as at 31 December 2025.

Total return swaps and more specifically OTC derivative transactions are entered into by the parties under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Sub-Fund and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

All returns from OTC derivative transactions will accrue to the Sub-Fund and are not subject to any returns sharing arrangements with the Investment Manager or any other third parties.

Sub-Fund	Change in unrealised	Realized	Return	% of Avg Net Assets
Eurizon Fund - Equity Emerging Markets LTE	329 486,11	3 090 869,68	3 420 355,79	0,38

As at the balance sheet date all of the cash collateral received in respect of OTC derivatives transactions (including total return swaps), is not part of any reinvestment program.

Non-cash collateral received in respect of securities lending transactions cannot be sold, re-invested or pledged.

The following table provides an analysis of the amounts of non-cash collateral received by the Fund in respect of securities lending transactions held by a custodian, as at the balance sheet date.

	Market Value of Non-cash collateral received
Custodian	**Securities lending**
State Street International GmbH, Luxembourg Branch	711 025 994,36
Total (EUR)	**711 025 994,36**

Non-cash collateral received from the counterparty by way of a security collateral arrangement in relation to OTC derivatives (including total return swaps) is kept in a segregated account.

SUSTAINABLE FINANCE DISCLOSURE REGULATION (SFDR)

For each Sub-Fund that has (E) environmental and (S) social characteristics and promotes investment into assets which follow good governance (G) practices in accordance with articles 8 and 9 of the Sustainable Finance Disclosure Regulation ("SFDR"), this part of the Annual Report gathers the periodic information set out according to the template provided in the SFDR regulatory technical standards.

For the rest of the Sub-Funds, Eurizon integrates sustainability risk analysis into its investment process pursuant to article 6 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of November 27, 2019 (the "SFDR Regulation") on sustainability reporting in the financial services industry.

Without prejudice to the integration of sustainability risk analysis into the investment process, the Sub-Funds do not, however, promote the specific environmental objectives identified in Regulation (EU) 2020/852 of the European Parliament and of the Council of June 18, 2020 (the "Taxonomy Regulation") on the establishment of a framework to encourage sustainable investment and amending Regulation (EU) 2019/2088. In this context, it should be noted that the investments underlying this Fund do not take into account the European Union's criteria for environmentally sustainable economic activities.

As at 31 December 2025, the following Sub-Funds are categorised article 8 under SFDR:

Eurizon Fund - Bond EUR Short Term LTE

Eurizon Fund - Bond EUR Medium Term LTE

[7]The Sub-Fund was launched on 7 October 2025.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond EUR Short Term LTE

Legal entity identifier: 549300N1TOHD2XCCBD19

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **1.16%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer’s country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer’s country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	85.41%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	85.26%	87.91%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

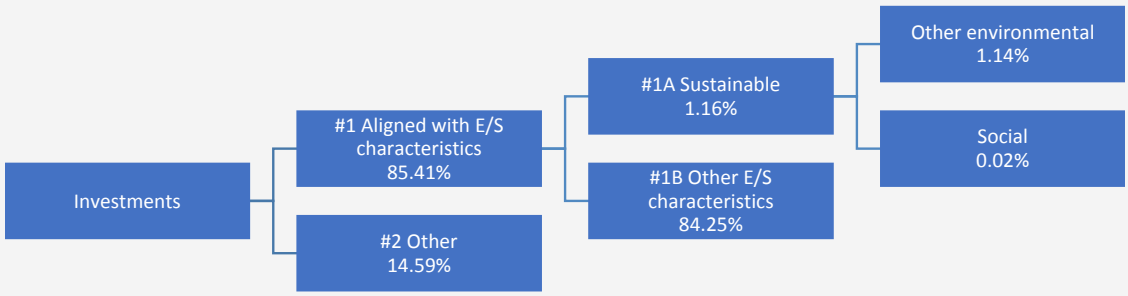
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

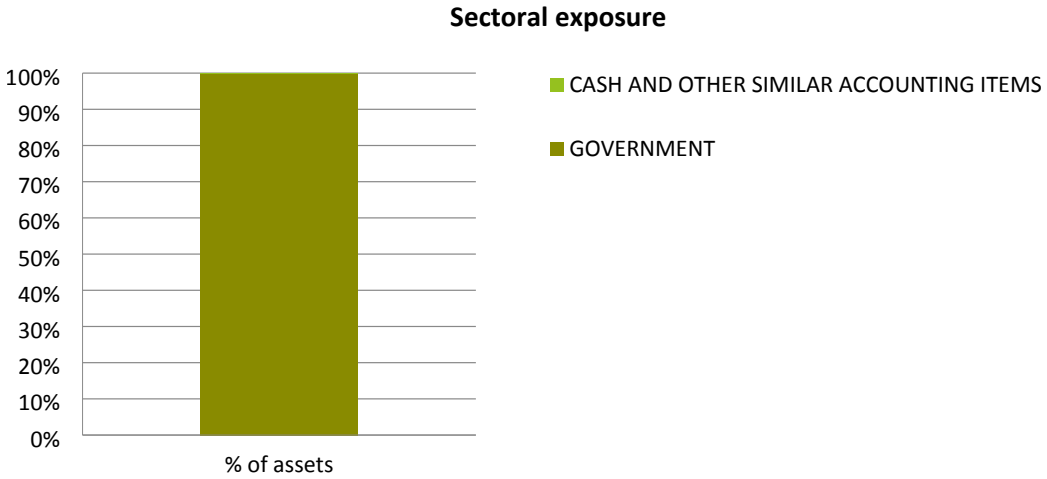
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

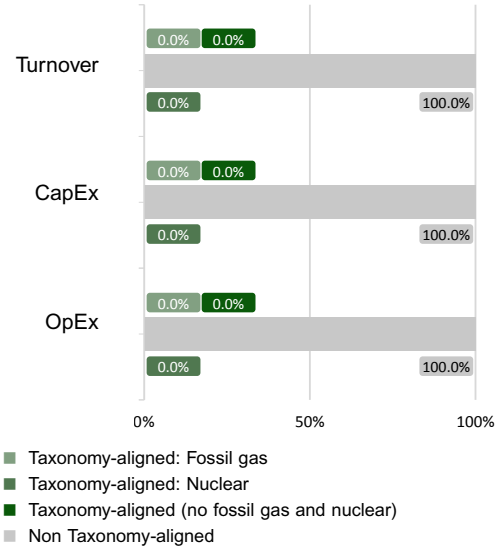
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

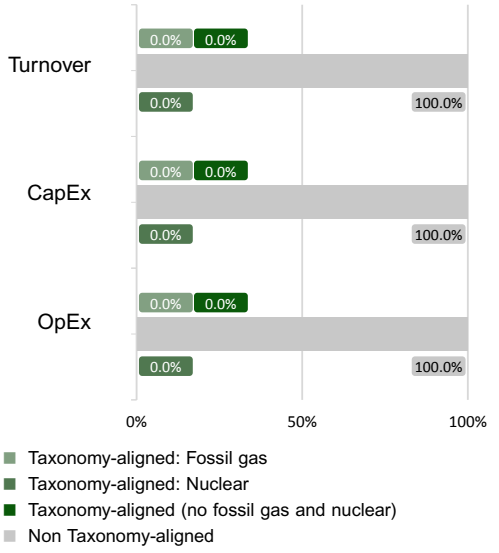
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 0% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 1.14% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.02% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the

environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond EUR Medium Term LTE

Legal entity identifier: 549300WU9J3CMUBCG706

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **2.57%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer’s country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer’s country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	85.21%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	83.67%	84.40%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?

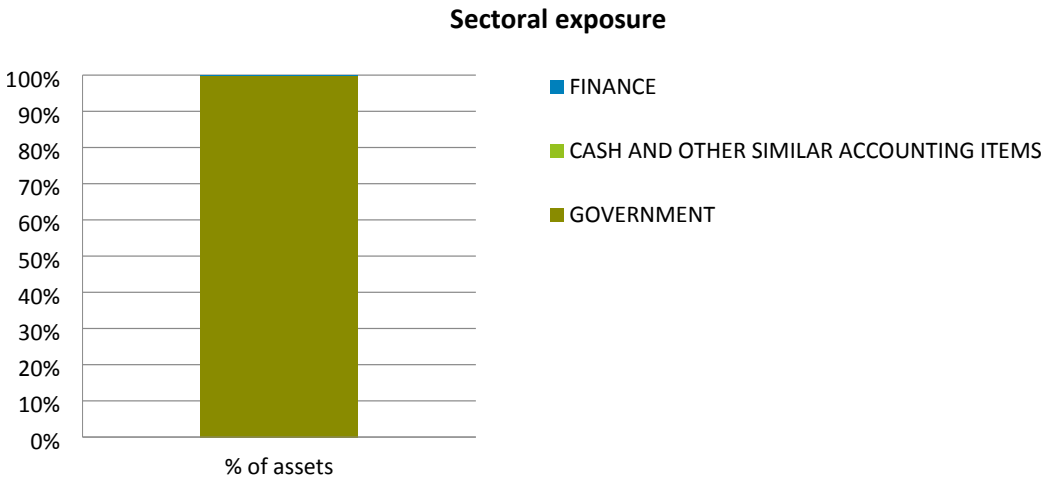
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

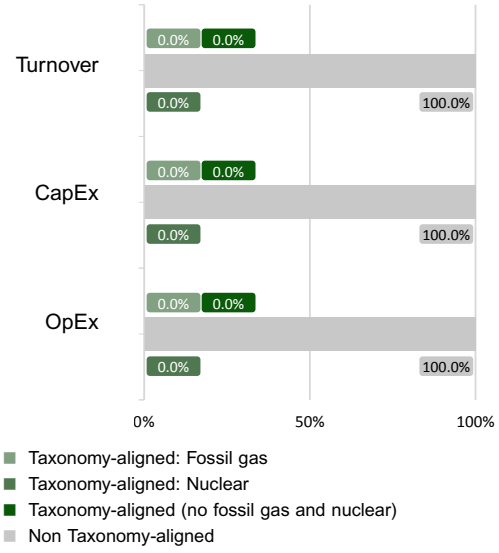
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

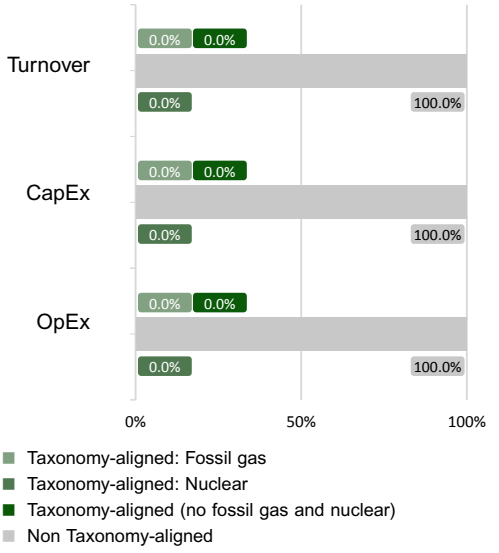
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 0% of the total investments

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 2.57% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics but did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond EUR Long Term LTE

Legal entity identifier: 549300B22R97K38OCC37

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **4.85%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer’s country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer’s country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	81.88%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	81.00%	83.82%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

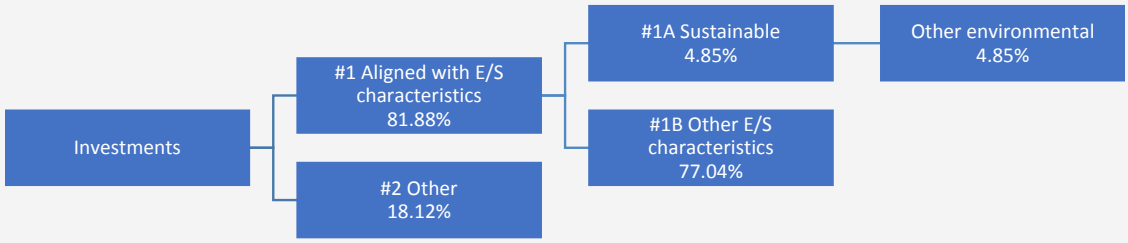
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

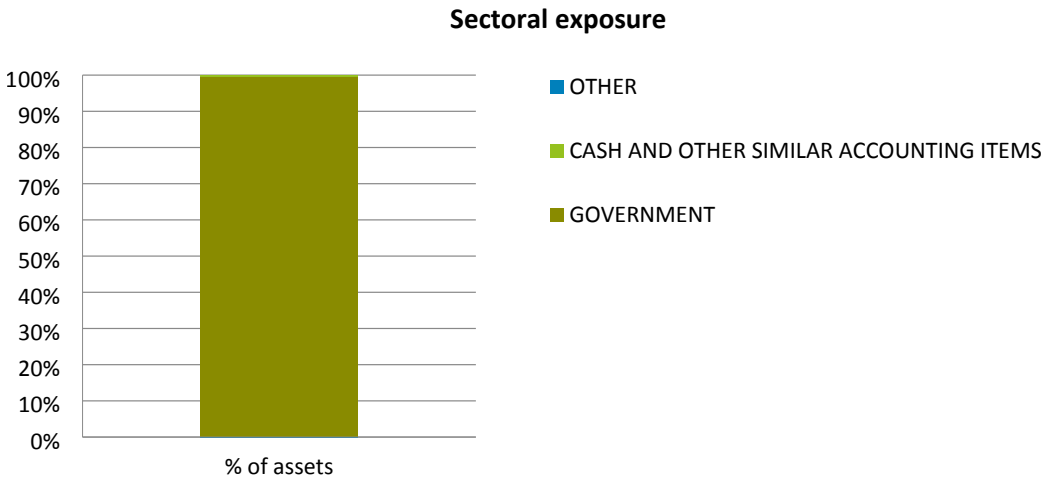
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

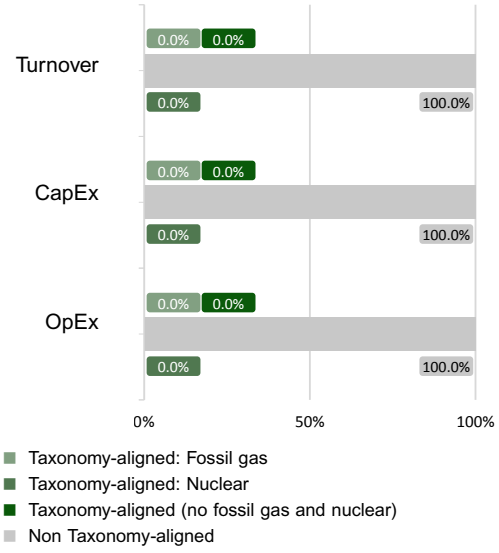
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

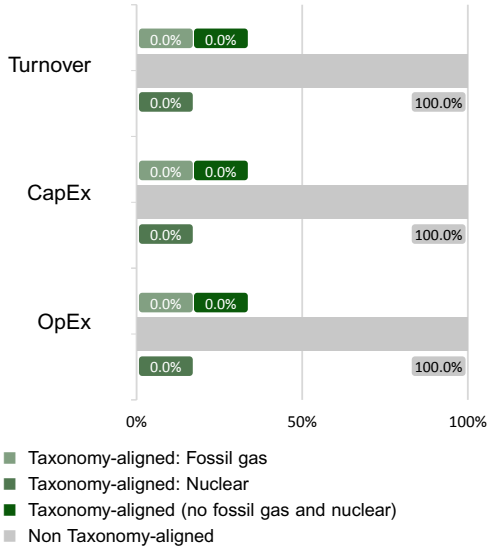
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 0% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 4.85% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics but did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the

environmental or social characteristics that they promote.

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Global Bond LTE

Legal entity identifier: 549300WWLS11W0CG3K68

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **1.42%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	97.80%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	97.89%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

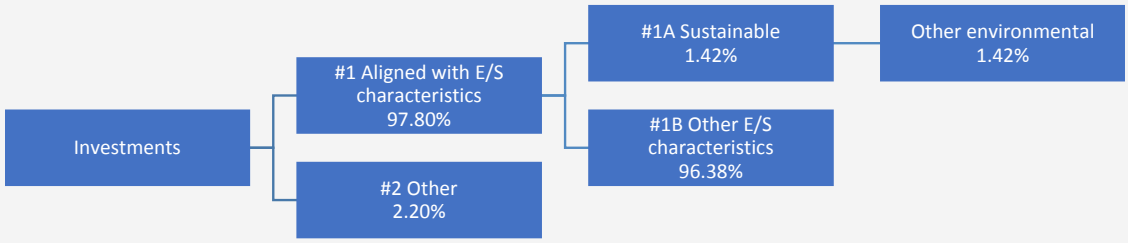
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

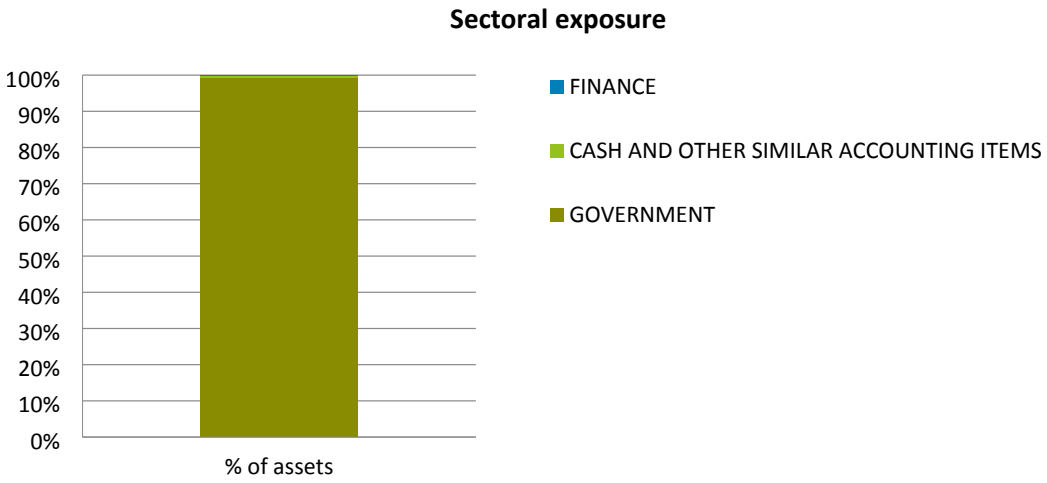
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

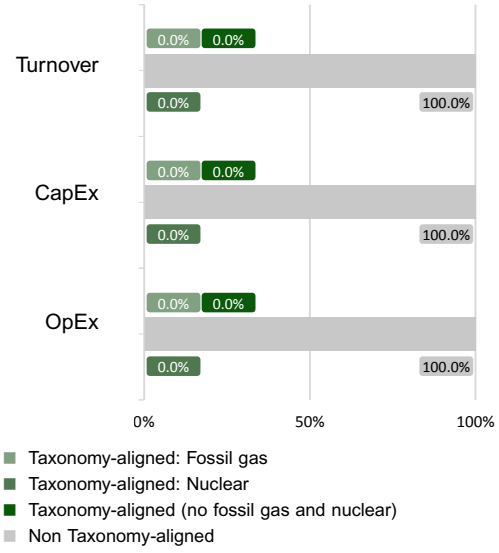
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

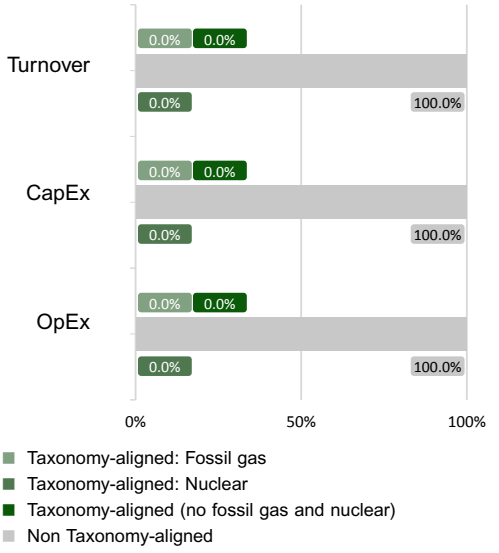
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 1% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 1.42% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics but did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% Bloomberg MSCI Global Treasury Core Currencies Sustainability Index.

Reference benchmarks are indexes to measure whether the financial product attains the

- **How does the reference benchmark differ from a broad market index?**

  The Bloomberg MSCI Global Treasury Core Currencies Sustainability Index is a multi-currency benchmark that includes investment grade, fixed-rate, treasury bonds from developed and emerging markets issuers. The index includes securities with at least one year until final maturity. Additionally, the index includes issuers that have a MSCI ESG Rating of BBB or higher. Unrated Issuers are excluded.

  The index is based on the Bloomberg Global Treasury Index, its parent index.

environmental or social characteristics that they promote.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (***https://www.msci.com/our-solutions/indexes/bloomberg-msci-esg-fixed-income-indexes***).

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Sustainability indicators performance with reference to the product:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

ESG Index integration: 97.80%

- **How did this financial product perform compared with the reference benchmark?**

Sustainability indicators performance with reference to the benchmark:

Issuer exclusion: 0.00%

ESG Index integration: Not Applicable

- **How did this financial product perform compared with the broad market index?**

Sustainability indicators performance with reference to the broad market index:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

ESG Index integration: Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Emerging Markets HC LTE

Legal entity identifier: 549300RLT8P2FIXHLT35

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **6.99%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	98.41%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	96.46%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies

What were the top investments of this financial product?

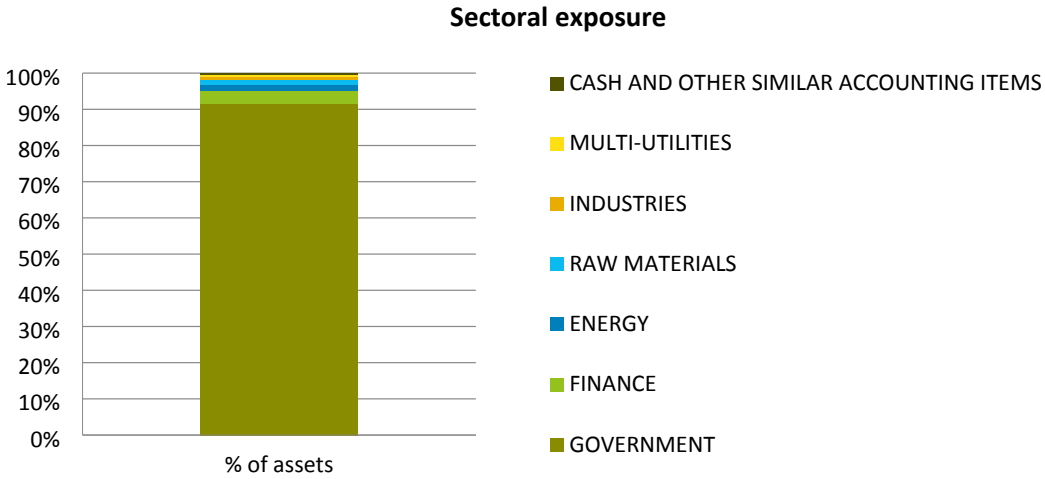
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

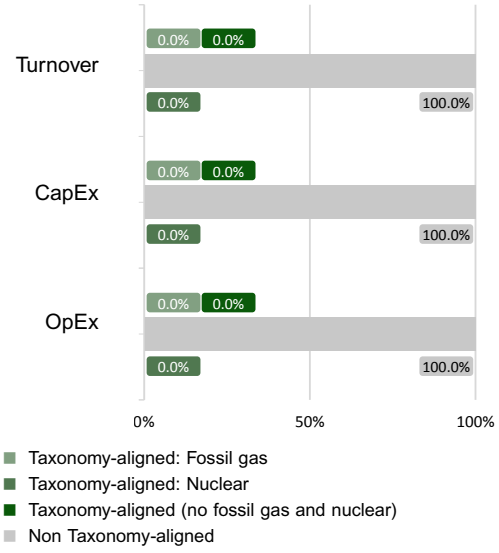
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

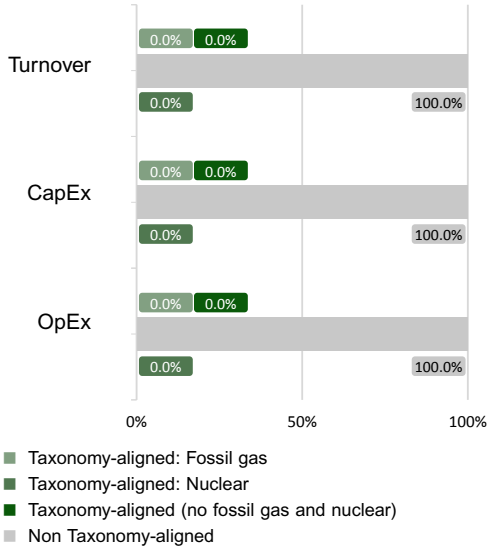
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 9% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 4.86% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 2.13% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% JP Morgan ESG EMBI Global Diversified Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  The JP Morgan ESG EMBI Global Diversified Index is based on the J.P. Morgan EMBI Global Diversified Index.

  The JP Morgan ESG EMBI Global Diversified Index tracks liquid, US Dollar emerging market fixed and floating-rate debt instruments issued by sovereign and quasi-sovereign entities. The index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight or remove issuers that rank lower.

Issuers are excluded from the index based on the following criteria:

- Sovereign issuers with JP Morgan ESG (JESG) scores less than 30 and quasi-sovereign issuers with JESG scores less than 20
- Quasi-sovereign issuers that are deemed non-compliant with UN Global Compact principles as identified by both RepRisk and Sustainalytics
- Quasi-sovereign Issuers with revenue from the following sectors: Oil sands (any extraction involvement), Thermal Coal (any extraction or power generation involvement), Tobacco (any production involvement), Controversial weapons (any tailor-made/essential involvement), Small Arms (Any involvement in assault and non-assault weapons, key components, or over 10% revenue from military/law enforcement weapons), Military contracting (revenues over 10% from weapons).

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website

(***https://www.jpmorgan.com/content/dam/jpm/cib/complex/content/markets/composition-docs/JPM_JESG_Index_Methodology.pdf***).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainability indicators performance with reference to the product:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

ESG Index integration: 98.41%

How did this financial product perform compared with the reference benchmark?

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Corporate EUR LTE

Legal entity identifier: 549300TTFGY6KESMTQ72

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **70.68%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	97.80%

…and compared to previous periods?

As of May 13, 2024, the fund has changed the ESG integration process replacing the ESG Score Integration with ESG Index Integration

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.35 Benchmark: 7.28 Until May 12, 2024	Fund: 7.47 Benchmark: 7.35	Fund: 7.42 Benchmark: 7.13
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	96.80% From May 13, 2024		

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

respect for human rights, anti-corruption and anti-bribery matters.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

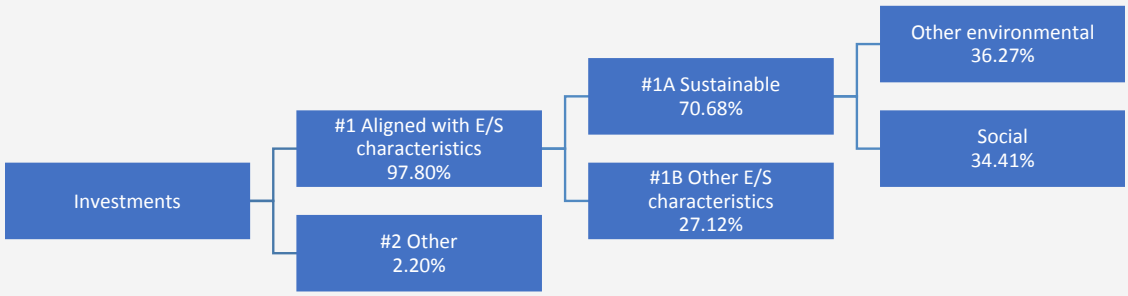
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

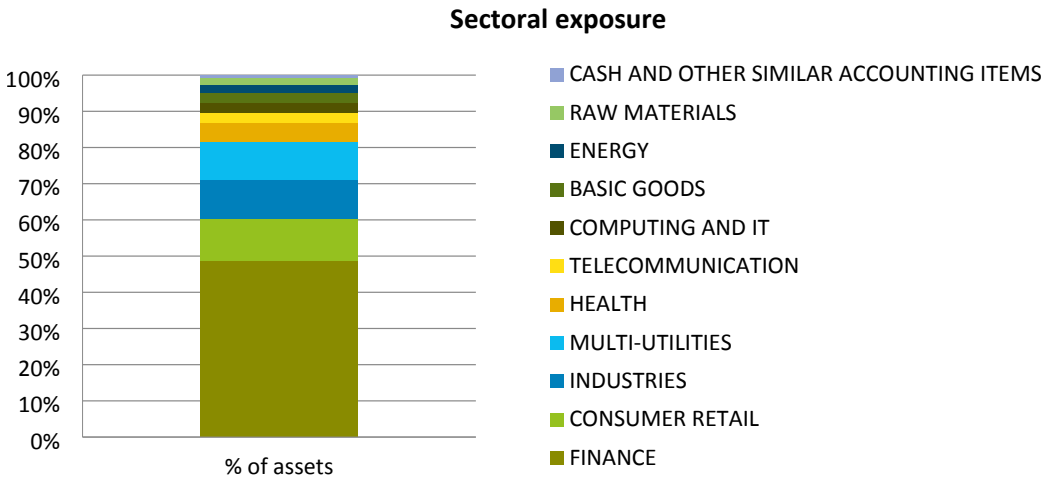
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

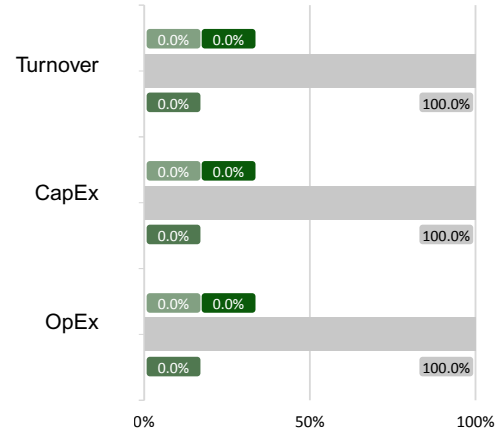
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

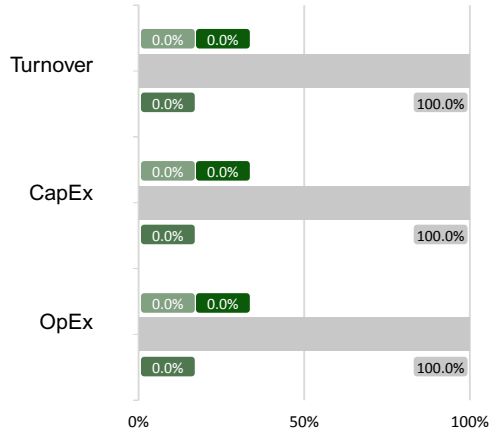
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 36.27% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 34.41% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% ICE Euro Large Cap Corporate ESG Tilt Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  ICE Euro Large Cap Corporate ESG Tilt Index is a modified version of the ICE BofA Euro Large Cap Corporate Index (the “Parent Index”), that adjusts security weightings so as to improve the overall Environmental, Social, Governance (“ESG”) risk score of the Index.

  The Index includes all Parent Index constituents that are rated by Sustainalytics, the source for the ESG data

  The ESG Tilt index methodology filters out companies with significant involvement in controversial weapons and tilts the weights of remaining constituents towards those with better (lower) ESG Risk Scores and away from those with worse (higher) ESG Risk Scores.

  For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (***https://indices.ice.com***).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainability indicators performance with reference to the product:
Sector exclusion: 0.00%
Issuer exclusion: 0.00%
ESG Index integration: 97.80%

How did this financial product perform compared with the reference benchmark?

Sustainability indicators performance with reference to the benchmark:

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **66.83%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	96.24%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	95.46%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

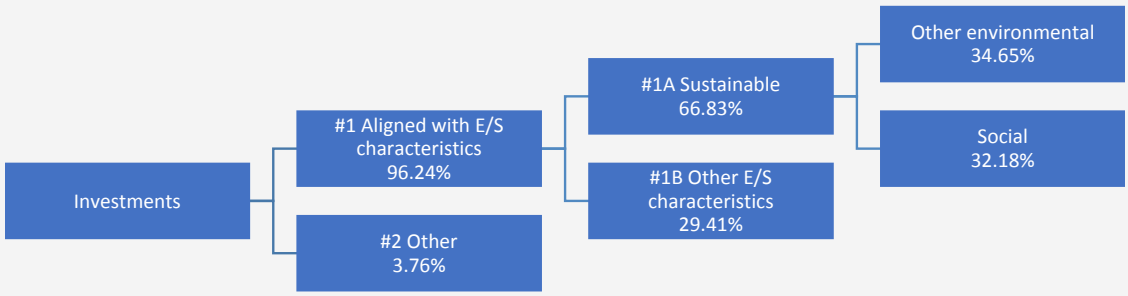
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

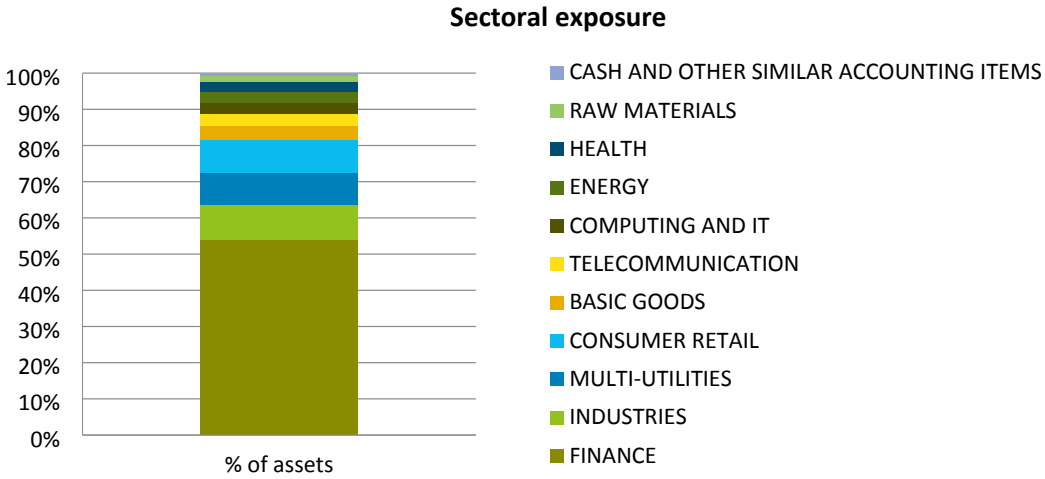
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

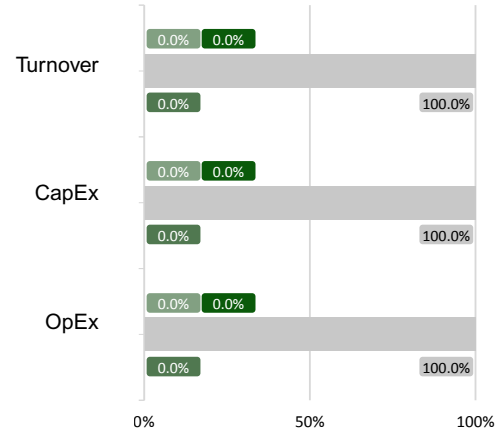
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

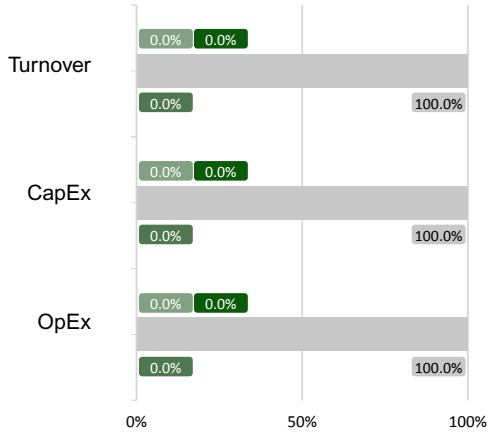
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 34.65% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 32.18% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% ICE 1-5 Year Euro Large Cap Corporate ESG Tilt Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  ICE 1-5 Year Euro Large Cap Corporate ESG Tilt Index is a modified version of the ICE BofA 1-5 Year Euro Large Cap Corporate Index (the “Parent Index”), that adjusts security weightings so as to improve the overall Environmental, Social, Governance (“ESG”) risk score of the Index.

  The Index includes all Parent Index constituents that are rated by Sustainalytics, the source for the ESG data.The ESG Tilt index methodology filters out companies with significant involvement in controversial weapons and tilts the weights of remaining constituents towards those with better (lower) ESG Risk Scores and away from those with worse (higher) ESG Risk Scores.

  For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (***https://indices.ice.com***).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainability indicators performance with reference to the product:
Sector exclusion: 0.00%
Issuer exclusion: 0.00%
ESG Index integration: 96.24%

How did this financial product perform compared with the reference benchmark?

Sustainability indicators performance with reference to the benchmark:
Sector exclusion: 0.00%
Issuer exclusion: 0.00%
ESG Index integration: Not Applicable

How did this financial product perform compared with the broad market index?

Sustainability indicators performance with reference to the broad market index:
Sector exclusion: 0.00%
Issuer exclusion: 0.03%
ESG Index integration: Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity Emerging Markets LTE

Legal entity identifier: 5493004QBZF8XSVG1E67

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **60.14%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Index integration: the fund invests at least 90% of its assets in issuers present in its benchmark that has been identified on the basis of environmental, social and corporate governance criteria

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be "responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.16%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	92.39%

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be "responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.05%	0.08%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.13%	0.05%	0.05%
ESG Index integration	Percentage of assets invested in issuers present in the benchmark.	92.34%	90.98%	93.17%

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of ‘do not significant harm’ (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

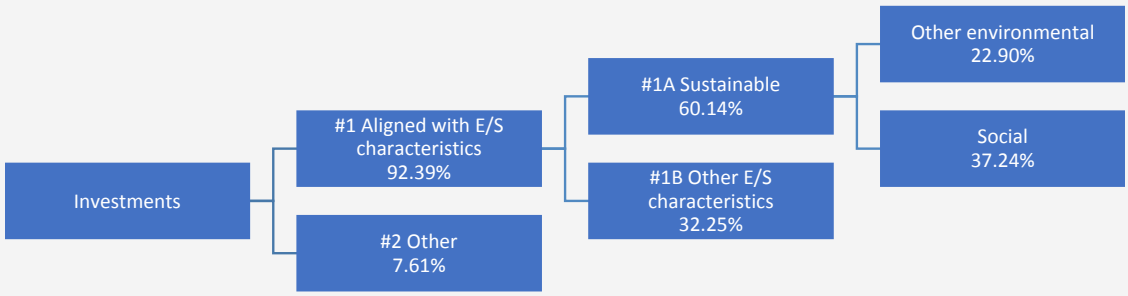
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

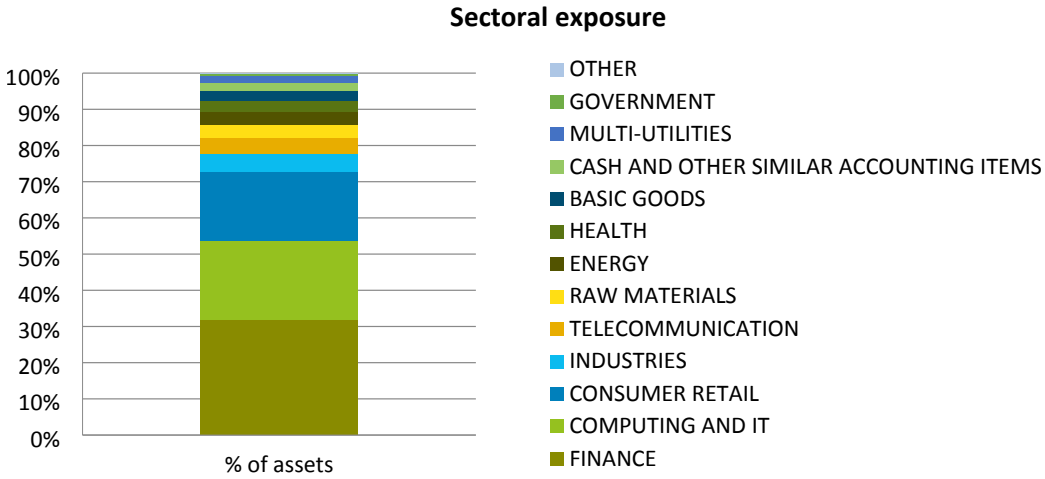
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

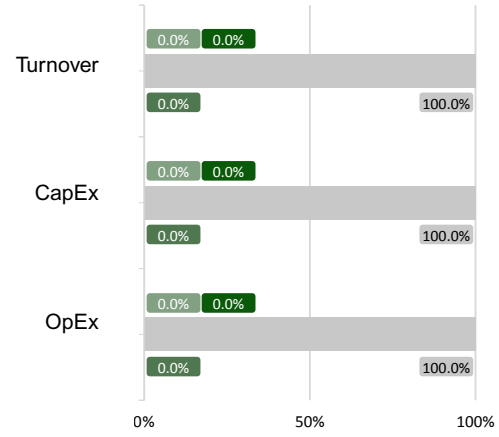
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

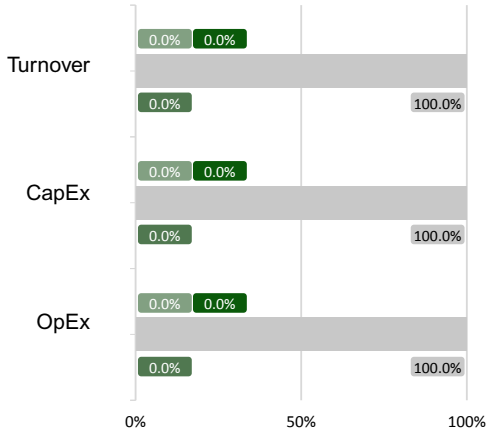
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 99% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 22.90% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 37.24% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers not included in the fund's benchmark; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

The following specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes: 100% MSCI Emerging Markets Universal Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  The MSCI Emerging Markets Universal Index is based on the MSCI Emerging Markets Index, its parent index, and includes large and mid-cap securities across 24 Emerging Markets (EM) countries*. The index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, using minimal exclusions from the MSCI Emerging Markets index.

  For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (***https://www.msci.com/msci-esg-universal-indexes***).

  * EM countries include: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainability indicators performance with reference to the product:
Sector exclusion: 0.00%
Issuer exclusion: 0.16%
ESG Index integration: 92.39%

How did this financial product perform compared with the reference benchmark?

Sustainability indicators performance with reference to the benchmark:
Sector exclusion: 0.60%
Issuer exclusion: 0.57%
ESG Index integration: Not Applicable

How did this financial product perform compared with the broad market index?

Sustainability indicators performance with reference to the broad market index:
Sector exclusion: 1.37%
Issuer exclusion: 3.69%
ESG Index integration: Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity Italy Smart Volatility

Legal entity identifier: 549300JK0IG60Q0S6R15

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **73.83%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.20 Benchmark: 7.17

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

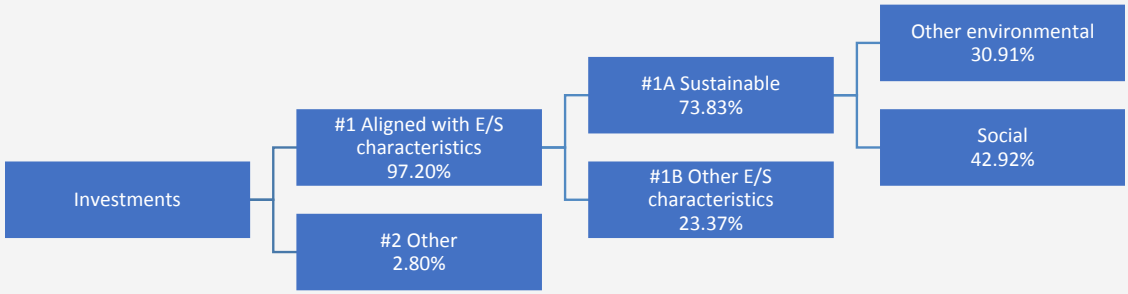
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

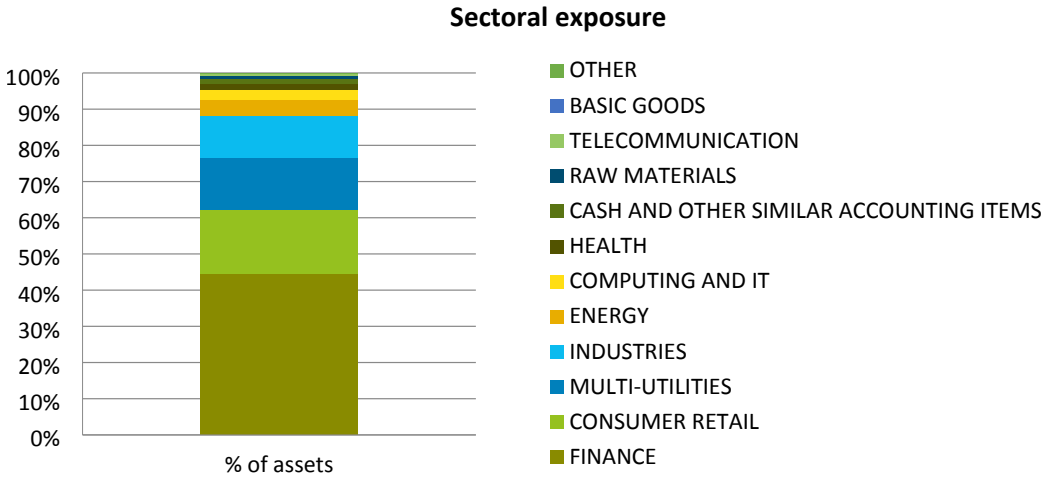
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

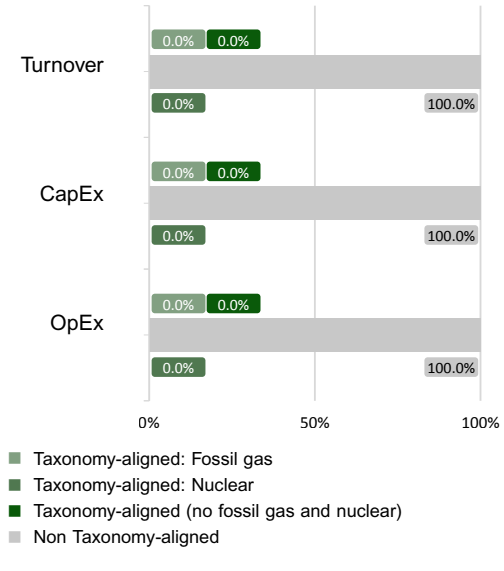
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

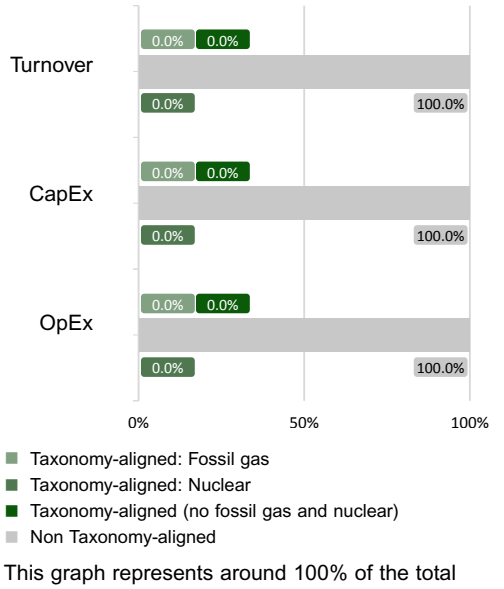
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 30.91% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 42.92% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity China Smart Volatility

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **37.09%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	1.18%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.22 Benchmark: 5.79

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

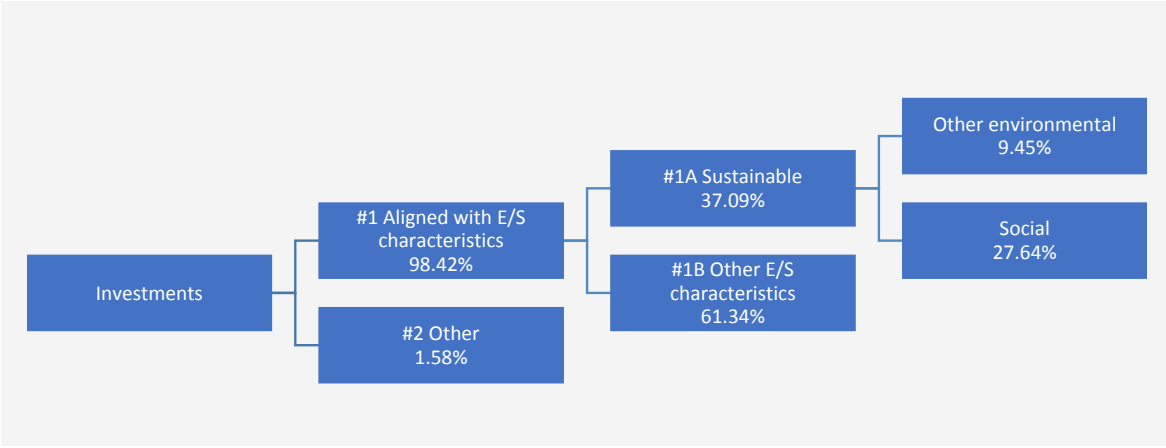
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

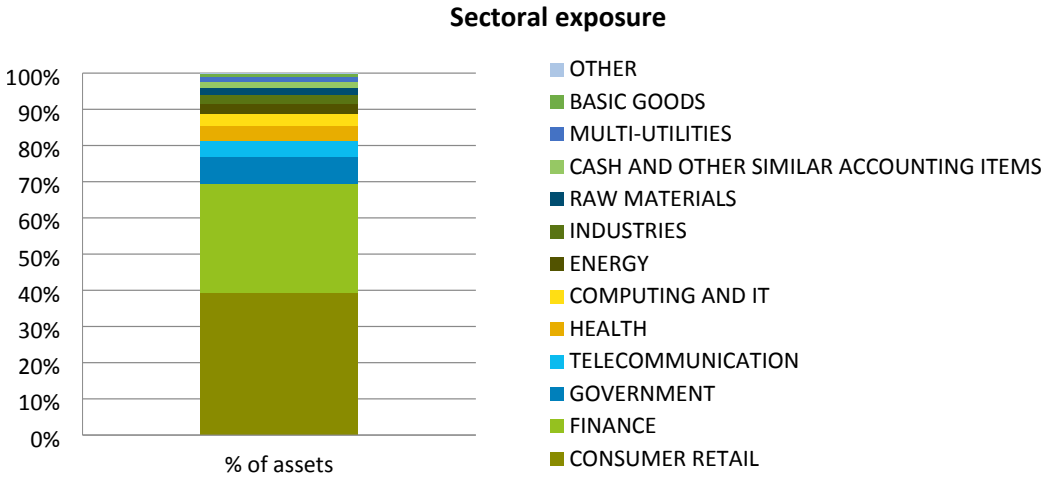
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

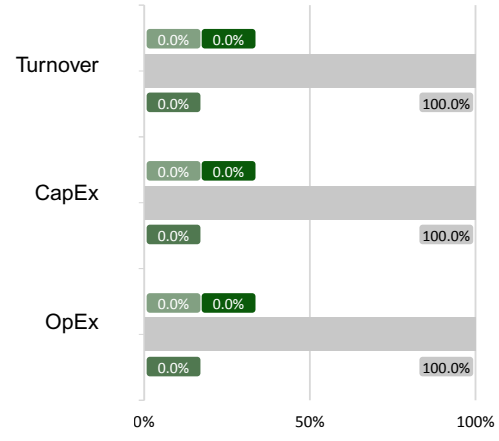
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

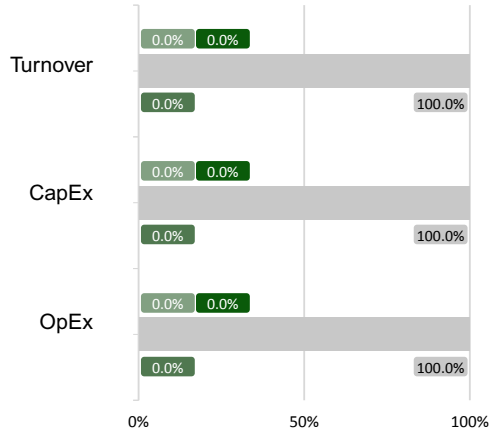
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 93% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 9.45% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 27.64% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity Emerging Markets Smart Volatility

Legal entity identifier: 54930083ZR757M6P6736

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **63.10%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.27%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.27 Benchmark: 6.11

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

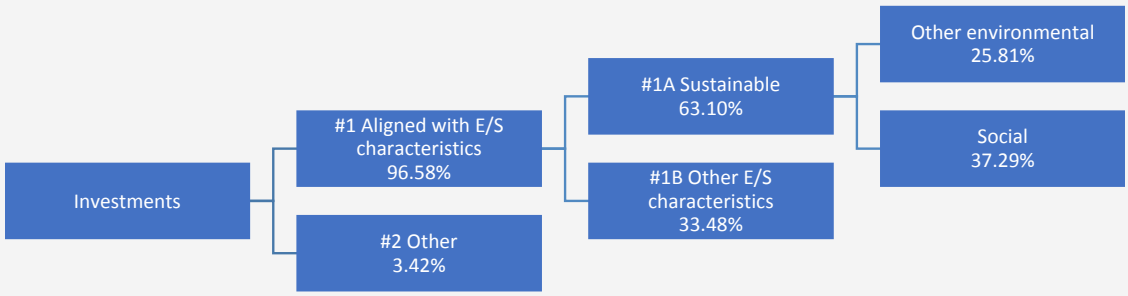
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

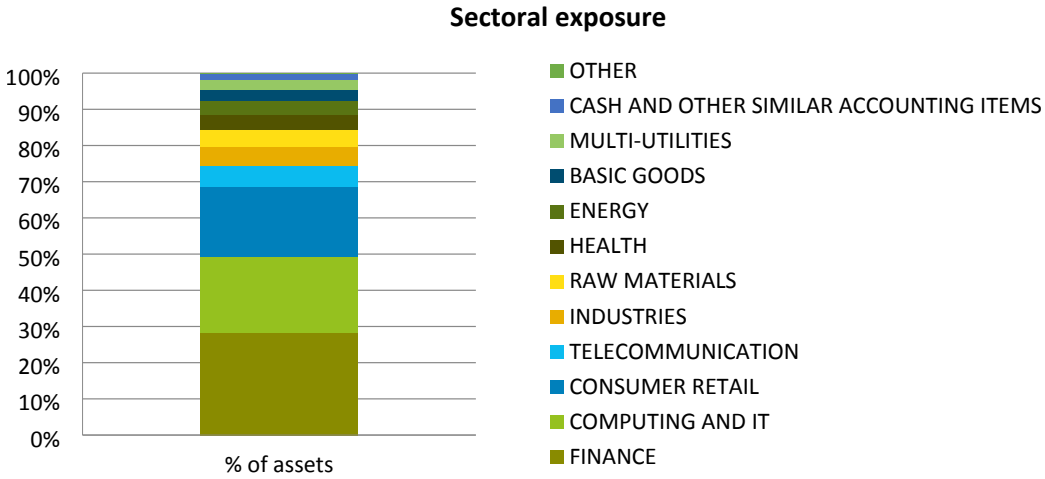
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

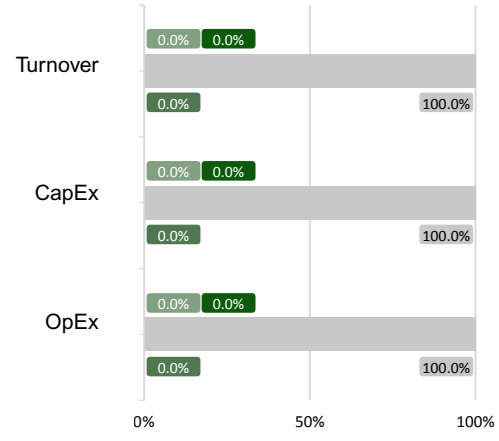
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

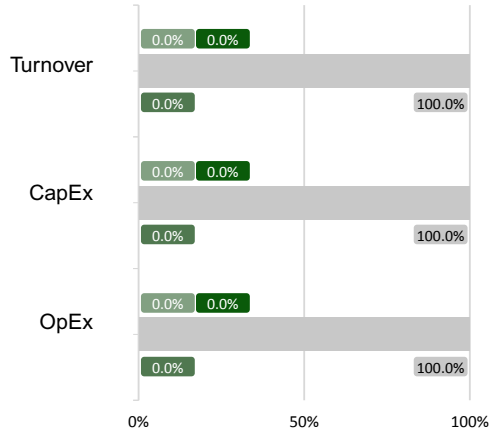
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 25.81% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 37.29% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity World Smart Volatility

Legal entity identifier: 549300KAINZSW5BOH873

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **60.98%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.87 Benchmark: 6.69

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

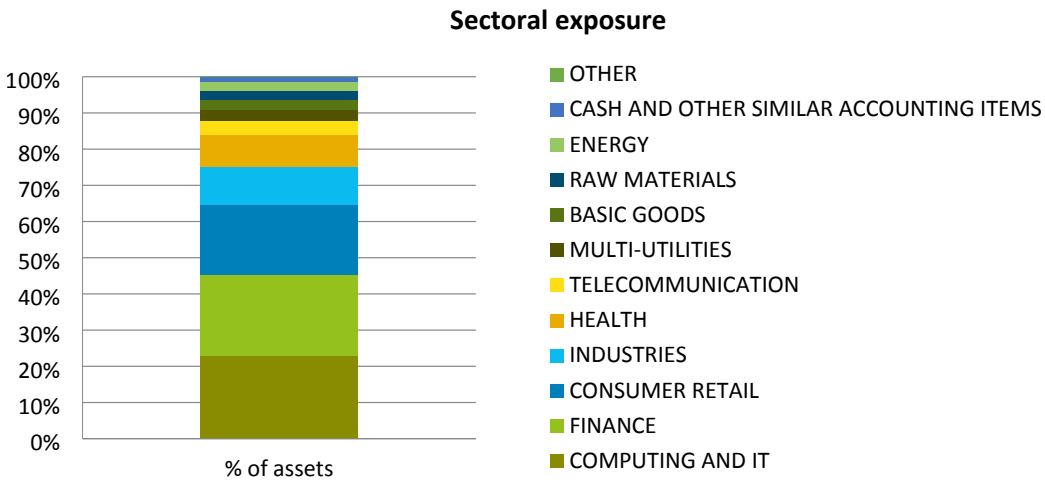
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

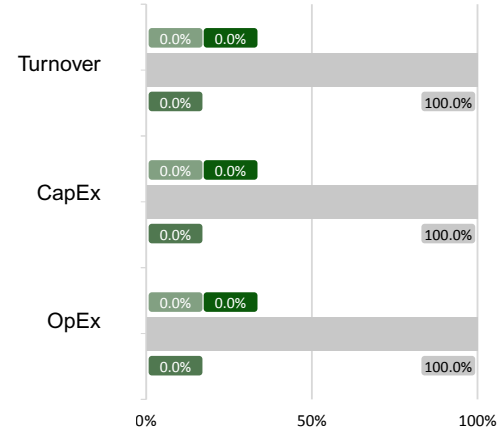
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

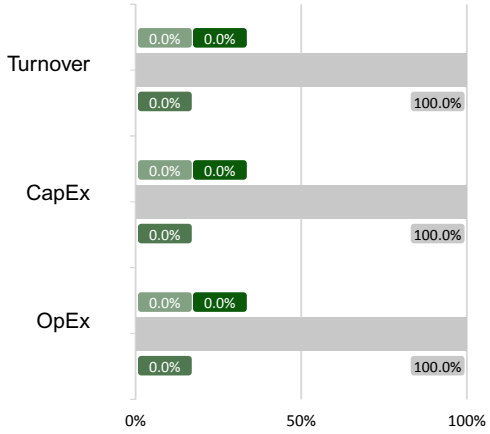
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 26.47% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 34.51% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: Eurizon Fund - Money Market EUR T1

Legal entity identifier: 549300WLXFZTHGSYM814

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **1.94%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer’s country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer’s country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	88.66%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	87.04%	81.79%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

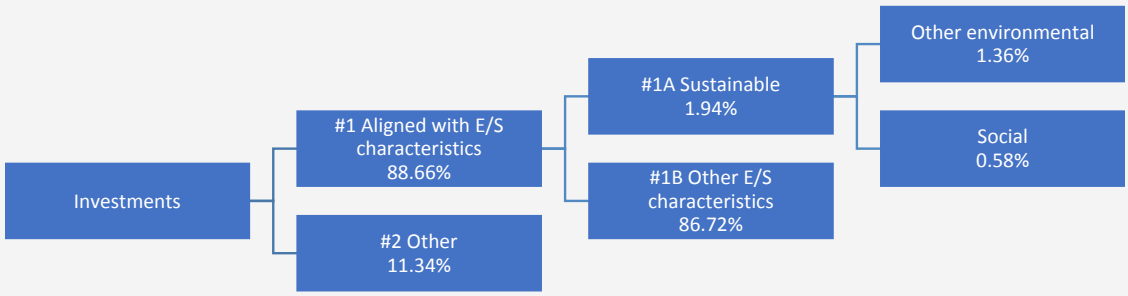
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country

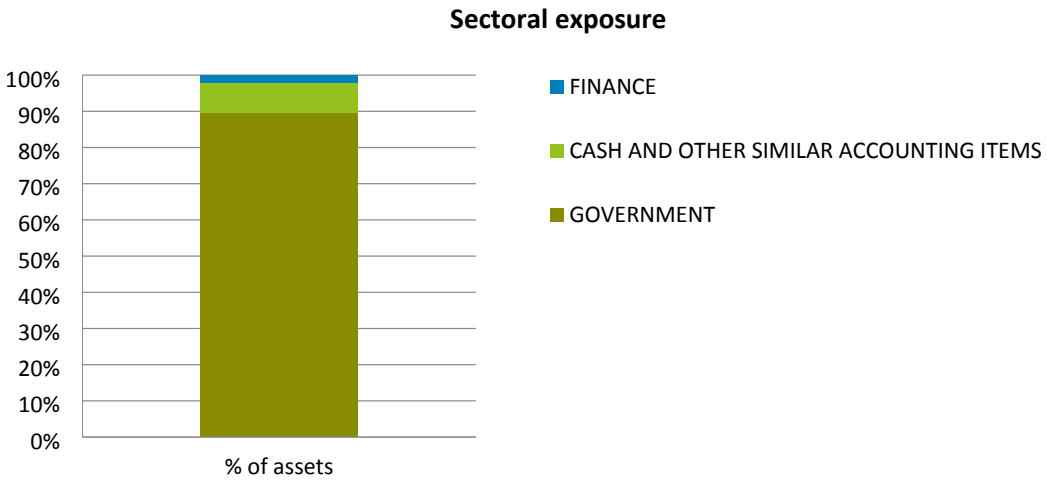
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

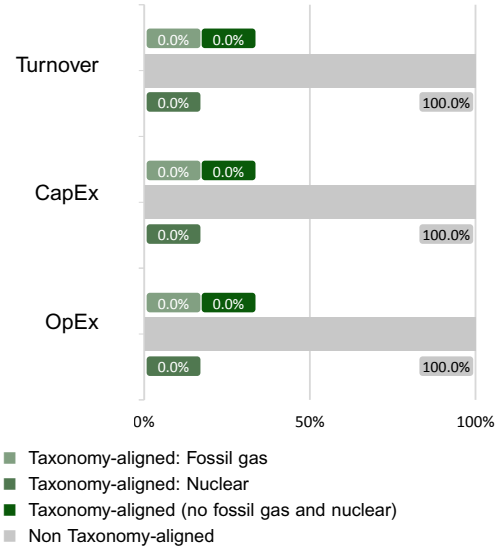
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

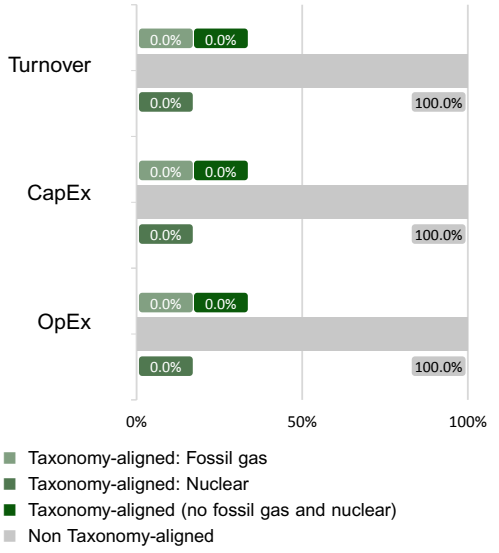
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 10% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 1.36% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.58% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Short Term EUR T1

Legal entity identifier: 5493002Y47FE0FT5L004

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **2.20%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer’s country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer’s country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	96.00%

…and compared to previous periods?

Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	95.02%	93.07%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

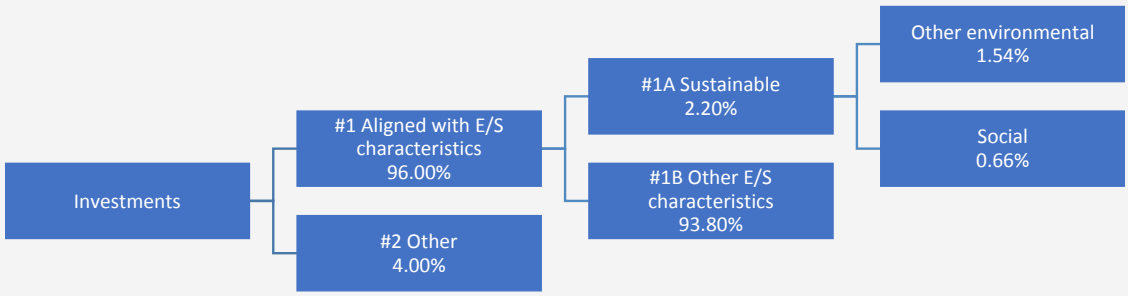
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

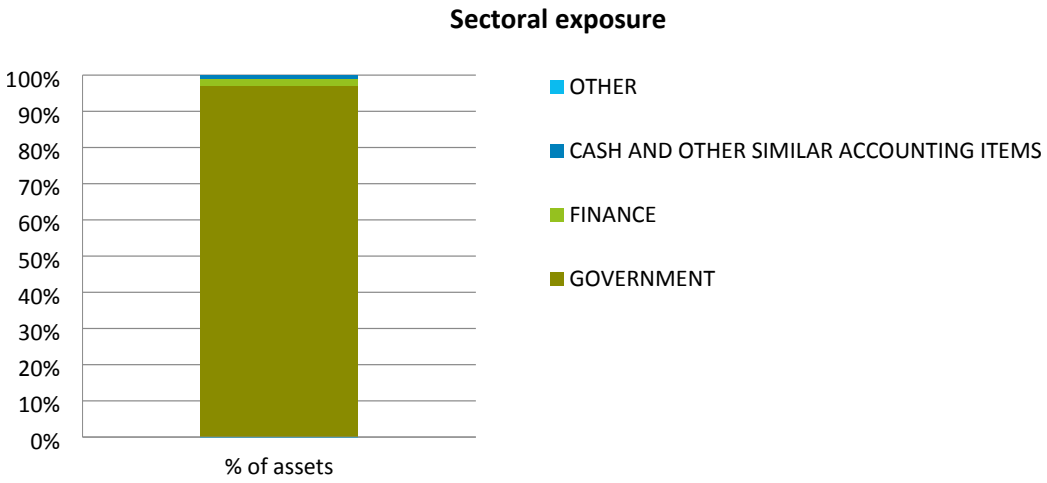
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

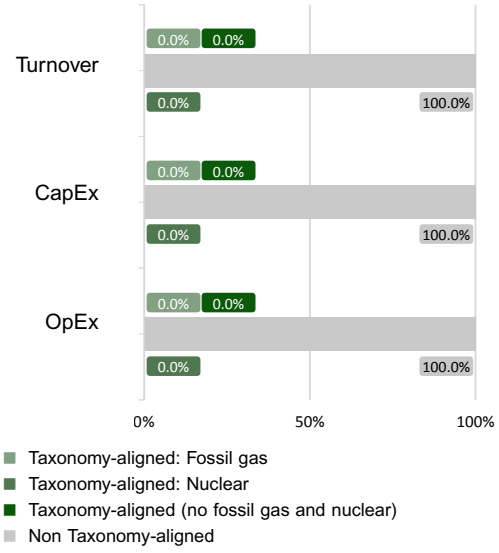
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

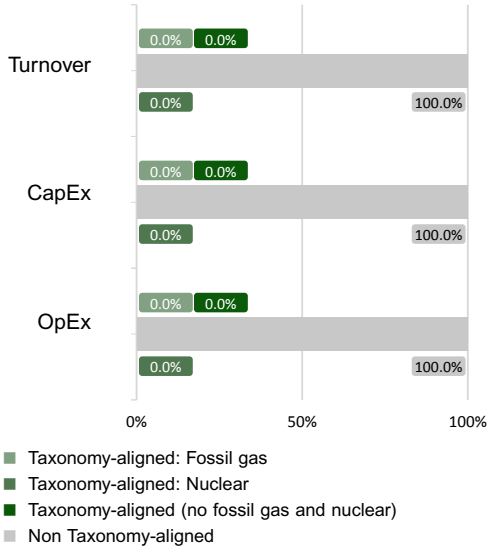
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 3% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 1.54% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.66% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Cash EUR

Legal entity identifier: 549300975OYOJEEVKD28

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **2.10%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

Sovereign ESG Integration: the fund adopts processes for selecting government issuers that use the indicators provided by the so-called "Sustainable Development Report". This objective is achieved by investing at least 70% of assets in government issuers that have successfully passed screenings that consider (i) the progress of the issuer’s country against the Sustainable Development Goals defined by the United Nations with the aim of fostering a more conscious and sustainable global development (ii) the carbon footprint of the issuer’s country and (ii) the level of social violations to international or local norms, such as international treaties, UN principles or local regulations

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	89.53%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%
Sovereign ESG Integration	Percentage of assets invested in government issuers exceeding the screening based on (i) the indicators provided by the so-called "Sustainable Development Report" which assesses the progress made by each country in achieving the 17 UN-sponsored SDGs and the potentially negative spillovers with respect to the achievement of such goals, as well as (ii) the main environmental and social adverse impacts with respect to the government issuers.	85.74%	85.25%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Exposure to controversial weapons
- Exposure to fossil fuel companies
- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?

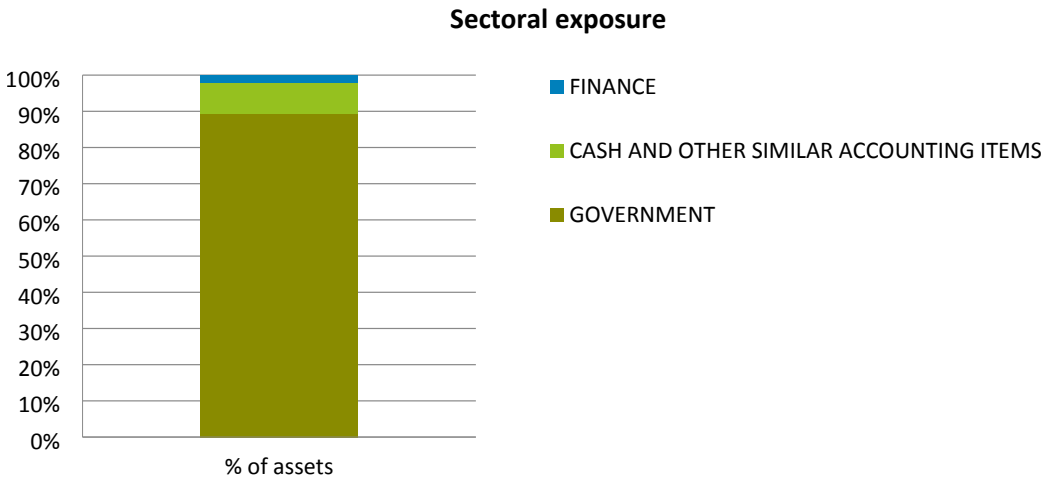
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

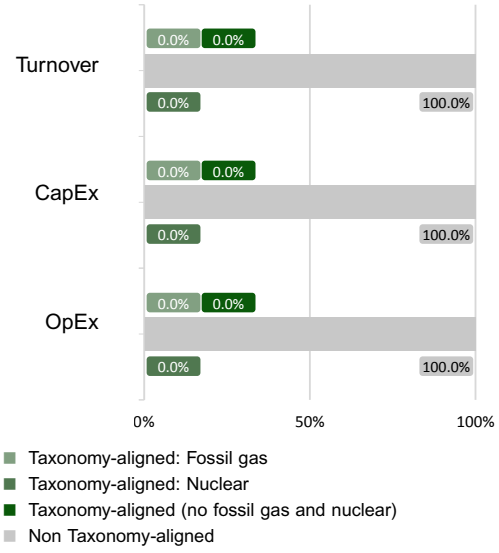
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

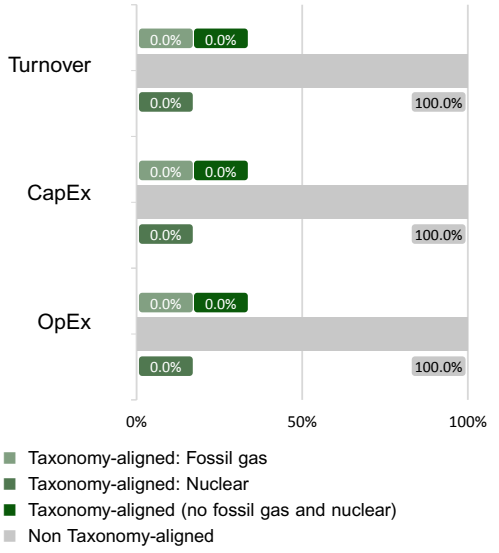
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 11% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 1.47% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.63% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in government issuers that have not successfully passed the specific selection processes aimed at verifying the integration of ESG factors; (ii) derivatives for reducing risks (hedging) and costs; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Aggregate Green Bonds Short Term

Legal entity identifier: 391200P67RWJPXKHZ797

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ **Yes**	●○ ☐ **No**
☑ It made **sustainable investments with an environmental objective**: 96.48%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___**%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: 0.00%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The financial product pursued, in accordance with good governance practices, sustainable investment objectives within the meaning of the SFDR Regulation as well as the generation of social or environmental impacts in addition to a financial return.

The fund invested, either directly or through derivatives, at least 80% of its portfolio in bond instruments issued by corporates, governments, supranationals or governmental agencies that are aimed at financing or re-financing projects with clear environmental benefits including, but not limited to, renewable energy, energy efficiency, pollution prevention, clean transportation, water management, circular economy, biodiversity conservation and green construction (so called “Green bonds”).

The fund may also invest in bond instruments issued to finance or re-finance (i) social projects that provide or promote, for example, affordable basic infrastructure, access to essential services, affordable housing and socioeconomic advancement and empowerment (so called “Social bonds”), or (ii) a combination of projects with clear environmental and social benefits (so called “Sustainability bonds”).

Impact investing:

- Percentage of the fund portfolio invested in Green, Social and Sustainability Bonds. The fund invested, either directly or through derivatives, at least 80% of its portfolio in bond instruments issued by corporates, governments, supranationals or governmental agencies that are aimed at financing or re-financing projects with clear environmental benefits including, but not limited to, renewable energy, energy efficiency, pollution prevention, clean transportation, water management, circular economy, biodiversity conservation and green construction (so called “Green bonds”). The fund may also have invested in bond instruments issued to finance or re-finance (i) social projects that provide or promote, for example, affordable basic infrastructure, access to essential services, affordable housing and socioeconomic advancement and empowerment (so called “Social bonds”), or (ii) a combination of projects with clear environmental and social benefits (so called “Sustainability bonds”).

Respect of social and labour standards:

– Absence of investments in companies in violation of the Principles of the United Nations Global Compact (so-called “UNGC Principles”), the Organisation for Economic Co-operation and Development’s Guidelines (so-called “OECD Guidelines”) for Multinational Enterprises, the Principles of the International Labour Organisation (so-called “ILO Principles”) and of the United Nations on business and human rights (so-called “UNGP Principles”), as assessed by the management company

Respect of human rights:

– Absence of investments in companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous).

In addition the Fund has not invested:

- with regards to investments, in corporate issuers in violation of exclusions for EU Paris-aligned Benchmarks pursuant to Article 12 of Delegated Regulation (EU) 2020/1818, specifically:

(i) companies involved in any activities related to controversial weapons;

(ii) companies involved in the cultivation and production of tobacco;

(iii) companies operating in sectors deemed to be in violation of the UNGC principles (United Nations Global Compact);

(iv) companies operating in sectors deemed to be in violation of the OECD Guidelines (Organisation for Economic Cooperation and Development);

(v) companies that derive 1% or more of their revenues from exploration, mining, extraction, distribution or refining of hard coal and lignite;

(vi) companies that derive 10% or more of their revenues from the exploration, extraction, distribution or refining of oil fuels;

(vii) companies that derive 50% or more of their revenues from the exploration, extraction, manufacturing or distribution of gaseous fuels; and

(viii) companies that derive 50% or more of their revenues from electricity generation with a GHG intensity of more than 100 g CO2 e/kWh.

- with regards to investments in securities issued by governments or governmental agencies, in countries with a greenhouse gas emissions (GHG) exceeding a specific tolerance threshold.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Exclusions relating to negative environmental externalities	The weight of issuers (i) with greenhouse gas intensity above a specific tolerance threshold of carbon dioxide (CO2) equivalent per million euro of revenue, except for those with a decarbonisation target (self-declared or approved by the Science Based Target Initiative) or have at least 5% of their revenues aligned with the technical criteria for eco-sustainable economic activities of the EU Taxonomy, (ii) belonging to sectors with a 'high climate impact' (identified according to the statistical classification of economic activities (known as 'NACE'), between A-H; L) with an energy consumption intensity higher than the respective sectoral tolerance threshold, with the exception of those that produce or consume renewable energy, or have a decarbonisation target (self-declared or approved by the Science Based Target Initiative) or have at least 5% of their revenues aligned with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy.	0.00%
Exclusions relating to negative social externalities	The weight of issuers in violation of the UNGC Principles, the OECD Guidelines, the UNGP Principles and the ILO Principles as assessed by the management company.	0.00%
"Sovereign Screening" exclusion	The weight of investments in countries with greenhouse gas emissions (GHG) exceeding 850 tonnes of "CO2 equivalents" per million euros of GDP, taking into account differences in purchasing power.	0.00%
Impact investing	Weight in the fund of the corporate bonds or government securities exclusively issued for financing climate- and environment-friendly projects such as renewable energy, energy efficiency, pollution	96.48%

	prevention, clean transportation, water management, circular economy, biodiversity conservation and green construction (green bonds or other similar instruments such as social bonds and sustainable bonds).	

…and compared to previous periods?

Not Applicable

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The fund selected sustainable investments that are either Green, Social or Sustainability Bonds that apply the Green Bond Principles (GBPs), Social Bond Principles (SBPs) and Sustainability Bond Guidelines defined by the International Capital Market Association (ICMA). In addition, for each investment, fund manager carried out a specific evaluation on the basis of both qualitative and quantitative analysis that looks both at the structure of the issuance and the issuer's profile. The quantitative analysis evaluates the "scope" ("use of proceeds") of the project to be financed and takes into account factors such as the project's technology and geographic location. The qualitative analysis, on the other hand, focuses on the issuer's organizational setup, on transparency and on company disclosures.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In this regards, the due diligence carried out by fund managers has taken into account the issuer's GHG emissions, trajectory and objective within its climate strategy, which projects the issuers intends to finance and whether they are related to the development of renewable energy or energy efficiency (aiming at improving energy consumption) and how the overall issuance and projects fit within the company's strategy. The waste cycle management component, or impact on biodiversity, is also evaluated if it is relevant to the respective corporate business plan. In addition, investments are in compliance with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Specifically, during pre-investment, Green bonds have been assessed via a mostly qualitative due-diligence process through the review the legal documentation and marketing material pertaining to the issuance. In details, such analysis comprises:

– the evaluation of the issuance based on the GBPs and looking at four core components: 1) the bond's use of proceed; 2) the issuer's process for project evaluation and selection; 3) management of the proceeds and 4) reporting, along with the quality of any available external review;

– the review of environmental goals declared and metrics used by the issuer;

– the issuer's embracement of targets aligned with the Paris Agreement;

– the classification of the bond based on a «greenness» scale (from "Dark green" to "Brown").

Post-investment, Green bonds have been assessed via a mostly quantitative due-diligence process through the analysis of impact reports published by the issuer and of the documentation provided by the issuer (such as non-financial statement and presentation) and/or calls with the issuer and/or information provided by external info providers (mainly MSCI Solutions and Bloomberg). The management company pays attention to allocation reports published by issuers on an annual basis to verify to which projects the money raised has actually been deployed (if a pool of projects has been disclosed at the time of issuance) and what impacts are measured and disclosed by the company. In details, such analysis comprises:

– the evaluation of the level of disclosure (material made available and quality of the information);

– the review of any environmental targets updated by the company;

– the assessment of punctual and period environmental metrics: such as the issuer's carbon intensity (CO2/ sales);

– the evaluation of the company's business transition strategy.

The due-diligence process directly and indirectly assessed many of the topics considered by the PAI indicators as indicated below.

Indicators applicable to investments in securities issued by corporate issuers:

– Greenhouse Gas (GHG) Emissions intensity of investee companies: intensity of the direct GHG emissions that occur from sources that are controlled or owned (i.e.: Scope 1) and of the indirect GHG emissions from the generation of purchased electricity consumed (i.e.: Scope 2) of each investee company per million euro of sales generated;

– Exposure to fossil fuel companies: investments in companies that generate revenues from mineral exploration and mining, or from any other extractive activities, from the production, processing, refinement, distribution (including the transportation), the storage and trading of fossil fuels;

– Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises;

– Share of consumption of non-renewable energy: consumption by the investee companies of energy from non-renewable sources compared to renewable sources (such as for example, hydropower, wind, solar or geothermal energy,…) expressed as a percentage of the total energy of any sources used;

– Share of production of non-renewable energy: production by the investee companies of energy from non-renewable sources compared to renewable sources (such as for example, hydropower, wind, solar or geothermal energy,…) expressed as a percentage of the total energy of any sources produced;

– Exposure to controversial weapons: investments in companies involved in the manufacture or in the sale of unconventional weapons (including, in particular, Land-mines, Cluster bombs, Biological weapons and Chemical weapons).

Indicators applicable to investments in securities issued by sovereigns, supranational and governmental agencies:

– Greenhouse Gas (GHG) Emissions intensity: intensity of the direct GHG emissions (i.e.: Scope 1) that occur from the economic activities and of the indirect GHG emissions from electricity generated elsewher (i.e.: Scope 2) of each country per million euro of gross domestic product (GDP);

– Investee countries subject to social violations: presence of social violations in each country referring to international treaties, UN principles or local regulations.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The fund applied exclusions to companies in violation of the Principles of the United Nations Global Compact (so called “UNGC Principles”), the Organisation for Economic Co-operation and Development’s Guidelines (so called “OECD Guidelines”) for Multinational Enterprises, the Principles of the International Labour Organisation (so called “ILO Principles”) and of the United Nations on business and human rights (so-called “UNGP Principles”), as assessed by the management company.

The management company’s internal methodology takes into account adverse impacts on sustainability factors through the definition of specific tolerance thresholds for each indicator, including the violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

In particular, issuers with “very severe” controversies (equivalent to a Controversy Score of 0, on a scale from 0 to 10, where 10 indicates that a company is not involved in any major controversies) related to the violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by MSCI Solutions, do not qualify as “sustainable”.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the “principal adverse impacts” (or “Principal Adverse Impact Indicators”, “PAI”) of investment decisions on sustainability factors, together with the definition of the related mitigation actions, are an integral part of Eurizon’s approach to sustainability.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called Principal Adverse Impact Indicators are taken into consideration within the managed portfolios, pursuant to Article 7 of the SFDR Regulation.

The framework provides for the use of specific indicators, as set out in Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of each financial product, based on the safeguards already established by the Company, which include the use of:

– Negative screening, for the purposes of (i) integrating sustainability risks within the Investment Process of the managed portfolios and (ii) introducing additional restrictions to the investable universe, depending on the sustainability ambition of the products. In this regard, the Company has defined specific limitations (exclusions or restrictions) applicable to certain corporate and/or government issuers, with the aim of avoiding investments in financial instruments more exposed to the risk of value loss due to environmental, social or governance related events or conditions.

With respect to corporate issuers, the Company applies restrictions based on involvement in sectors considered “non responsible” and/or conduct that may result in significant negative environmental and/or social impacts, including:

(i) companies deriving their revenues, beyond the applicable tolerance thresholds, from extraction activities or electricity generation linked to thermal coal or from oil sands exploitation; (ii) companies with clear direct involvement in the manufacturing of unconventional weapons; (iii) companies deemed to be in violation of globally accepted principles, namely the United Nations Global Compact, the OECD Guidelines, as well as ILO and UNGP principles; (iv) companies presenting material environmental, social and/or governance concerns, i.e., characterised by a “critical” ESG profile based on the rating assigned by MSCI Solutions; (v) companies with a greenhouse gas intensity (expressed in tonnes of CO equivalent per million euro of revenues) above the tolerance threshold, except for those with a decarbonisation target (self declared or approved by the Science Based Target Initiative) or with at least 5% of revenues aligned with the technical screening criteria for environmentally sustainable economic activities under the EU Taxonomy; (vi) companies operating in “high impact” climate sectors (identified according to the NACE statistical classification, between A and H or equal to L) with an energy consumption intensity above the respective sectoral tolerance thresholds, except for those producing or consuming renewable energy, or having a decarbonisation target (self declared or SBTi approved), or with at least 5% of revenues aligned with the EU Taxonomy technical screening criteria.

With respect to government issuers and agencies, the Company applies restrictions based on (i) the greenhouse gas (“GHG”) emission levels of the respective national economies, covering scopes 1, 2 and 3, weighted relative to GDP and adjusted for purchasing power parity, and (ii) the inclusion of the country in the “high risk” list (“black list”) of the Financial Action Task Force (FATF), due to deficiencies in anti money laundering, counter terrorism financing and anti proliferation controls.

– Positive screening of ESG factors in the analysis, selection and construction of financial portfolios, in line with good governance practices. This category includes products that promote, among others, environmental or social characteristics, or a combination thereof, or that pursue sustainable investment objectives pursuant to Articles 8 and 9 of

the SFDR Regulation. These products aim to build portfolios characterised by: (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return.

– “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

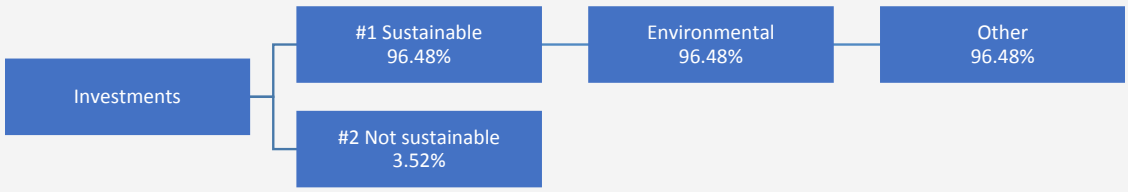
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Share of consumption of non-renewable energy
- Share of production of non-renewable energy
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Investee countries subject to social violations
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: October 2025 - December 2025

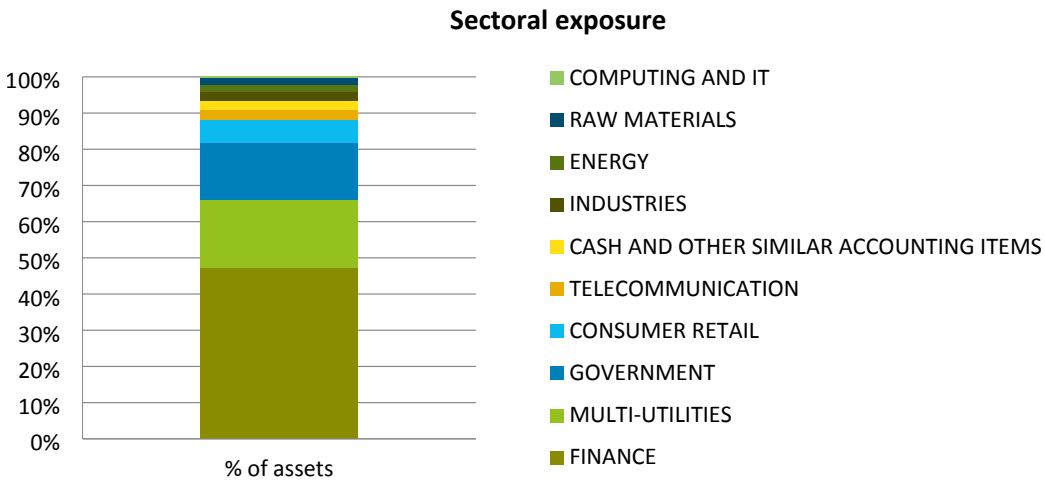
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

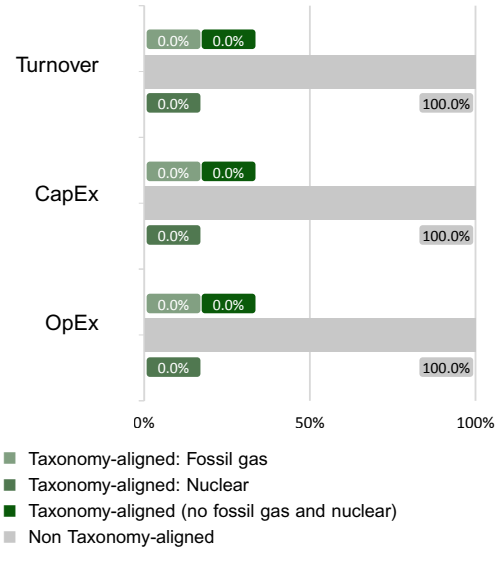
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

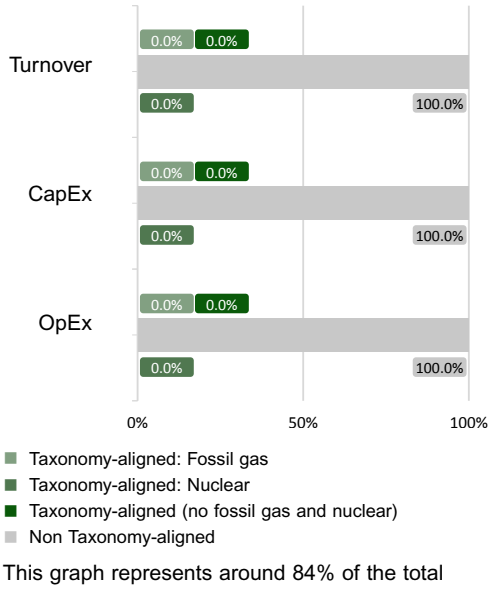
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In fossil gas

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 84% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: : 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 96.48% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

The fund did not make socially sustainable investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Not sustainable": (i) any other assets according to the fund's investment policy, (ii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets, (iii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure according to its investment policy and its sustainable investment objective; (iv) instruments and techniques only used for efficient fund management as detailed in the fund's prospectus.

However "#2 Not sustainable” investments do not prevent the attainment of the sustainable investment objective. Given the nature of these investments, minimum environmental or social safeguards are not applicable.

What actions have been taken to attain the sustainable investment objective during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of the sustainable investment objective is ensured through specific investment limits.

How did this financial product perform compared to the reference sustainable benchmark?

The specific index designated as a reference benchmark to meet the sustainable investment objective of the fund is the following: 100% Bloomberg Global Aggregate Green Bond 0-5 Year Hedged Euro Index

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective

How did the reference benchmark differ from a broad market index?

The benchmark differs from a broad general market index in that the latter does not take into account in its methodology any criteria for eligibility and inclusion of Green Bonds. The Bloomberg Global Aggregate Green Bond 0-5 Index Hedged EUR offers investors an objective and robust measure of the global market for fixed income securities issued to fund projects with direct environmental benefits.

The Index includes bonds from the flagship index which are classified as Green bonds (as well as adhering to the Green Bond Principles and Guidelines) by the Bloomberg Sustainable Finance Solutions Group (“SFS”). Green bonds are bonds whose net proceeds will be entirely designated for market-accepted green activities based on the classification by Bloomberg SFS.

The Index includes Corporate, Government, Treasury, Treasury & government-related bonds. Securities must be rated investment grade. The Index include bonds with maturities 0-5 years. The Index does not have the minimum 1 year maturity constraint and will hold bonds until final maturity.

The index follows the same criteria as the flagship Bloomberg Global Aggregate Index, without the minimum 1 year maturity constraint.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (***https://assets.bbhub.io/professional/sites/27/Bloomberg-Global-Agg-GSS-Methodology.pdf***).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Sustainability indicators performance with reference to the product:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

"Sovereign Screening" exclusion: 0.00%

Exclusions relating to negative environmental externalities: 0.00%

Exclusions relating to negative social externalities: 0.00%

Impact investing: 96.48%

How did this financial product perform compared with the reference benchmark?

Sustainability indicators performance with reference to the benchmark:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

"Sovereign Screening" exclusion: 0.00%

Exclusions relating to negative environmental externalities: 0.00%

Exclusions relating to negative social externalities: 0.00%

Impact investing: 90.08%

How did this financial product perform compared with the broad market index?

Sustainability indicators performance with reference to the broad market index:

Sector exclusion: 0.01%

Issuer exclusion: 0.08%

"Sovereign Screening" exclusion: 0.00%

Exclusions relating to negative environmental externalities: 0.00%

Exclusions relating to negative social externalities: 0.00%

Impact investing: 3.28%

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Inflation Linked

Legal entity identifier: 549300EEAY5G5AB99Z67

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **2.73%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 6.63 Benchmark: 6.59

	The ESG score is calculated on a scale of 0 to 10.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of ‘do not significant harm’ (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

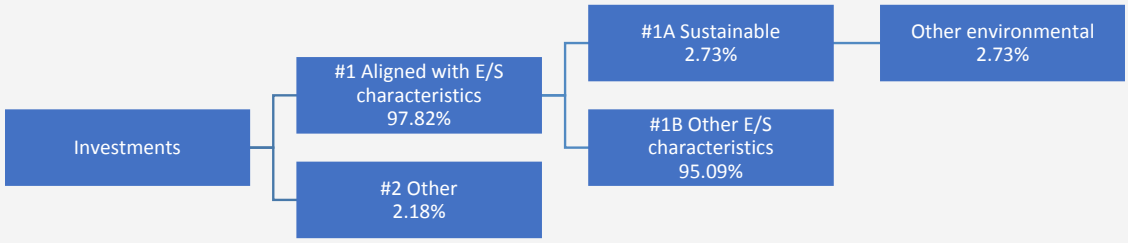
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

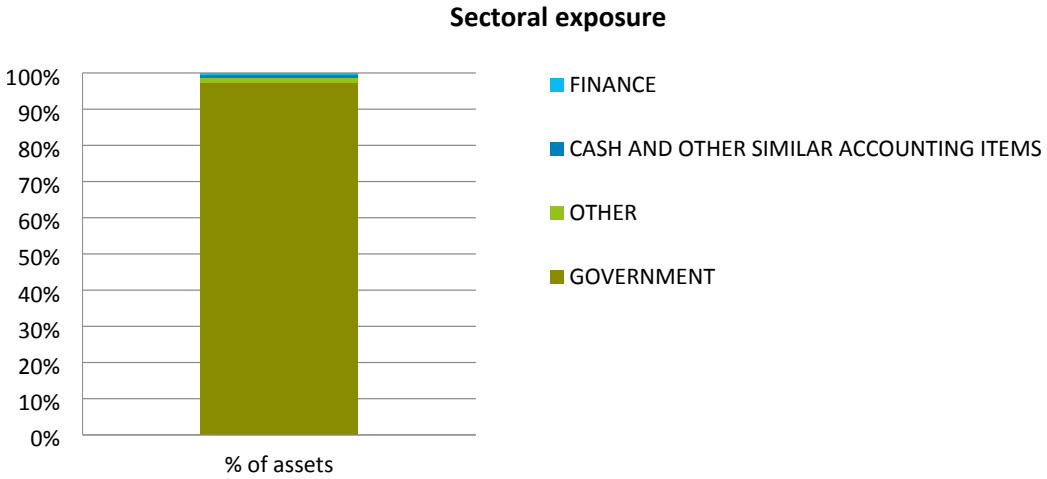
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

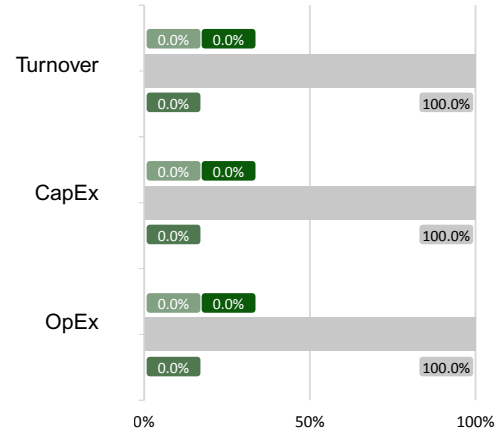
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

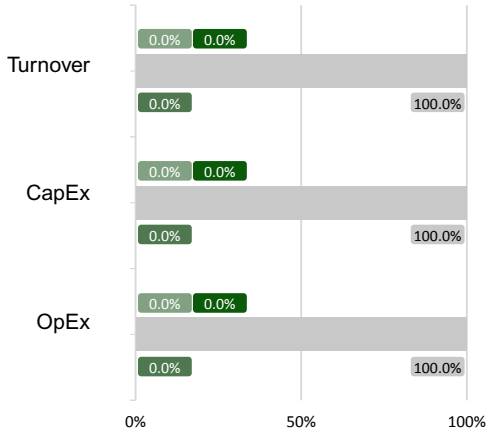
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 3% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 2.73% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics but did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Corporate EUR Short Term

Legal entity identifier: 549300GXZQ1AUR953E73

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **70.40%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.36 Benchmark: 7.26

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of ‘do not significant harm’ (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

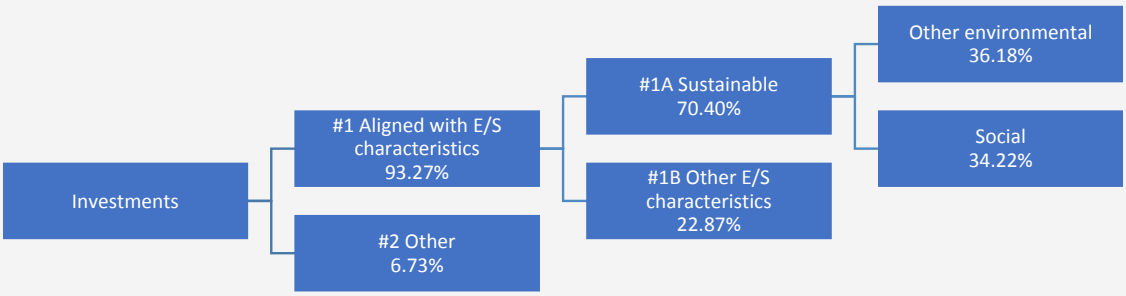
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

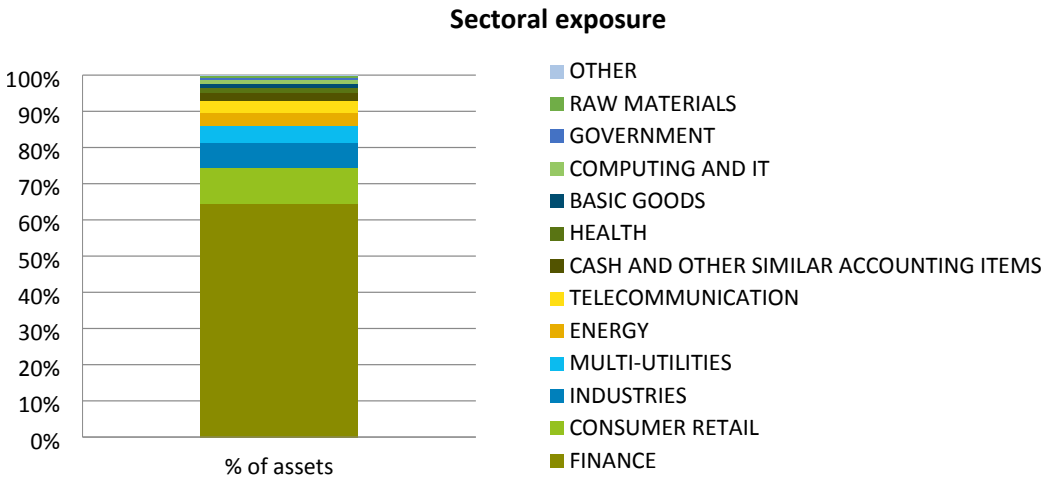
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

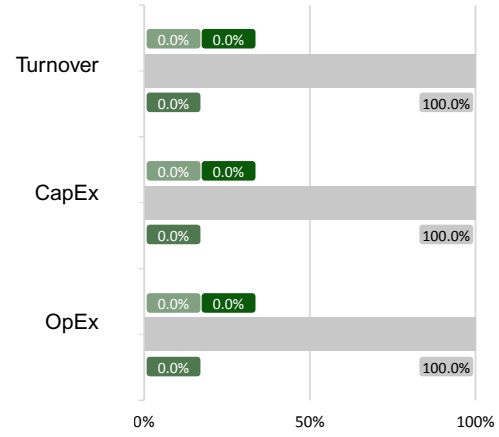
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

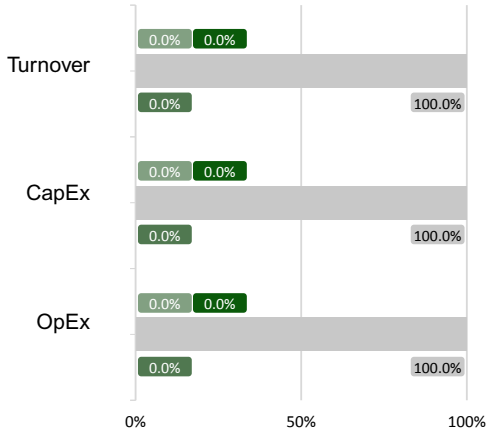
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 99% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 36.18% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 34.22% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Corporate EUR

Legal entity identifier: 5493008XGFSGYJTP7781

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **74.73%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 7.60 Benchmark: 7.29

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

rights, anti-corruption and anti-bribery matters.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

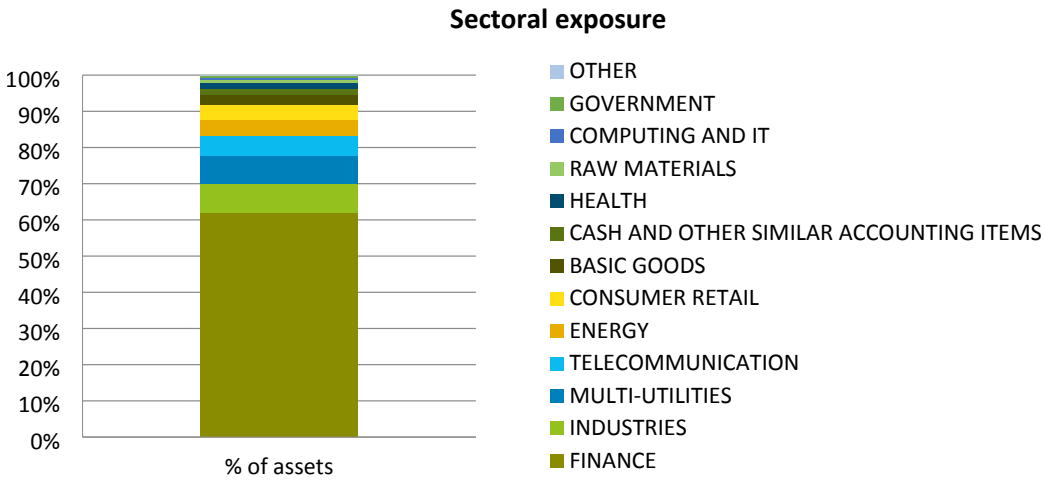
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

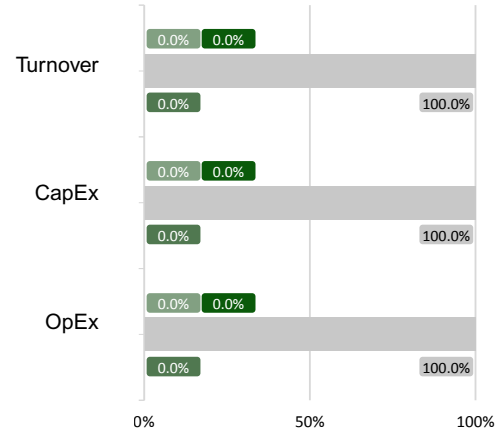
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

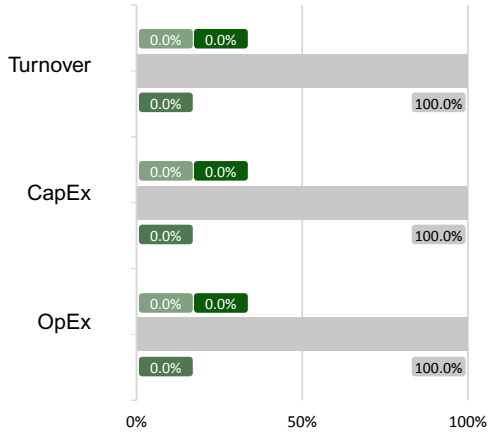
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ **Yes**	●○ ☐ **No**
☑ It made **sustainable investments with an environmental objective**: 98.96%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___**%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☑ It made **sustainable investments with a social objective**: 0.37%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The management company has adopted a sustainable investment selection methodology based on the 17 Sustainable Development Goals (so called "Sustainable Development Goals" or "SDGs") promoted by the United Nations. This methodology, in accordance with good governance practices, aims to proposes to select securities issued by companies whose products/services and processes contribute to one or more of the SDGs, provided that said investments do not cause any significant harm to any of the environmental or social objectives set forth in Regulation (EU) 2019/2088.

In addition, the management company considers as sustainable investments, financial instruments of a bond/monetary nature aimed at financing projects that are environmentally friendly and have a positive social impact (green/sustainable bonds).

Therefore, during the reporting period, the management company monitored investments that are sustainable in accordance with Regulation (EU) 2019/2088 and investments in bond issues whose proceeds are intended to finance environmental and/or social projects.

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

Impact Investing: the fund adopts investment selection methodologies aimed at generating a social or environmental impact along with a measurable financial return.

Sustainable investment objective of this fund is attained by investing more than 80% in corporate or government bonds issued to finance climate and environmentally friendly projects such as renewable energy, energy efficiency, pollution prevention, clean transport, water management, circular economy, biodiversity conservation and green construction (green bonds).

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Impact investing	Weight in the fund of the corporate bonds or government securities exclusively issued for financing climate- and environment-friendly projects such as renewable energy, energy efficiency, pollution prevention, clean transportation, water management, circular economy, biodiversity conservation and green construction (green bonds or other similar instruments such as social bonds and sustainable bonds).	98.85%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%	0.00%
Impact investing	Weight in the fund of the corporate bonds or government securities exclusively issued for financing climate- and environment-friendly projects such as renewable energy, energy efficiency, pollution prevention, clean transportation, water management, circular economy, biodiversity conservation and green construction (green bonds or other similar instruments such as social bonds and sustainable bonds).	97.93%	98.48%	97.92%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

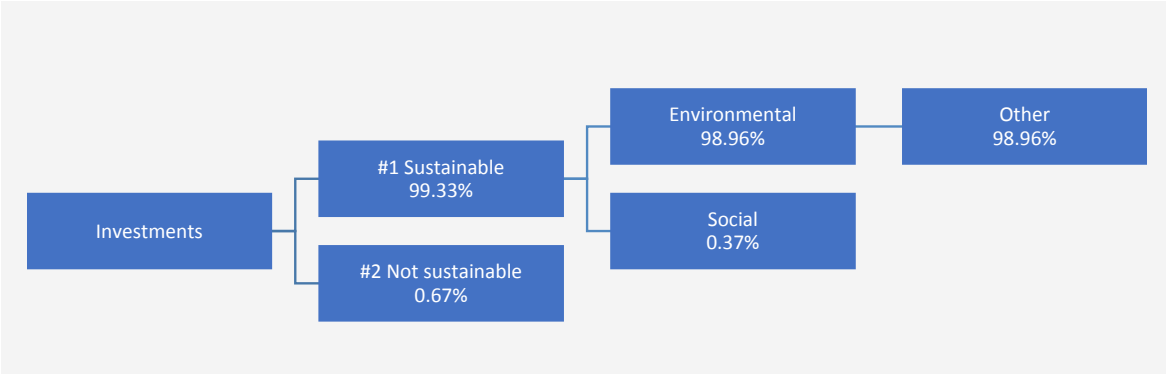
For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the Fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Share of consumption of non-renewable energy
- Share of production of non-renewable energy
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Investee countries subject to social violations

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025



Largest Investments	Sector	% Assets	Country

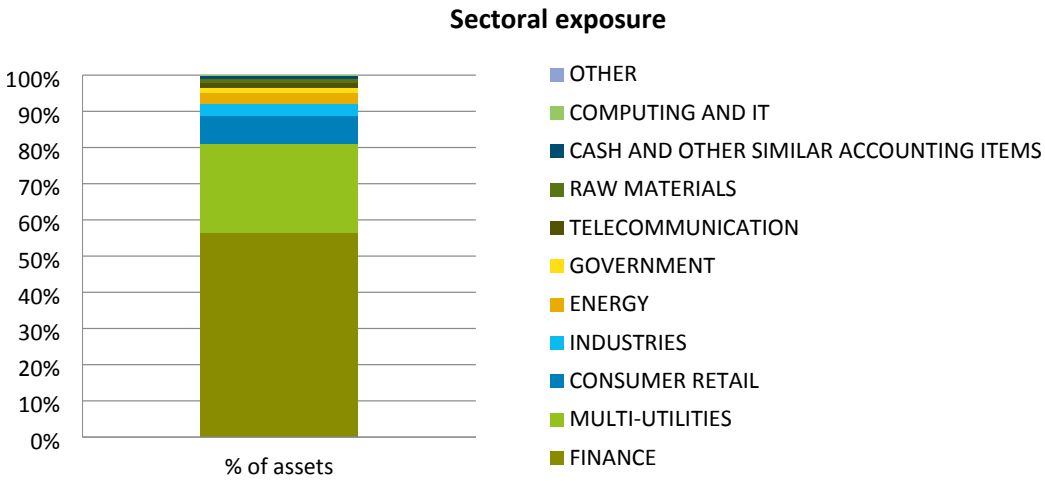
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

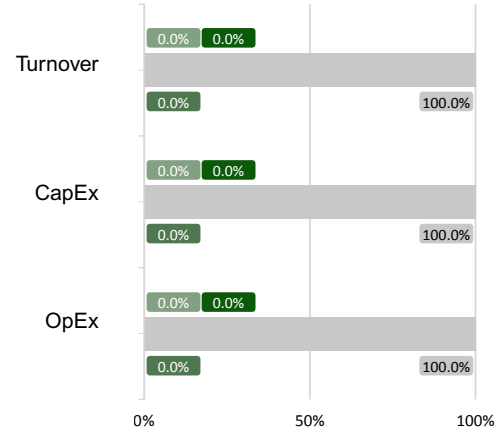
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

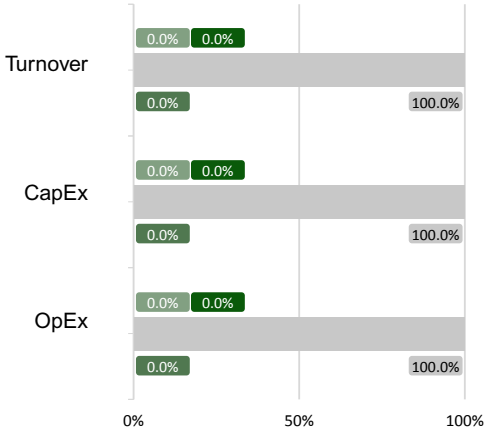
☐ Yes:

☐ In fossil gas ☐ In fossil gas



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 99% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: : 0.00%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 98.96% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

The fund had a socially sustainable investment share of 0.37% of total investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Not sustainable": (i) any other assets according to the fund's investment policy, (ii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets, (iii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure according to its investment policy and its sustainable investment objective; (iv) instruments and techniques only used for efficient fund management as detailed in the fund's prospectus.

However "#2 Not sustainable” investments do not prevent the attainment of the sustainable investment objective. Given the nature of these investments, minimum environmental or social safeguards are not applicable

What actions have been taken to attain the sustainable investment objective during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of the sustainable investment objective is ensured through specific investment limits.

How did this financial product perform compared to the reference sustainable benchmark?

The specific index designated as a reference benchmark to meet the sustainable investment objective of the fund is the following: 100% Bloomberg MSCI Euro Corporate Green Bond 5% Capped Index

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective

How did the reference benchmark differ from a broad market index?

The Bloomberg MSCI Euro Corporate Green Bond 5% Capped Index is based on Bloomberg Euro Corporate Aggregate Index and it is designed for investors who are looking to generate positive social impact through their investments.

The index includes green bonds that are fixed-income securities in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds. Use of proceeds and project bonds are considered eligible if the use of proceeds falls within at least one of seven eligible environmental categories defined by MSCI ESG Research (alternative energy, energy efficiency, pollution prevention and control, sustainable water, green building, climate adaption, and other).

The index offer investors an objective and robust measure of the market for fixed income securities issued to fund projects with direct environmental benefits.

For more information regarding the methodology used to calculate the designated index, please refer to the methodology described on the index provider's website (***https://www.msci.com/our-solutions/indexes/bloomberg-msci-esg-fixed-income-indexes***).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Sustainability indicators performance with reference to the product:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

Impact investing: 98.85%

How did this financial product perform compared with the reference benchmark?

Sustainability indicators performance with reference to the benchmark:

Sector exclusion: 0.00%

Issuer exclusion: 0.00%

Impact investing: 99.26%

How did this financial product perform compared with the broad market index?

Sustainability indicators performance with reference to the broad market index:
Sector exclusion: 0.00%
Issuer exclusion: 0.00%
Impact investing: 14.33%

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Aggregate EUR Short Term

Legal entity identifier: 54930067LEBURNSDNL83

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **32.93%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.18 Benchmark: 7.08

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of ‘do not significant harm’ (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

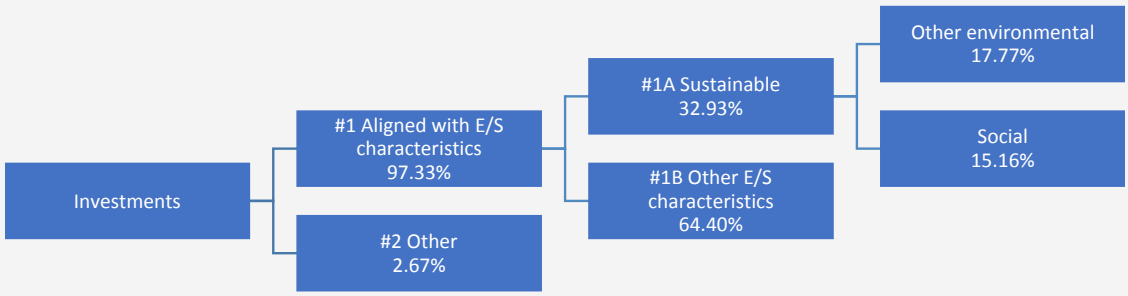
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

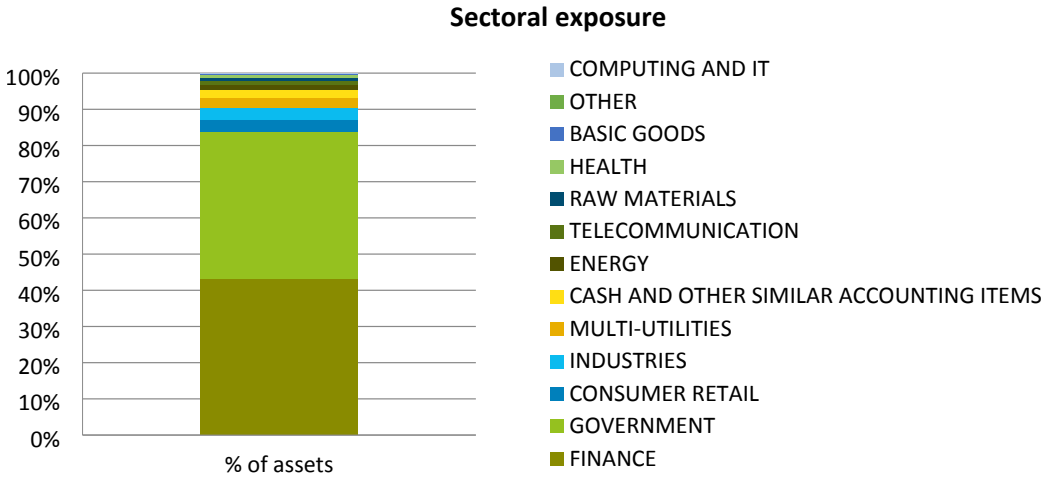
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

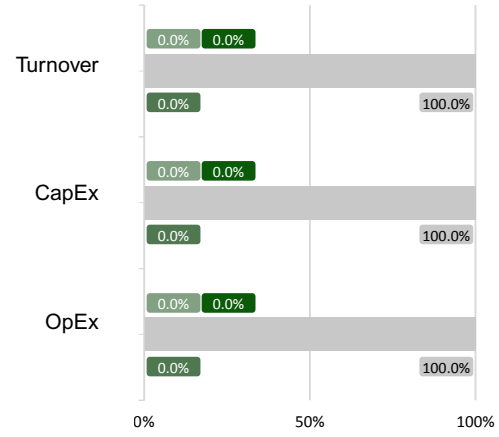
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

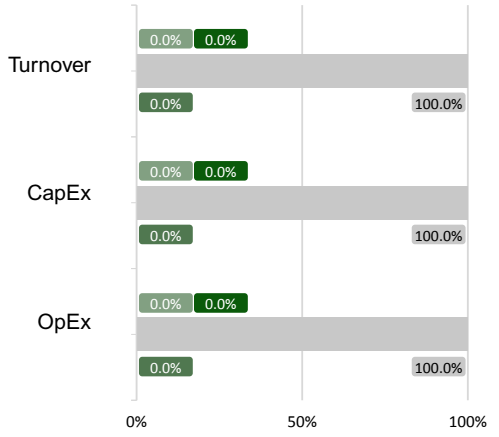
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 59% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 17.77% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 15.16% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Aggregate EUR

Legal entity identifier: 549300YLU5Z1JQP8CC18

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **45.23%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 7.22 Benchmark: 7.03

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

rights, anti-corruption and anti-bribery matters.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

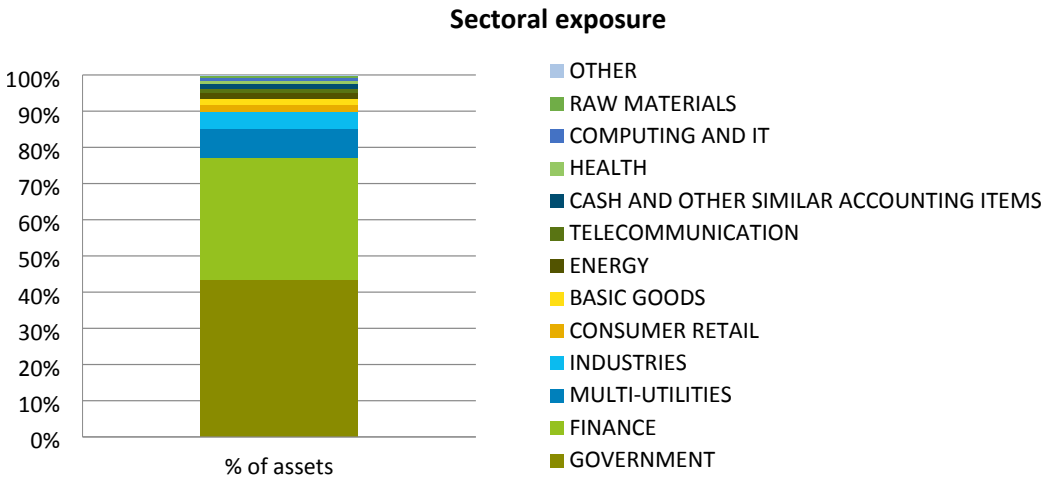
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

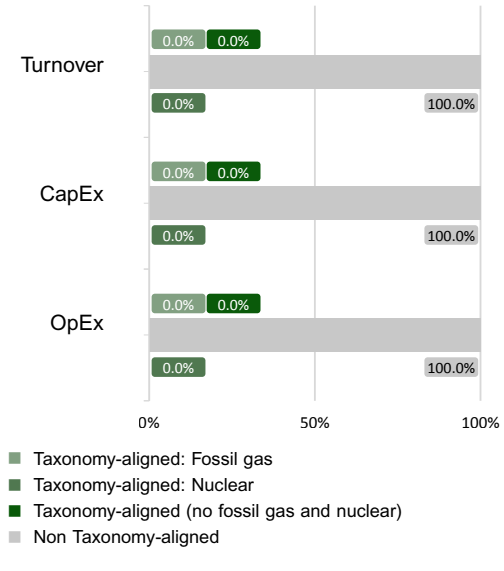
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

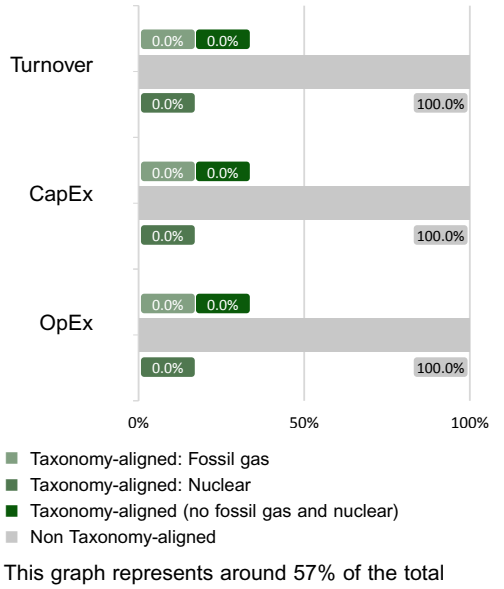
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 57% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 29.92% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 15.31% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Euro Bond Short Term

Legal entity identifier: 391200FQKDZ5KVR44C32

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **0.32%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund has promoted the limitation of greenhouse gas emissions and social violations by investing primarily in financial instruments of government, supranational or agency issuers that have successfully passed a specific selection process aimed at verifying the integration of ESG factors (so-called “Sovereign Integration”).

The main sustainability indicators used to measure the attainment of each of the environmental and/or social characteristics promoted by the fund are reported below:

Limitation of greenhouse gases emissions:

– With regards to investments in securities issued by governments or governmental agencies, absence of investments in countries with a greenhouse gas emissions (GHG) exceeding a specific tolerance threshold.

Limitation of social violations:

– Limitation of investment in government or agency securities issued by countries with social violations pursuant to international treaties and conventions, United Nations principles and, where applicable, national legislation.

For further information on the Sovereign Integration and on the specific tolerance thresholds applied please refer to the Summary of the Sustainability Policy of the management company available at ***https://www.eurizoncapital.com/en/sustainability/sustainability-policy***

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Exclusions relating to negative environmental externalities	The weight of issuers (i) with greenhouse gas intensity above a specific tolerance threshold of carbon dioxide (CO2) equivalent per million euro of revenue, except for those with a decarbonisation target (self-declared or approved by the Science Based Target Initiative) or have at least 5% of their revenues aligned with the technical criteria for eco-sustainable economic activities of the EU Taxonomy, (ii) belonging to sectors with a 'high climate impact' (identified according to the statistical classification of economic activities (known as 'NACE'), between A-H; L) with an energy consumption intensity higher than the respective sectoral tolerance threshold, with the exception of those that produce or consume renewable energy, or have a decarbonisation target (self-declared or approved by the Science Based Target Initiative) or have at least 5% of their revenues aligned with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy.	0.00%
Exclusions relating to negative social externalities	The weight of issuers in violation of the UNGC Principles, the OECD Guidelines, the UNGP Principles and the ILO Principles as assessed by the management company.	0.00%
"Sovereign Screening" exclusion	The weight of investments in countries with greenhouse gas emissions (GHG) exceeding 850 tonnes of "CO2 equivalents" per million euros of GDP, taking into account differences in purchasing power.	0.00%
Sovereign ESG Integration (new approach)	Percentage of assets invested in government issuers that have successfully passed a specific selection process focusing on: i) the progress of each country with respect to the Sustainable Development Goals promoted by the United Nations with the aim of promoting a more conscious and sustainable global development; (ii) the negative externalities potentially generated by each country towards third parties; (iii) the country's carbon footprint in relation to its respective GDP, taking into account the different purchasing power; (iv) the information related to social violations, by each country, pursuant to international treaties and conventions, United Nations principles, and, where applicable, national legislation, consistent with the mandatory adverse impact indicators set forth in Regulation (EU) 2019/2088 for government issuers; (v) the country's inclusion on the list of fiscally uncooperative jurisdictions; (vi) the country's inclusion on the FATF's lists of high-risk countries (so-called "black list") or subject to intensive monitoring (so-called "grey list") due to shortcomings in systems for combating money laundering, terrorist financing and proliferation of weapons of mass destruction; (vii) the score expressed by the "Corruption Perception Index", which assesses the perceived degree of public sector corruption in each country. This selection process allows to classify countries (and their governmental agencies) in no. 3 classes suitable for investment, depending on the relative quality of the safeguards, namely: - "Achieving countries"; - "Improving countries"; - "Conservative countries"; The fund does not invest in securities issued by governments or governmental agencies from countries with a greenhouse gas emissions (GHG) exceeding 850 tonnes of "CO2 equivalents" per million euros of GDP, taking into account differences in purchasing power, or from countries belonging to the so-called FATF "black list".	Countries: - Achieving 96.76% - Improving 0.00% - Conservative 0.00%

…and compared to previous periods?

Not Applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments using data made available by MSCI Solutions, pursuant to which the positive contribution to an environmental and/or social objective for a corporate issuer is assessed as follows:

– the degree to which the issuer's products and services or operations are aligned with the Sustainable Development Goals promoted by the United Nations (SDGs); or

– the alignment of the issuer's revenues and/or capital expenditures ("capex") with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy; or

– the issuer has set decarbonization targets consistent with limiting global temperature rise to 1.5°C, validated by the "Science Based Target Initiative" (so-called "SBTi"),

provided that such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and the companies benefiting from such investments comply with good governance practices.

In addition, the management company considers as sustainable investments bond instruments intended to finance projects that, among other objectives, aim at contrasting global warming and/or to promote social progress ("green bonds", "social bonds", "sustainability bonds") and issued in compliance with the Green Bond Principles, the Social Bond Principles or the Sustainability Bond Guidelines, as defined by the International Capital Market Association (ICMA) and the European framework known as the Green Bond Standard.

The fund does not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund might invest in activities that may be considered as environmentally sustainable according to its investment policy, but such investments are not per se decisive to the attainment of the fund's environmental objectives.

Alignment of an issuer's products and services or operations with the Sustainable Development Goals (SDGs):

The Sustainable Development Goals aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: combating poverty and hunger; the right to health, work and education; gender equality and reduction of inequalities; access to water and energy; urbanization and promotion of resilient infrastructure; combating climate change; and environmental protection including preservation of marine and terrestrial ecosystems.

The management company's internal methodology aims to select issuers, through a "positive"/"negative" evaluation, whose activities contribute to one or more of the 17 SDGs (i.e., issuers with at least one SDG with a score equal to or above 2) without any misalignment (i.e., with a score equal to or below -2) to any of the 17 SDG. For each SDG, based on data made available by MSCI Solutions, the following are estimated:

– The degree of alignment of an issuer's products and services, taking into account the revenues and the potential adverse impacts (so-called "Product Alignment")

– The degree of alignment of an issuer's operations (including internal policies, objectives and practices implemented and potential adverse impacts) (so-called "Operational Alignment").

The degree of alignment of the issuer is expressed on a net base, i.e. it takes into account the positive/negative contribution and it is expressed on a scale from -10 "Strongly Misaligned" to +10 "Strongly Aligned". Issuers with scores:

– equal to or less than -2 have "Misaligned" activities in relation to the individual SDG;

– equal to or higher than 2 present "Aligned" activities in relation to the individual SDG;

– between -2 (excluded) and 2 (excluded) have "Neutral" activities for the individual SDG.

Alignment of an issuer's revenues and/or capital expenditures with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy:

For the purpose of assessing positive contribution to environmental objectives, the management company's internal methodology considers whether an issuer's revenues and/or capex are aligned with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy Regulation, at least to the following degree:

– 20% of turnover; or

– 5% of turnover and 50% of capital expenditures ("capex").

Issuers with decarbonization targets validated by the "Science Based Target Initiative":

The management company's internal methodology considers an issuer to contribute positively to an environmental objective where it has defined science-based net-zero targets consistent with limiting global temperature rise to 1.5° C and these are validated by SBTi.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology adopted by the management company for the selection of sustainable investments, for the purpose of verifying compliance with the principle of not causing significant harm, considered all the main mandatory adverse impact indicators listed in Table 1 of Annex I to Regulation (EU) 2022/1288, applying specific quantitative tolerance thresholds for each indicator, as detailed on the management company website ***https://www.eurizoncapital.com/en/sustainability/sustainability-policy***.

The principle of do not cause significant harm is also assessed taking into account additional safeguards considerations which would prevent an issuer to be considered as "sustainable investment" when:

– its products and services or operations are misaligned to the SDGs, assessed on the basis of selected quantitative and qualitative metrics, including the exposure to controversies;

– it has the lowest ESG rating ("CCC") assigned by MSCI Solutions;

– it is involved in the cultivation and production of tobacco;

– it lacks a minimum set of disclosure, in particular with regards to its GHG emissions and social matters (unadjusted gender pay gap or diversity in its Board).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

  The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

  The methodology adopted by the management company for the selection of sustainable investments, for the purpose of verifying compliance with the principle of not causing significant harm, considered all the main mandatory adverse impact indicators listed in Table 1 of Annex I to Regulation (EU) 2022/1288, applying specific quantitative tolerance thresholds for each indicator, as detailed on the management company website ***https://www.eurizoncapital.com/en/sustainability/sustainability-policy***.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

  The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

  The management company's internal methodology takes into account adverse impacts on sustainability factors through the definition of specific tolerance thresholds for each indicator, including the violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

  In particular, issuers with "very severe" controversies (equivalent to a Controversy Score of 0, on a scale from 0 to 10, where 10 indicates that a company is not involved in any major controversies) related to the violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by MSCI Solutions, do not qualify as "sustainable".

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the "principal adverse impacts" (or "Principal Adverse Impact Indicators", "PAI") of investment decisions on sustainability factors, together with the definition of the related mitigation actions, are an integral part of Eurizon's approach to sustainability.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called Principal Adverse Impact Indicators are taken into consideration within the managed portfolios, pursuant to Article 7 of the SFDR Regulation.

The framework provides for the use of specific indicators, as set out in Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of each financial product, based on the safeguards already established by the Company, which include the use of:

– Negative screening, for the purposes of (i) integrating sustainability risks within the Investment Process of the managed portfolios and (ii) introducing additional restrictions to the investable universe, depending on the sustainability ambition of the products. In this regard, the Company has defined specific limitations (exclusions or restrictions) applicable to certain corporate and/or government issuers, with the aim of avoiding investments in financial instruments more exposed to the risk of value loss due to environmental, social or governance related events or conditions.

With respect to corporate issuers, the Company applies restrictions based on involvement in sectors considered “non responsible” and/or conduct that may result in significant negative environmental and/or social impacts, including:

(i) companies deriving their revenues, beyond the applicable tolerance thresholds, from extraction activities or electricity generation linked to thermal coal or from oil sands exploitation; (ii) companies with clear direct involvement in the manufacturing of unconventional weapons; (iii) companies deemed to be in violation of globally accepted principles, namely the United Nations Global Compact, the OECD Guidelines, as well as ILO and UNGP principles; (iv) companies presenting material environmental, social and/or governance concerns, i.e., characterised by a “critical” ESG profile based on the rating assigned by MSCI Solutions; (v) companies with a greenhouse gas intensity (expressed in tonnes of CO equivalent per million euro of revenues) above the tolerance threshold, except for those with a decarbonisation target (self declared or approved by the Science Based Target Initiative) or with at least 5% of revenues aligned with the technical screening criteria for environmentally sustainable economic activities under the EU Taxonomy; (vi) companies operating in “high impact” climate sectors (identified according to the NACE statistical classification, between A and H or equal to L) with an energy consumption intensity above the respective sectoral tolerance thresholds, except for those producing or consuming renewable energy, or having a decarbonisation target (self declared or SBTi approved), or with at least 5% of revenues aligned with the EU Taxonomy technical screening criteria.

With respect to government issuers and agencies, the Company applies restrictions based on (i) the greenhouse gas (“GHG”) emission levels of the respective national economies, covering scopes 1, 2 and 3, weighted relative to GDP and adjusted for purchasing power parity, and (ii) the inclusion of the country in the “high risk” list (“black list”) of the Financial Action Task Force (FATF), due to deficiencies in anti money laundering, counter terrorism financing and anti proliferation controls.

– Positive screening of ESG factors in the analysis, selection and construction of financial portfolios, in line with good governance practices. This category includes products that promote, among others, environmental or social characteristics, or a combination thereof, or that pursue sustainable investment objectives pursuant to Articles 8 and 9 of the SFDR Regulation. These products aim to build portfolios characterised by: (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return.

– “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

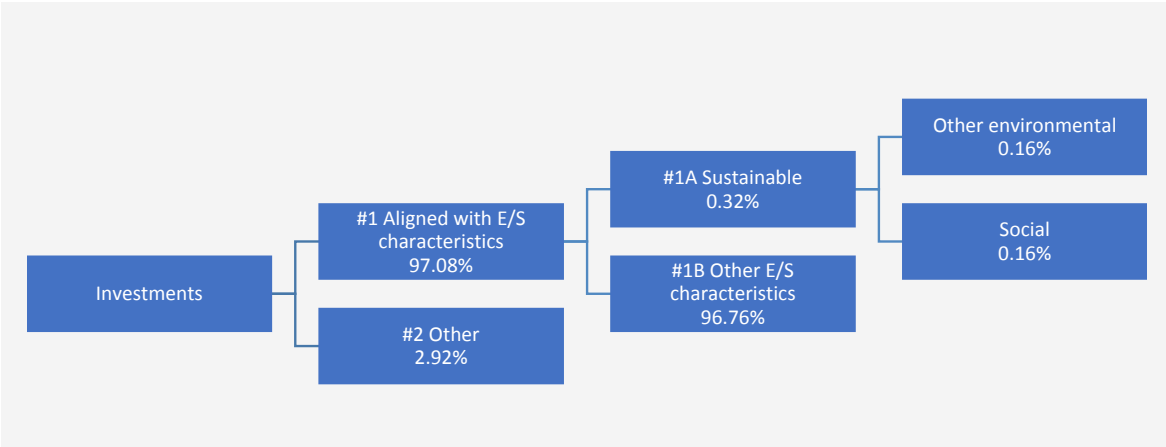
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the Fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Greenhouse Gas (GHG) Emissions intensity
- Investee countries subject to social violations

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: December 2025

Largest Investments	Sector	% Assets	Country
BUONI POLIENNALI DEL TES SR UNSECURED REGS 09/26 3.85	GOVERNMENT	7.96	Italy

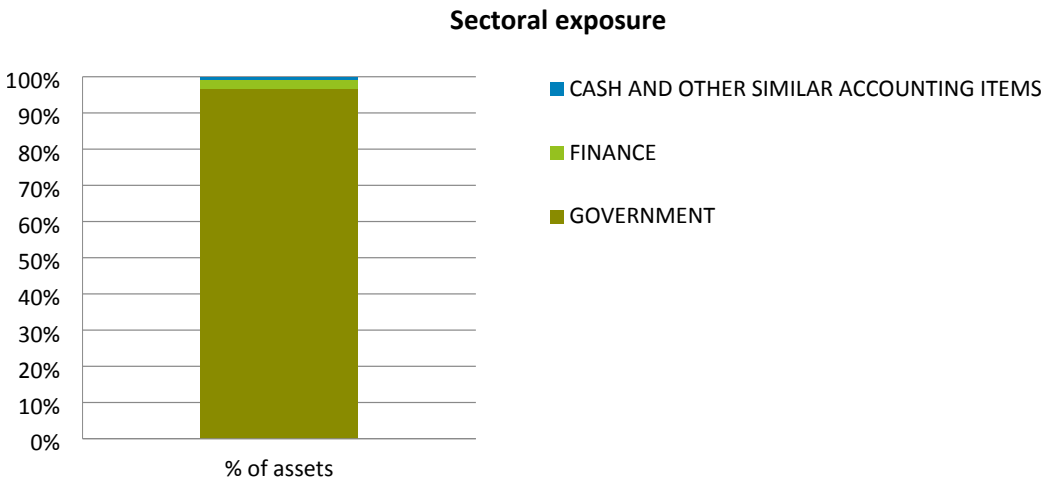
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

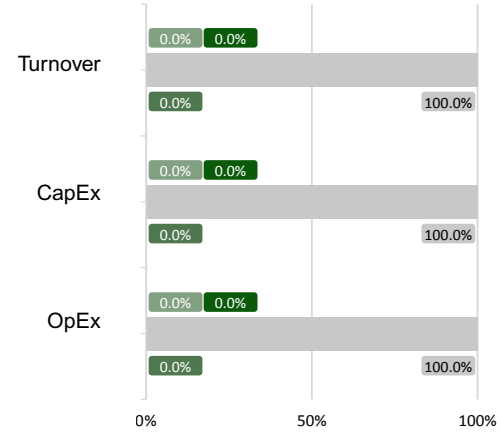
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

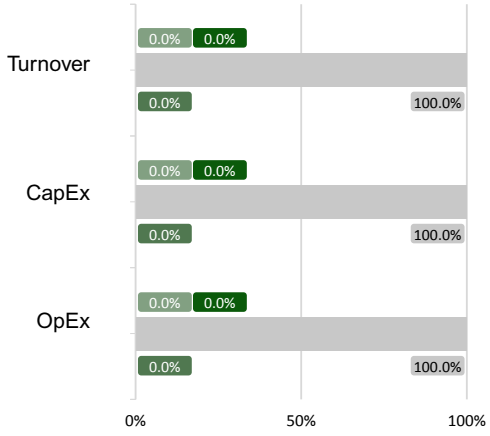
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 3% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 0.16% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.16% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Included in “#2 Others” are (i) liquidity held; (ii) derivative instruments other than those referring to corporate issuers promoting environmental and/or social characteristics or that are considered sustainable; and (iii) any instruments used for efficient portfolio management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - European Union Bonds

Legal entity identifier: 549300366AJ31ILIC151

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **27.10%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 6.91 Benchmark: 6.90

	The ESG score is calculated on a scale of 0 to 10.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

rights, anti-corruption and anti-bribery matters.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

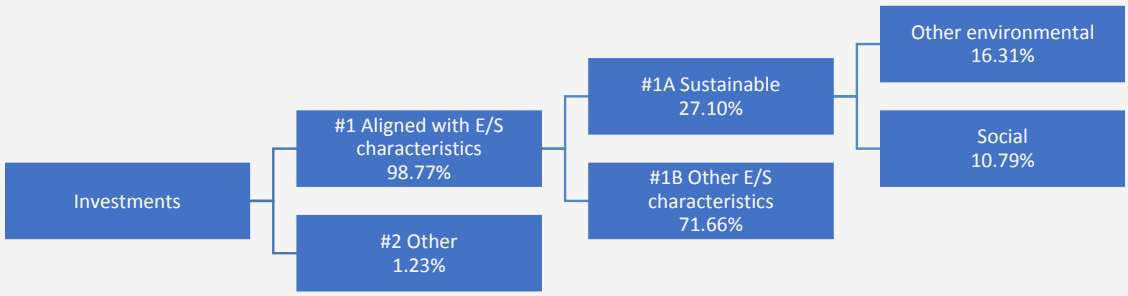
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country

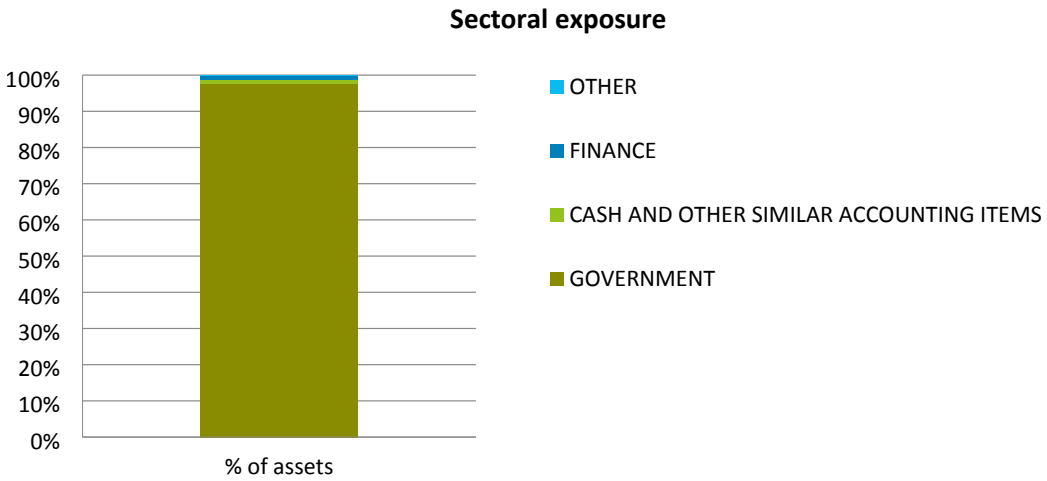
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

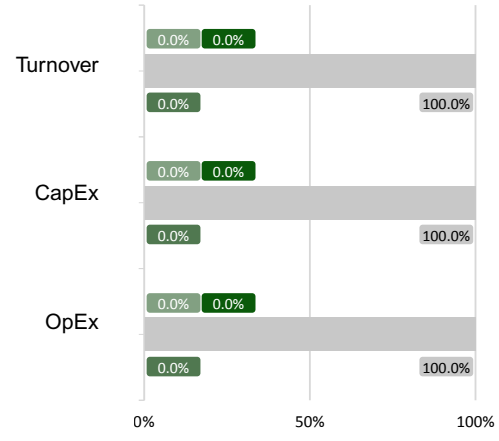
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

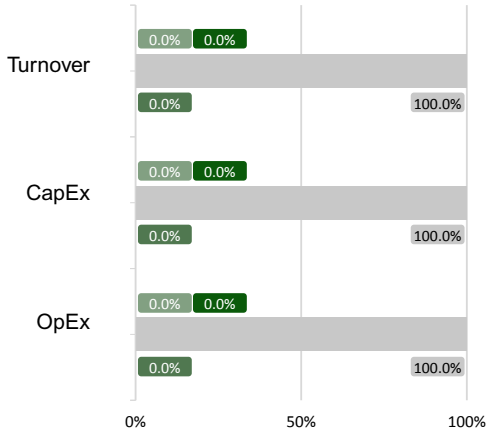
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 2% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 16.31% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 10.79% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Global Bond

Legal entity identifier: 549300I3DB2Q17WKTF05

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **2.39%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 6.27 Benchmark: 6.21

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of ‘do not significant harm’ (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

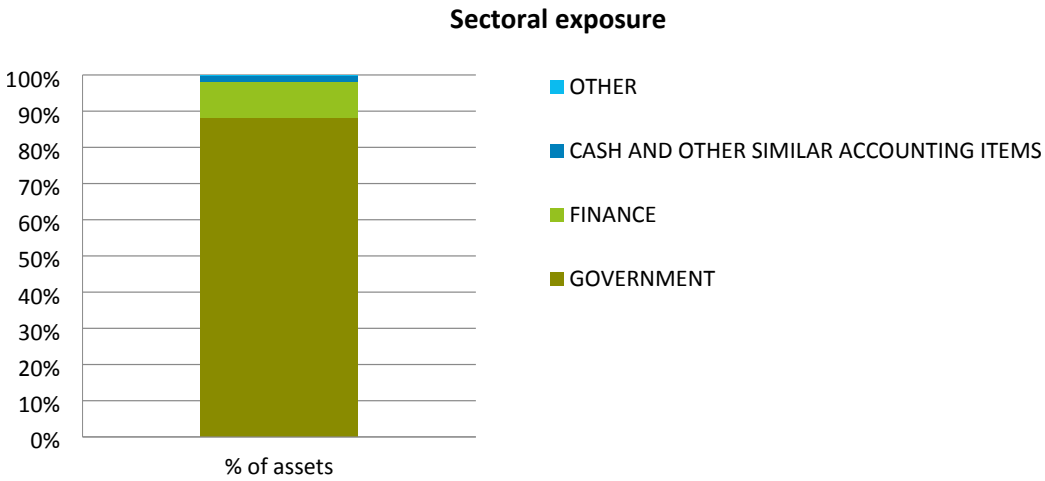
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

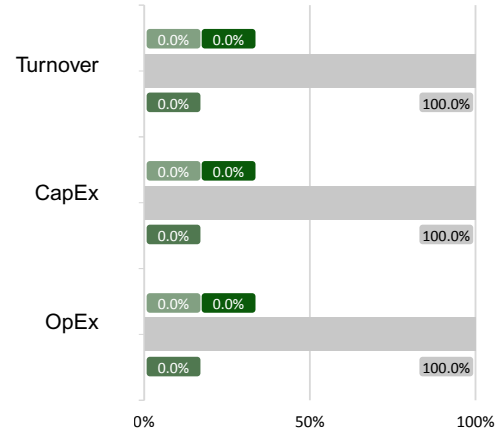
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

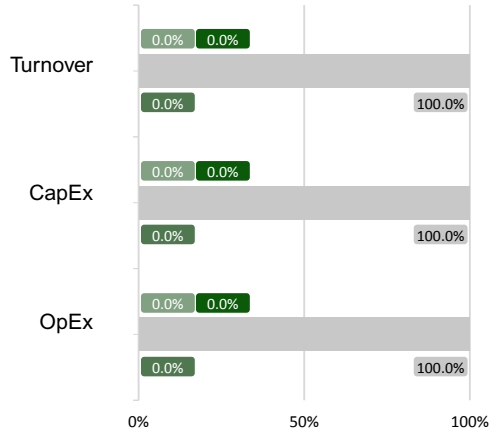
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 12% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 1.54% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.85% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Global Bond Aggregate

Legal entity identifier: 549300ZL4856S1B0G535

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **31.13%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 6.66 Benchmark: 6.42

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024

Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.60 Benchmark: 6.49

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

respect for human rights, anti-corruption and anti-bribery matters.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided

for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

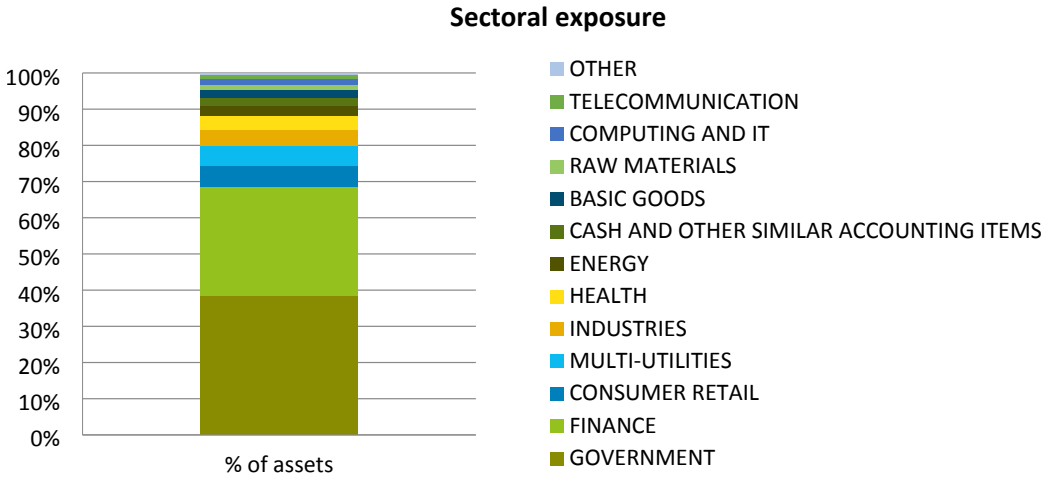
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

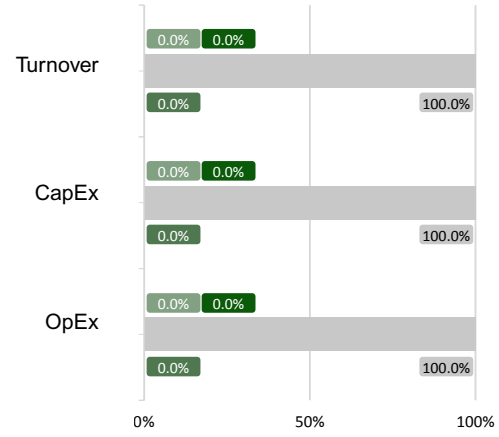
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

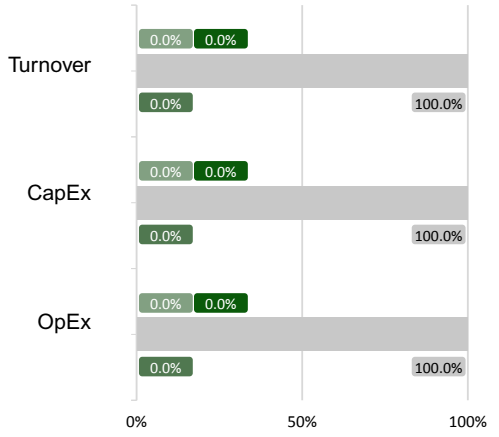
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 61% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 17.04% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 14.09% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **1.10%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.61 Benchmark: 6.58

The ESG score is calculated on a scale of 0 to 10.	Fund: 6.75 Benchmark: 6.67	Fund: 6.29 Benchmark: 6.18	Fund: 6.43 Benchmark: 6.41

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

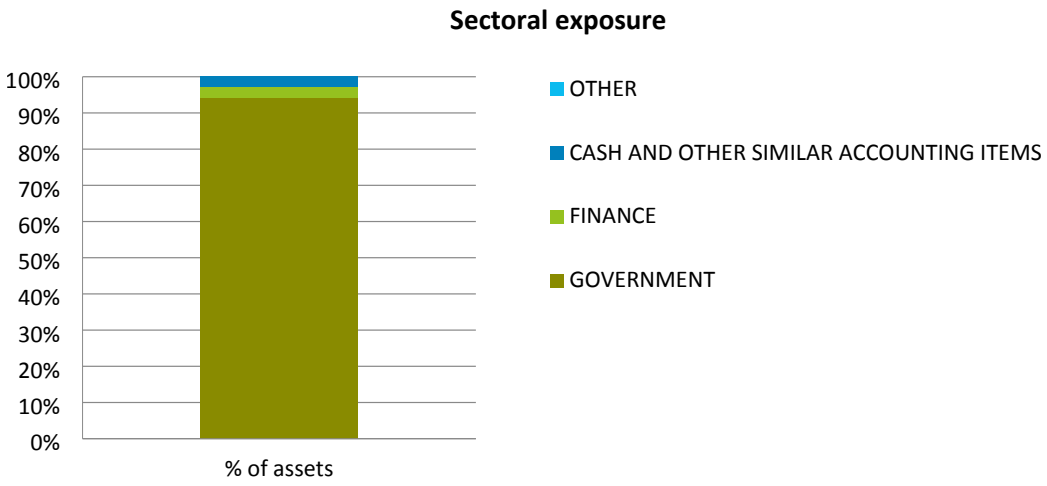
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

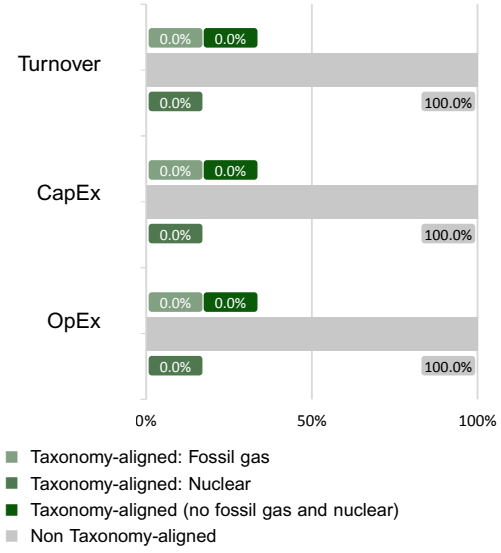
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

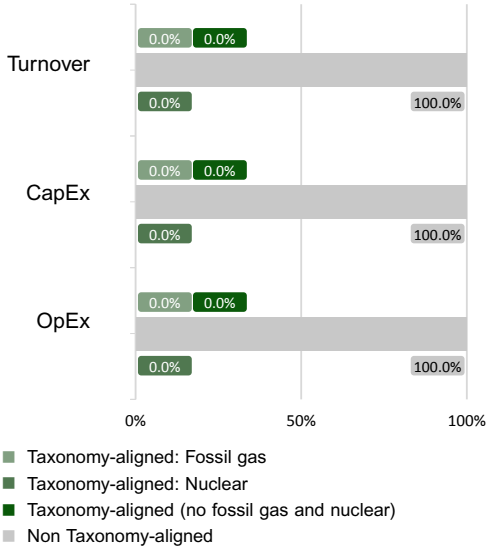
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 6% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 1.10% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics but did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Global Bond High Yield

Legal entity identifier: 549300IH6TQN70XDXQ40

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **52.66%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 5.99 Benchmark: 5.80

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 5.82 Benchmark: 5.78

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

respect for human rights, anti-corruption and anti-bribery matters.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of ‘do not significant harm’ (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided

for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

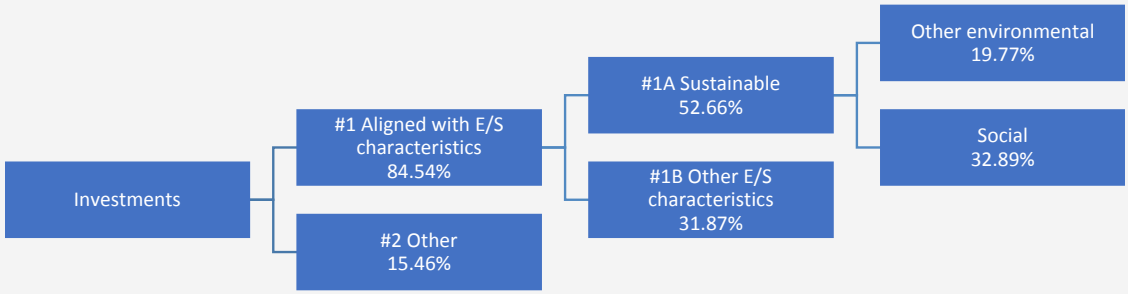
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

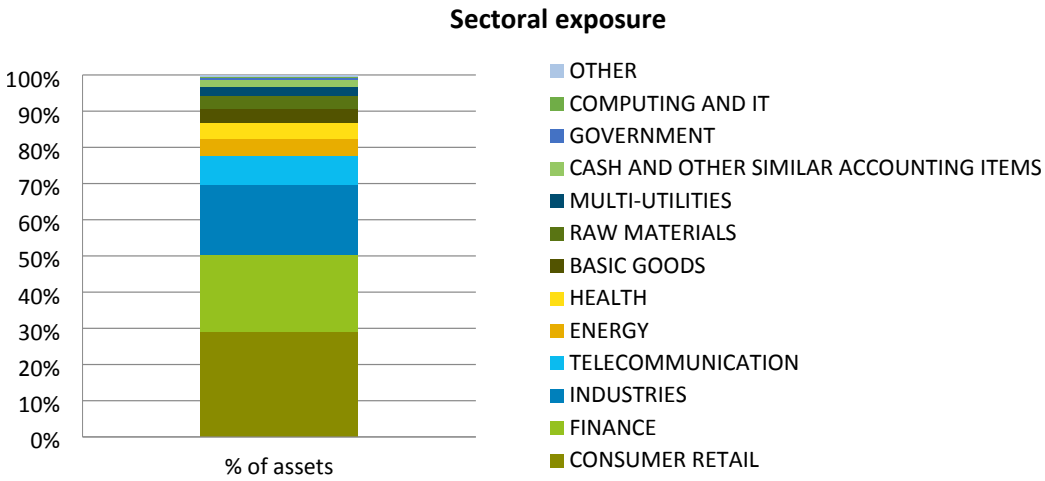
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

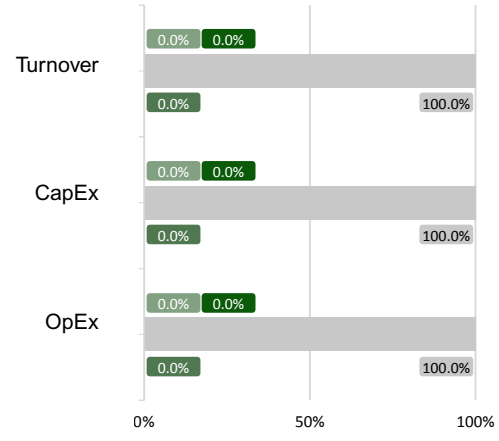
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

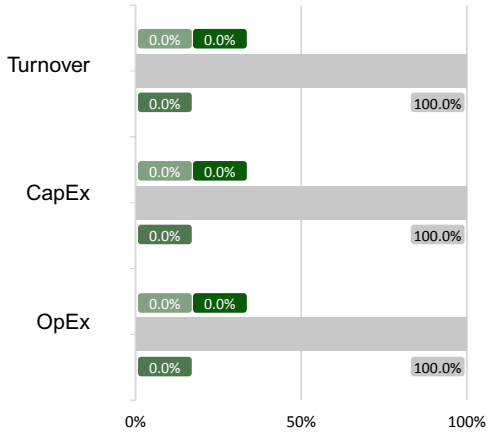
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 99% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 19.77% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 32.89% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Euro High Yield

Legal entity identifier: 549300W6NNREWAW7SI05

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **63.32%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 6.73 Benchmark: 6.28

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

rights, anti-corruption and anti-bribery matters.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

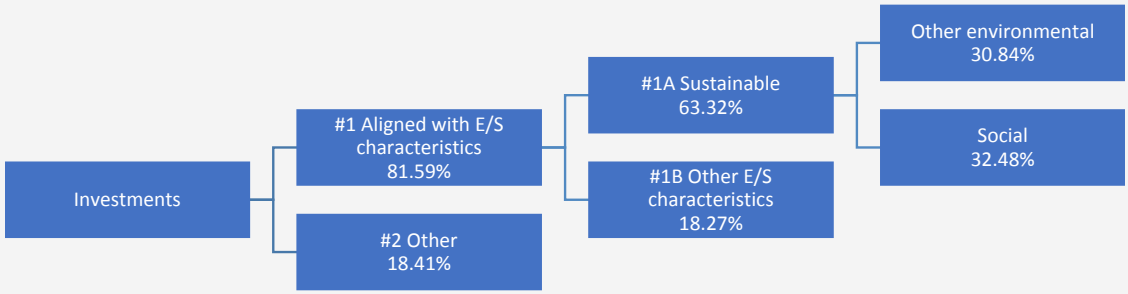
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

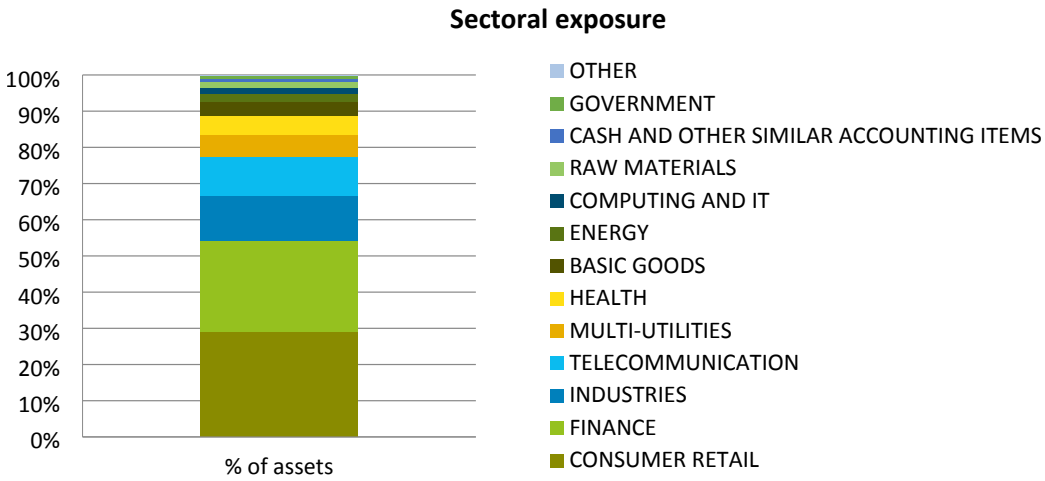
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

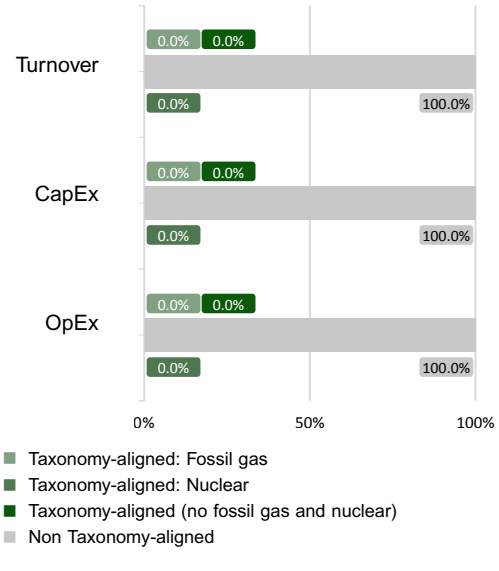
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

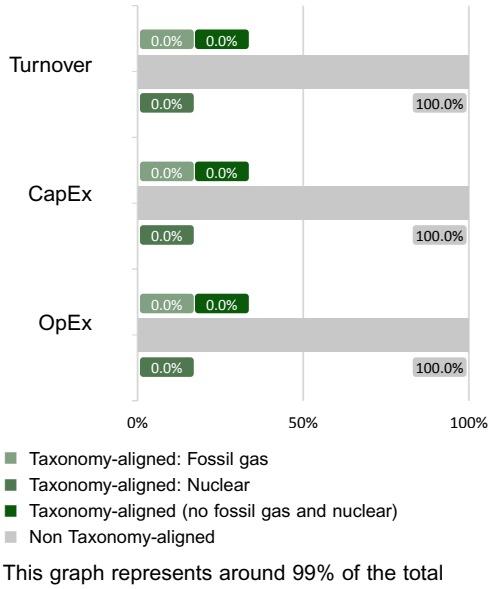
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 99% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 30.84% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 32.48% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **58.17%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 6.54 Benchmark: 6.01

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%

ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.64 Benchmark: 6.01	Fund: 6.42 Benchmark: 6.08	Fund: 6.01 Benchmark: 5.92

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

rights, anti-corruption and anti-bribery matters.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

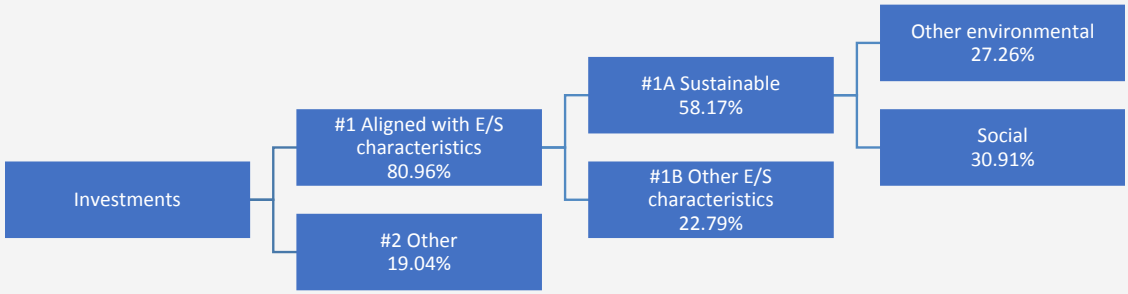
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

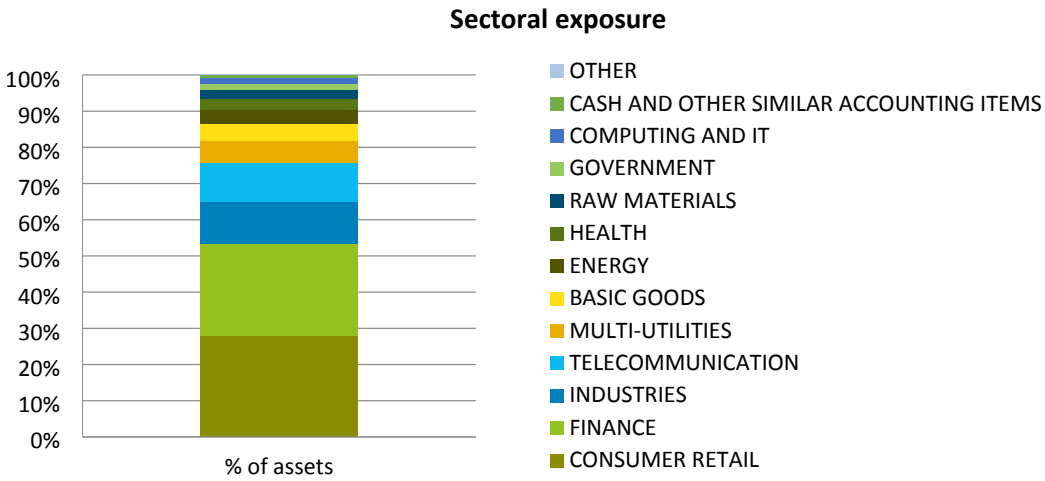
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

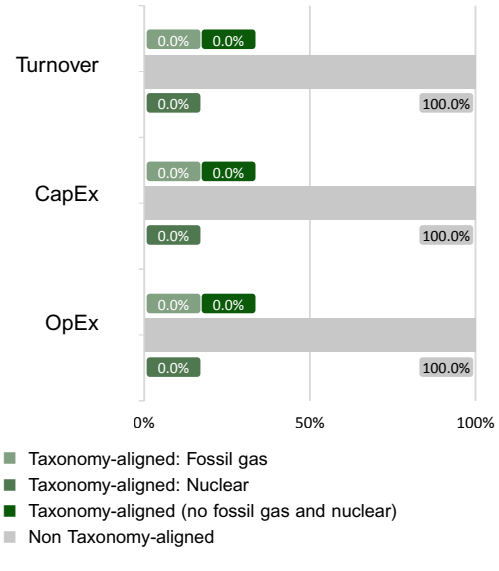
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

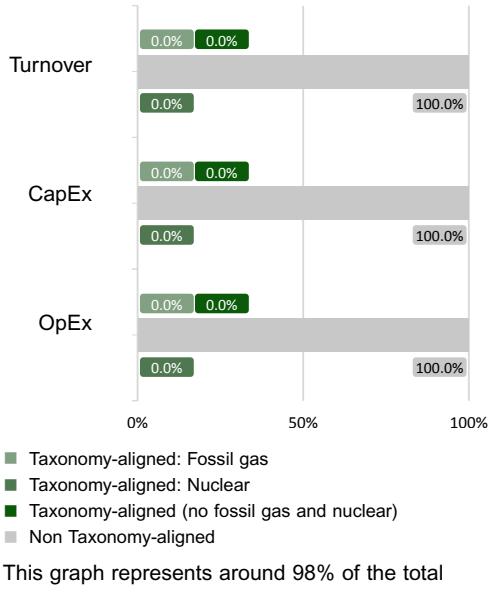
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 98% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 27.26% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 30.91% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Emerging Markets

Legal entity identifier: 549300BZGW07V7D5VL89

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **8.50%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 5.12 Benchmark: 5.01

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of ‘do not significant harm’ (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

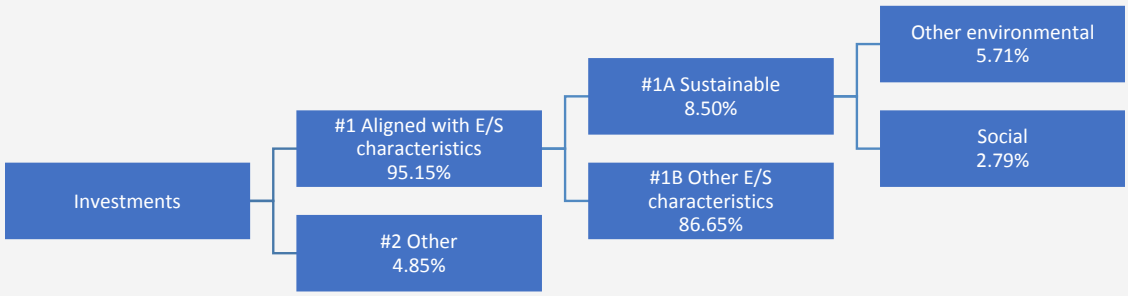
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

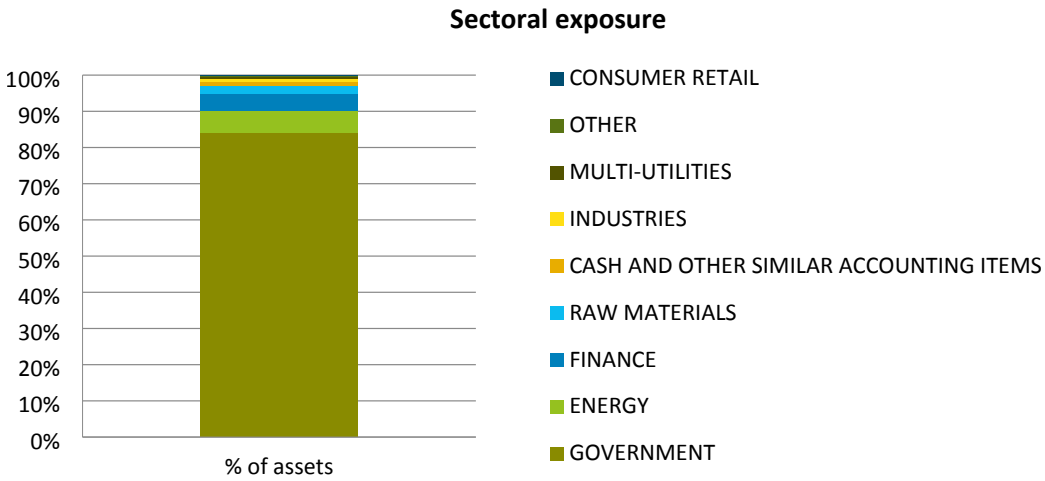
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

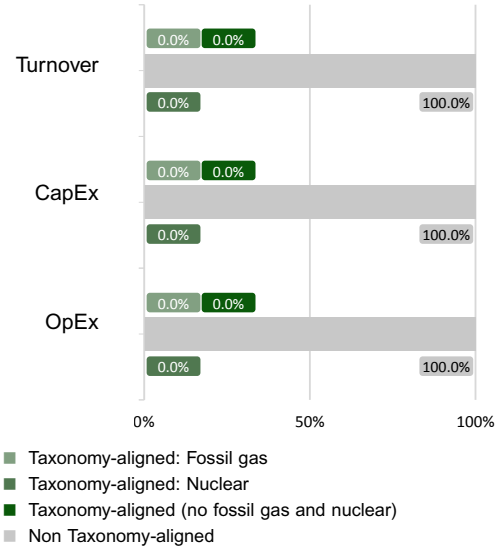
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

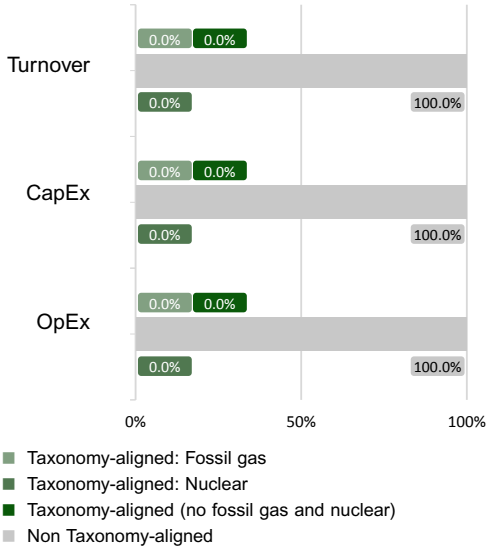
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 16% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 5.71% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 2.79% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Bond Emerging Markets in Local Currencies

Legal entity identifier: 549300IX3GUWKBG5M588

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **3.14%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 5.70 Benchmark: 5.64

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

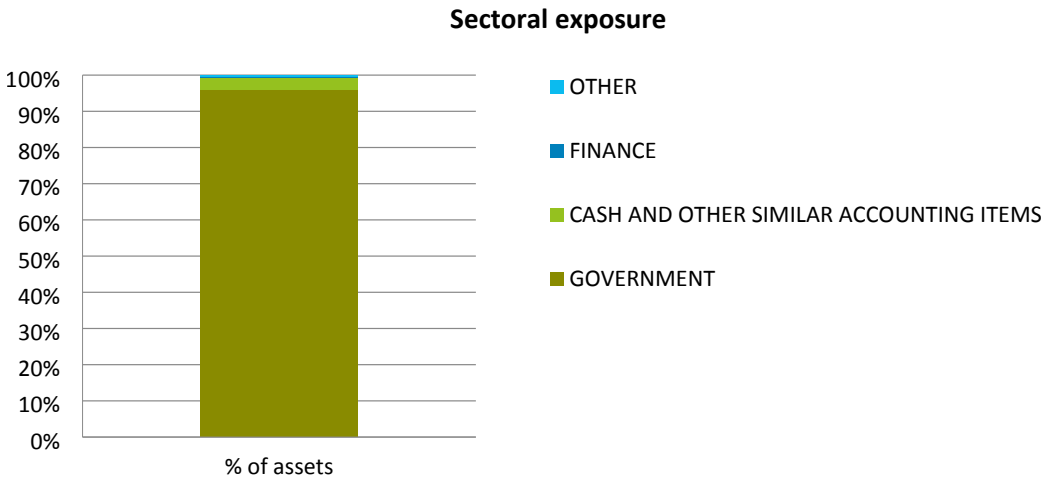
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

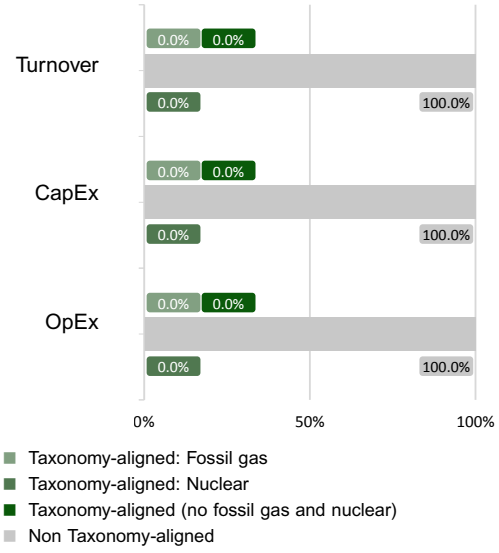
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

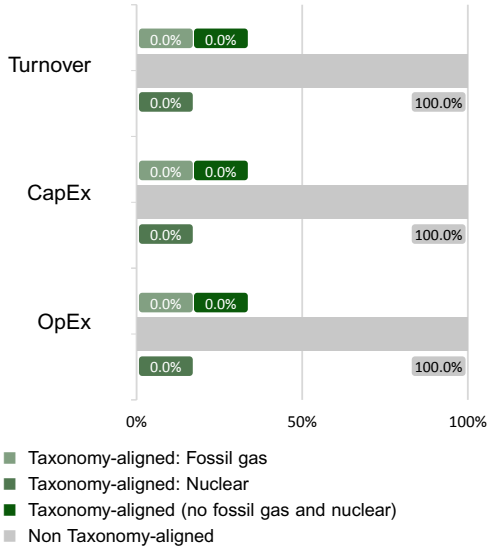
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 4% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 2.60% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 0.54% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Euro Emerging Markets Bonds

Legal entity identifier: 549300EDRIJ1XFVMWO67

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **15.75%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 5.77 Benchmark: 5.69

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

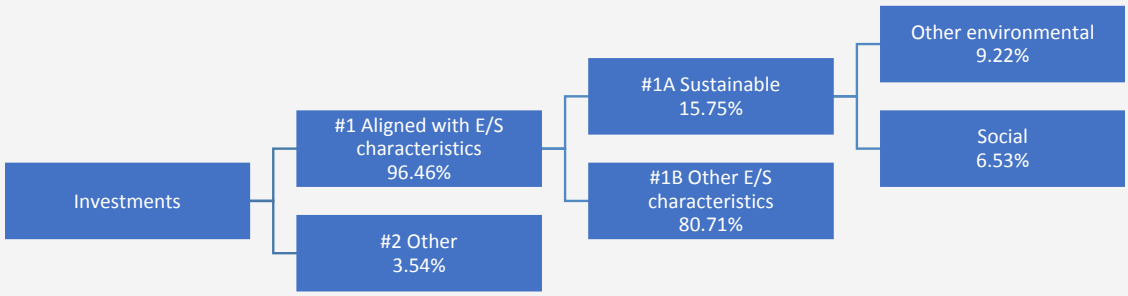
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

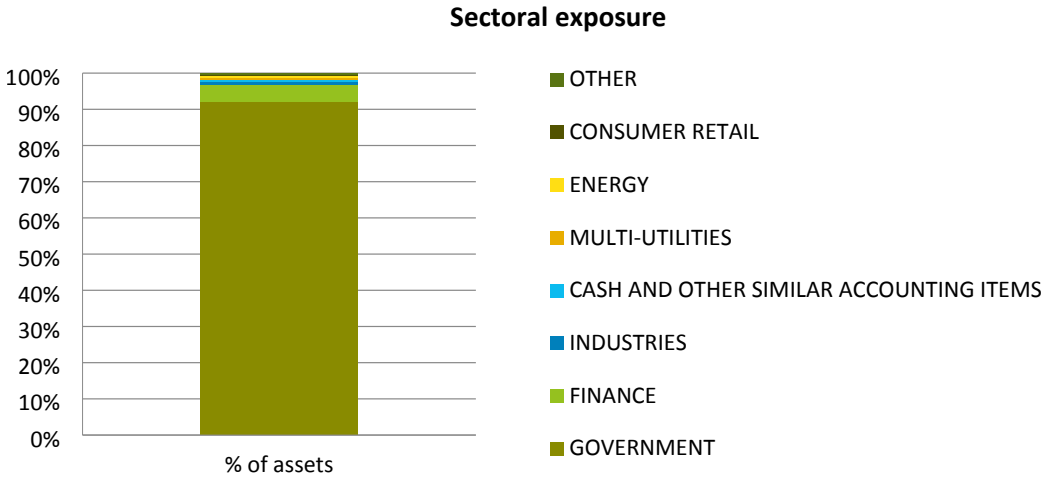
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

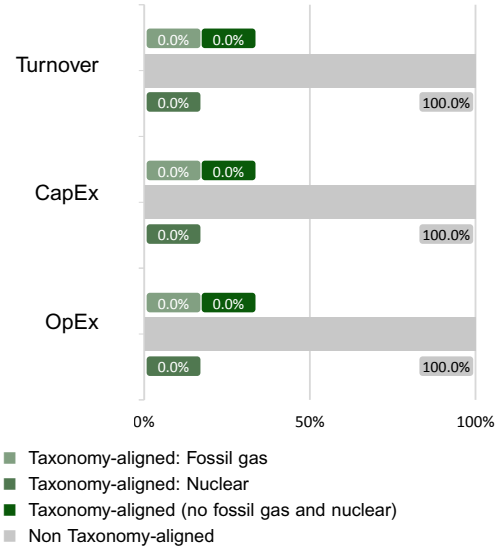
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

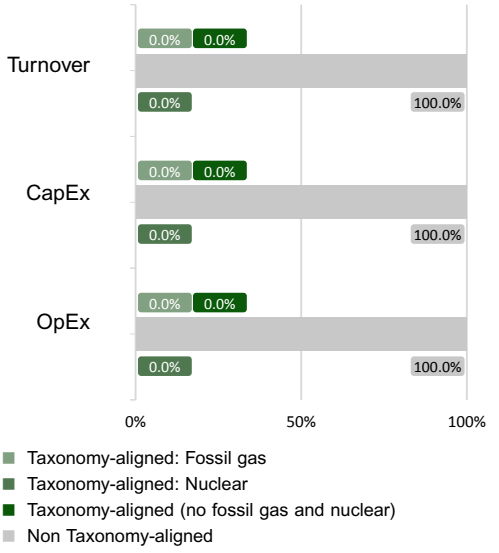
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 8% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 9.22% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 6.53% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - SLJ Local Emerging Markets Debt

Legal entity identifier: 5493003GXX4SNDCOBJ07

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **6.76%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

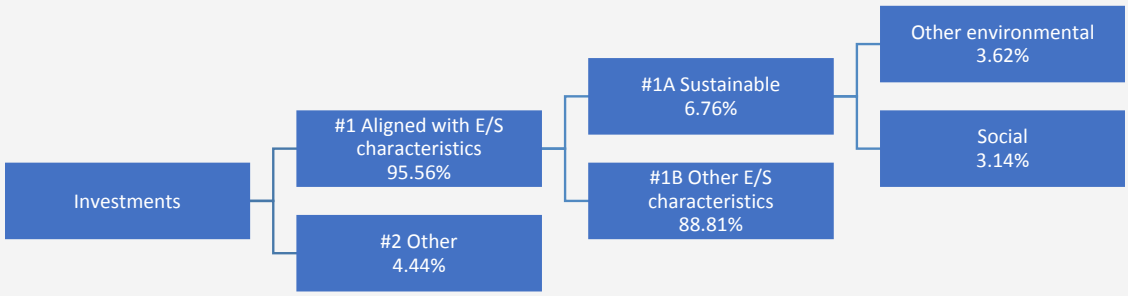
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

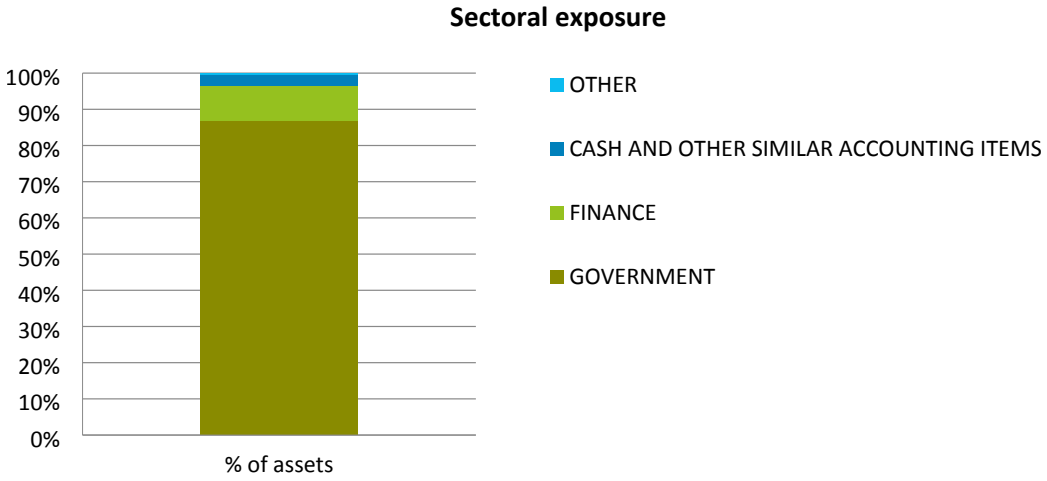
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

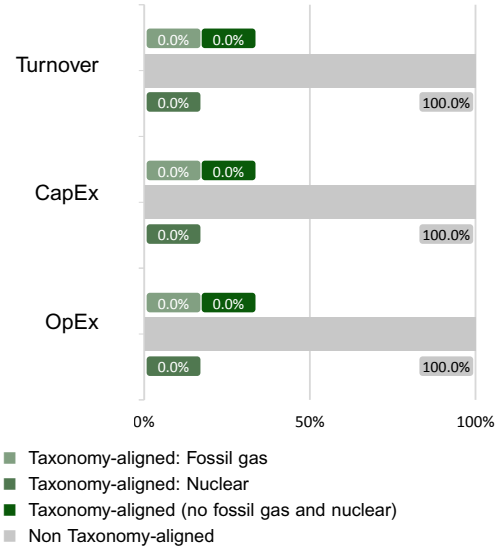
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

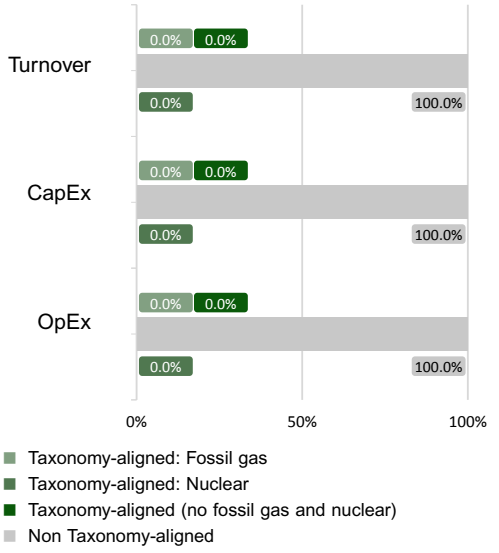
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 13% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 3.62% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 3.14% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Global Cautious Allocation

Legal entity identifier: 391200PPGQHCZSODHP04

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **23.53%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.78 Benchmark: 6.66

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.97 Benchmark: 6.77	Fund: 6.44 Benchmark: 6.39

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

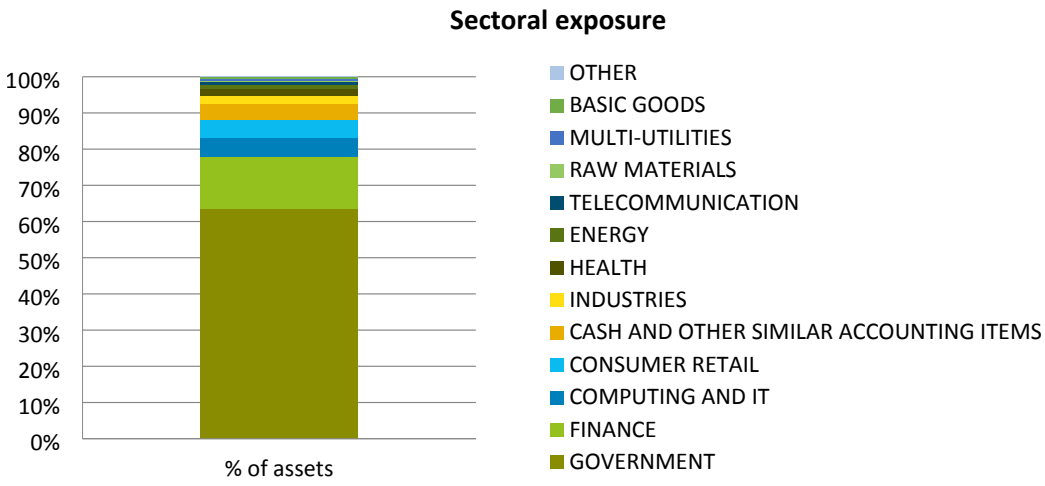
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

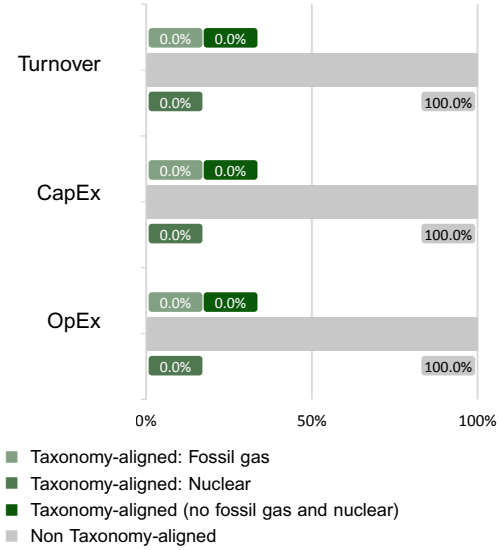
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

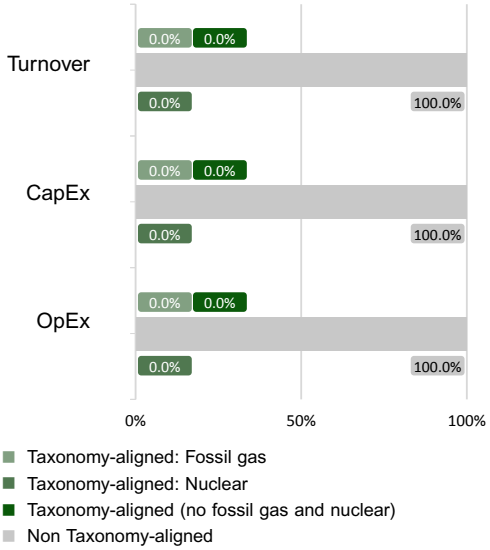
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 36% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 14.16% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 9.37% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Global Allocation

Legal entity identifier: 391200HBUS3W15N38785

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35.90%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.80 Benchmark: 6.67

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

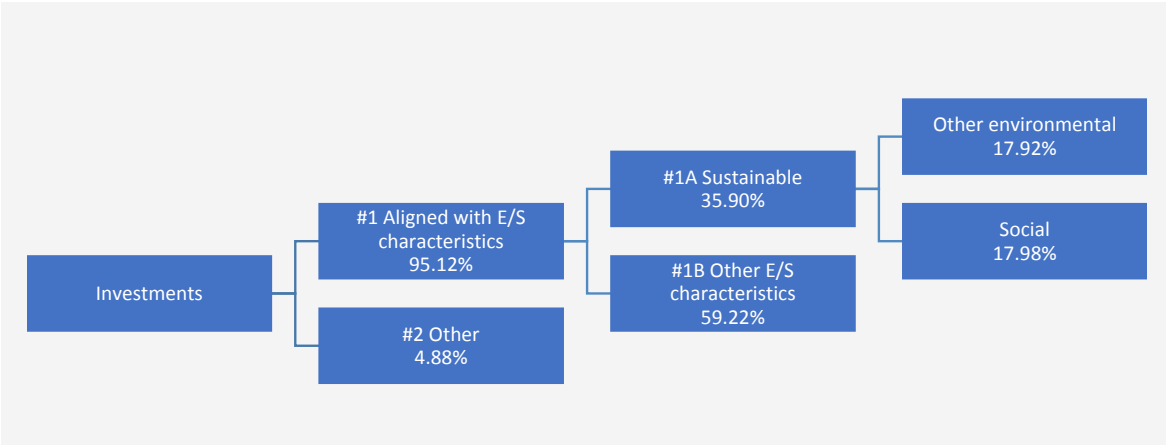
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country

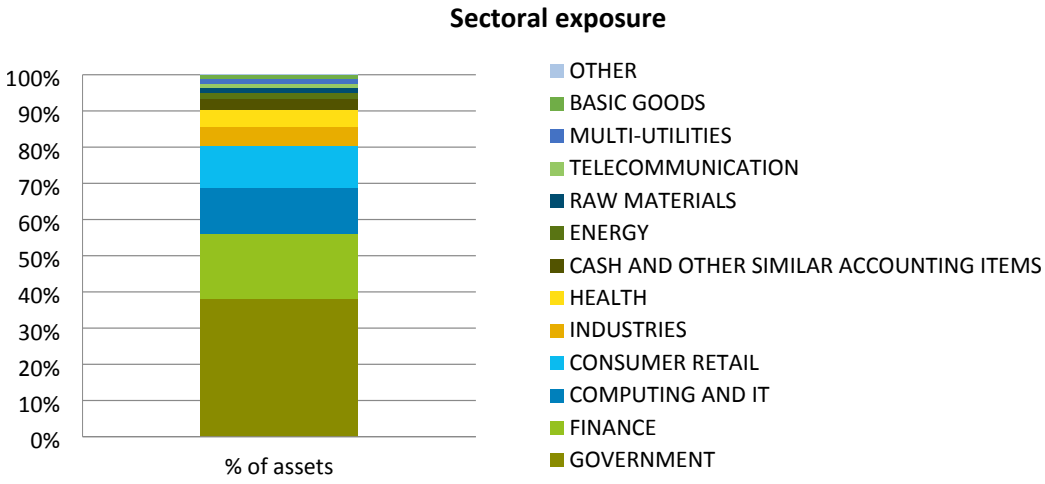
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

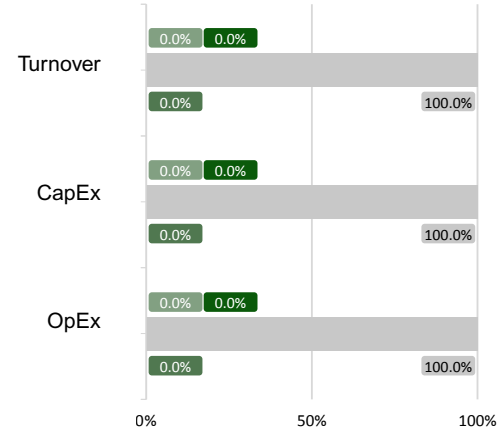
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

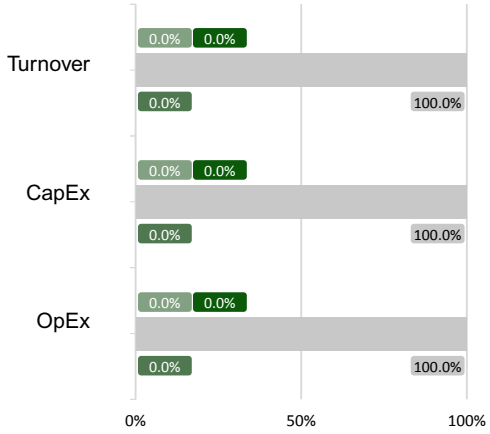
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 62% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 17.92% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 17.98% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Italian Equity Opportunities

Legal entity identifier: 549300E7MMZJW0KMF648

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **76.79%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.94 Benchmark: 6.90

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

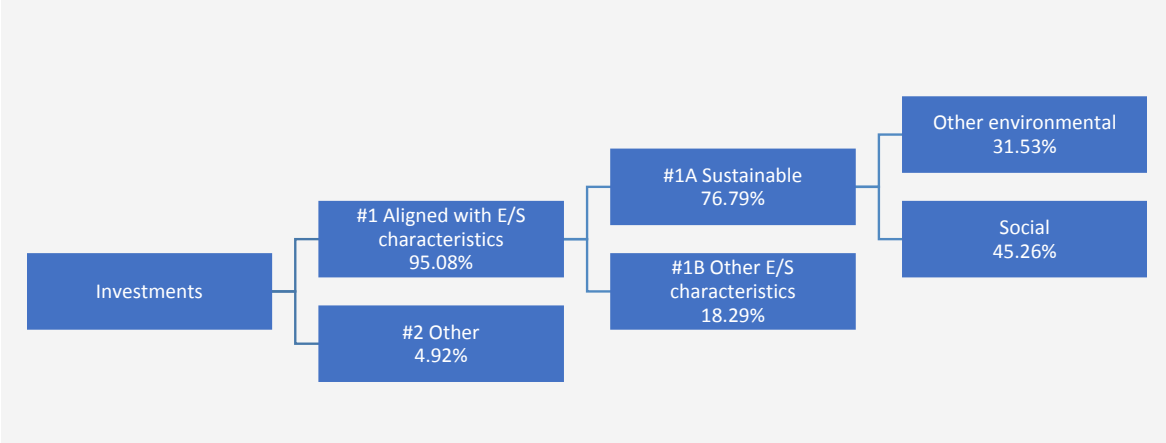
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country
UNICREDIT SPA COMMON STOCK	FINANCE	6.53	Italy
INTESA SANPAOLO COMMON STOCK	FINANCE	6.26	Italy
ENEL SPA COMMON STOCK EUR1.0	MULTI-UTILITIES	5.68	Italy
GENERALI COMMON STOCK	FINANCE	4.56	Italy
FERRARI NV COMMON STOCK EUR.01	CONSUMER RETAIL	4.05	Italy
REPLY SPA COMMON STOCK EUR.13	CONSUMER RETAIL	2.85	Italy
LEONARDO SPA COMMON STOCK	INDUSTRIES	2.59	Italy
PRYSMIAN SPA COMMON STOCK EUR.1	INDUSTRIES	2.50	Italy
LOTTOMATICA GROUP SPA COMMON STOCK	CONSUMER RETAIL	2.49	Italy

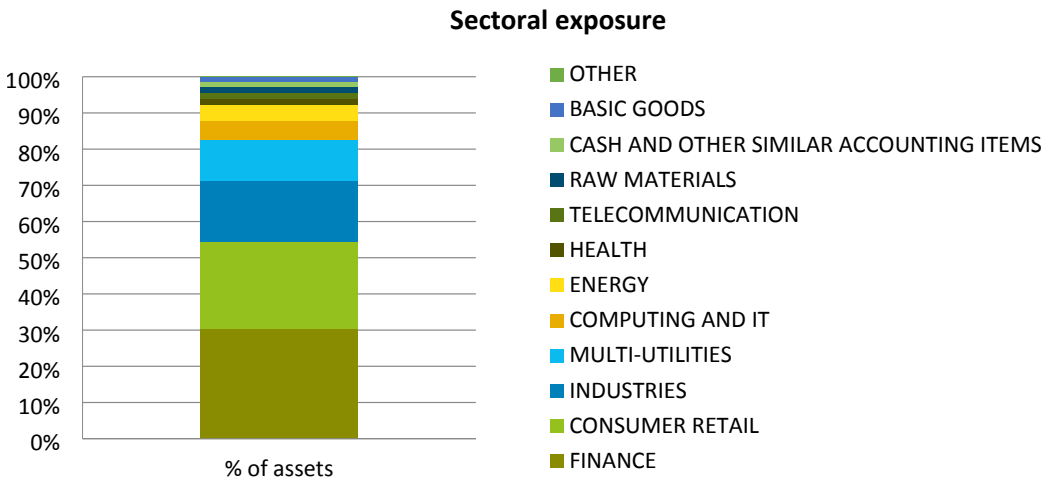
ENI SPA COMMON STOCK	ENERGY	1.95	Italy

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

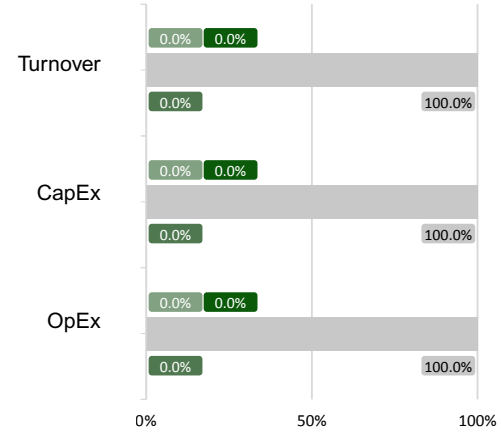
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

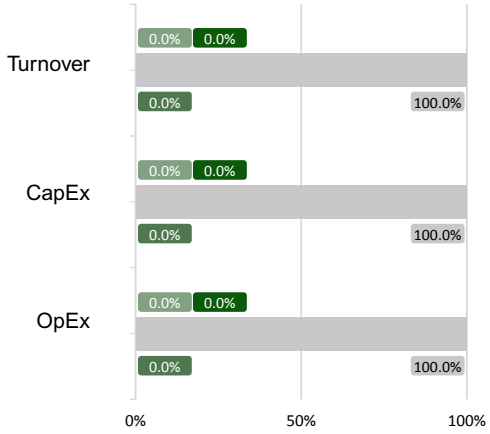
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 31.53% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 45.26% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Top EMU Research

Legal entity identifier: 391200DW8UOFWQPUCB02

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **76.64%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund has promoted environmental and/or social characteristics by investing in corporate issuers which respect a negative screening process, aimed at excluding from the investment universe the issuers belonging to sectors considered “not responsible” and/or whose conduct is such to determine significant environmental and/or social adverse impacts and/or most exposed to sustainability risks (so-called “critical issuers”), and it has committed to make a minimum proportion of sustainable investment (“Sustainable Integration”) pursuant to Regulation (EU) 2019/2088 (“SFDR”).

In particular, from an environmental point of view, by investing in corporate issuers, the fund has promoted the limitation of greenhouse gas emissions and the production or consumption of renewable energy and, from a social point of view, the respect of social and labour standards and of human rights.

The main sustainability indicators used to measure the attainment of each of the environmental and/or social characteristics promoted by the fund are reported below.

Limitation of greenhouse gases emissions:

– Absence of investments in companies that generate revenues from (i) the mining or production of electricity from thermal coal above 25% of their revenues (or 20% if the company has expansion plans) or (ii) oil sands extraction above 10% of their revenues, contributing in this way to limiting greenhouse gas emissions;

– Absence of investments in companies with a greenhouse gas intensity above a specific tolerance threshold, unless having a decarbonization target (self-declared or approved by the Science Based Target Initiative) or at least 5% of their revenues aligned with the technical criteria for environmentally sustainable economic activities of the Regulation (EU) 2020/852 (“EU Taxonomy”).

Production or consumption of renewable energy:

– Absence of investments in companies belonging to “high impact” climate sectors (defined based on the statistical classification of economic activities (so-called “NACE”), included between A-H; L) that have an energy consumption intensity above a specific sector-based tolerance threshold, unless (i) producing or consuming renewable energy; or (ii) having a decarbonization target (self-declared or approved by the Science Based Target Initiative); or (iii) having at least 5% of their revenues aligned with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy.

Respect of social and labour standards:

– Absence of investments in companies in violation of the Principles of the United Nations Global Compact (so-called “UNGC Principles”), the Organisation for Economic Co-operation and Development’s Guidelines (so-called “OECD Guidelines”) for Multinational Enterprises, the Principles of the International Labour Organisation (so-called “ILO Principles”) and of the United Nations on business and human rights (so-called “UNGP Principles”), as assessed by the management company

Respect of human rights:

– Absence of investments in companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous).

Sustainable Integration:

– Percentage of investments in sustainable corporate issuers and in bond instruments intended to finance projects that contribute, among other objectives, to contrasting global warming and/or promoting social progress (so-called green/social/sustainability bonds).

Finally, the fund promotes the proactive interaction with corporate issuers by exercising participation and voting rights, and engagement with investees, encouraging effective communication with the management of companies.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Exclusions relating to negative environmental externalities	The weight of issuers (i) with greenhouse gas intensity above a specific tolerance threshold of carbon dioxide (CO2) equivalent per million euro of revenue, except for those with a decarbonisation target (self-declared or approved by the Science Based Target Initiative) or have at least 5% of their revenues aligned with the technical criteria for eco-sustainable economic activities of the EU Taxonomy, (ii) belonging to sectors with a 'high climate impact' (identified according to the statistical classification of economic activities (known as 'NACE'), between A-H; L) with an energy consumption intensity higher than the respective sectoral tolerance threshold, with the exception of those that produce or consume renewable energy, or have a decarbonisation target (self-declared or approved by the Science Based Target Initiative) or have at least 5% of their revenues aligned with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy.	0.00%
Exclusions relating to negative social externalities	The weight of issuers in violation of the UNGC Principles, the OECD Guidelines, the UNGP Principles and the ILO Principles as assessed by the management company.	0.00%
"Sovereign Screening" exclusion	The weight of investments in countries with greenhouse gas emissions (GHG) exceeding 850 tonnes of "CO2 equivalents" per million euros of GDP, taking into account differences in purchasing power.	0.00%
Sustainable Integration	Percentage of investments in corporate issuers deemed sustainable by the management company and in bond instruments intended to finance projects that contribute, among other objectives, to contrasting global warming and/or promoting social progress (so-called green/social/sustainability bonds).	76.64%

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Not Applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments using data made available by MSCI Solutions, pursuant to which the positive contribution to an environmental and/or social objective for a corporate issuer is assessed as follows:

– the degree to which the issuer’s products and services or operations are aligned with the Sustainable Development Goals promoted by the United Nations (SDGs); or

– the alignment of the issuer's revenues and/or capital expenditures (“capex”) with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy; or

– the issuer has set decarbonization targets consistent with limiting global temperature rise to 1.5°C, validated by the “Science Based Target Initiative” (so-called “SBTi”),

provided that such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and the companies benefiting from such investments comply with good governance practices.

In addition, the management company considers as sustainable investments bond instruments intended to finance projects that, among other objectives, aim at contrasting global warming and/or to promote social progress (“green bonds”, “social bonds”, “sustainability bonds”) and issued in compliance with the Green Bond Principles, the Social Bond Principles or the Sustainability Bond Guidelines, as defined by the International Capital Market Association (ICMA) and the European framework known as the Green Bond Standard.

The fund does not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund might invest in activities that may be considered as environmentally sustainable according to its investment policy, but such investments are not per se decisive to the attainment of the fund’s environmental objectives.

Alignment of an issuer’s products and services or operations with the Sustainable Development Goals (SDGs):

The Sustainable Development Goals aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: combating poverty and hunger; the right to health, work and education; gender equality and reduction of inequalities; access to water and energy; urbanization and promotion of resilient infrastructure; combating climate change; and environmental protection including preservation of marine and terrestrial ecosystems.

The management company’s internal methodology aims to select issuers, through a “positive”/”negative” evaluation, whose activities contribute to one or more of the 17 SDGs (i.e., issuers with at least one SDG with a score equal to or above 2) without any misalignment (i.e., with a score equal to or below -2) to any of the 17 SDG. For each SDG, based on data made available by MSCI Solutions, the following are estimated:

– The degree of alignment of an issuer’s products and services, taking into account the revenues and the potential adverse impacts (so-called “Product Alignment”)

– The degree of alignment of an issuer’s operations (including internal policies, objectives and practices implemented and potential adverse impacts) (so-called “Operational Alignment”).

The degree of alignment of the issuer is expressed on a net base, i.e. it takes into account the positive/negative contribution and it is expressed on a scale from -10 “Strongly Misaligned” to +10 “Strongly Aligned”. Issuers with scores:

– equal to or less than -2 have “Misaligned” activities in relation to the individual SDG;

– equal to or higher than 2 present “Aligned” activities in relation to the individual SDG;

– between -2 (excluded) and 2 (excluded) have “Neutral” activities for the individual SDG.

Alignment of an issuer’s revenues and/or capital expenditures with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy:

For the purpose of assessing positive contribution to environmental objectives, the management company’s internal methodology considers whether an issuer’s revenues and/or capex are aligned with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy Regulation, at least to the following degree:

– 20% of turnover; or

– 5% of turnover and 50% of capital expenditures (“capex”).

Issuers with decarbonization targets validated by the “Science Based Target Initiative”:

The management company’s internal methodology considers an issuer to contribute positively to an environmental objective where it has defined science-based net-zero targets consistent with limiting global temperature rise to 1.5° C and these are validated by SBTi.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The methodology adopted by the management company for the selection of sustainable investments, for the purpose of verifying compliance with the principle of not causing significant harm, considered all the main mandatory adverse impact indicators listed in Table 1 of Annex I to Regulation (EU) 2022/1288, applying specific quantitative tolerance thresholds for each indicator, as detailed on the management company website ***https://www.eurizoncapital.com/en/sustainability/sustainability-policy***.

The principle of do not cause significant harm is also assessed taking into account additional safeguards considerations which would prevent an issuer to be considered as “sustainable investment” when:

– its products and services or operations are misaligned to the SDGs, assessed on the basis of selected quantitative and qualitative metrics, including the exposure to controversies;

– it has the lowest ESG rating (“CCC”) assigned by MSCI Solutions;

– it is involved in the cultivation and production of tobacco;

– it lacks a minimum set of disclosure, in particular with regards to its GHG emissions and social matters (unadjusted gender pay gap or diversity in its Board).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The methodology adopted by the management company for the selection of sustainable investments, for the purpose of verifying compliance with the principle of not causing significant harm, considered all the main mandatory adverse impact indicators listed in Table 1 of Annex I to Regulation (EU) 2022/1288, applying specific quantitative tolerance thresholds for each indicator, as detailed on the management company website ***https://www.eurizoncapital.com/en/sustainability/sustainability-policy***.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The management company's internal methodology takes into account adverse impacts on sustainability factors through the definition of specific tolerance thresholds for each indicator, including the violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

In particular, issuers with "very severe" controversies (equivalent to a Controversy Score of 0, on a scale from 0 to 10, where 10 indicates that a company is not involved in any major controversies) related to the violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by MSCI Solutions, do not qualify as "sustainable".

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the "principal adverse impacts" (or "Principal Adverse Impact Indicators", "PAI") of investment decisions on sustainability factors, together with the definition of the related mitigation actions, are an integral part of Eurizon's approach to sustainability.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called Principal Adverse Impact Indicators are taken into consideration within the managed portfolios, pursuant to Article 7 of the SFDR Regulation.

The framework provides for the use of specific indicators, as set out in Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of each financial product, based on the safeguards already established by the Company, which include the use of:

– Negative screening, for the purposes of (i) integrating sustainability risks within the Investment Process of the managed portfolios and (ii) introducing additional restrictions to the investable universe, depending on the sustainability ambition of the products. In this regard, the Company has defined specific limitations (exclusions or restrictions) applicable to certain corporate and/or government issuers, with the aim of avoiding investments in financial instruments more exposed to the risk of value loss due to environmental, social or governance related events or conditions.

With respect to corporate issuers, the Company applies restrictions based on involvement in sectors considered "non responsible" and/or conduct that may result in significant negative environmental and/or social impacts, including:

(i) companies deriving their revenues, beyond the applicable tolerance thresholds, from extraction activities or electricity generation linked to thermal coal or from oil sands exploitation; (ii) companies with clear direct involvement in the manufacturing of unconventional weapons; (iii) companies deemed to be in violation of globally accepted principles, namely the United Nations Global Compact, the OECD Guidelines, as well as ILO and UNGP principles; (iv) companies presenting material environmental, social and/or governance concerns, i.e., characterised by a "critical" ESG profile based on the rating assigned by MSCI Solutions; (v) companies with a greenhouse gas intensity (expressed in tonnes of CO equivalent per million euro of revenues) above the tolerance threshold, except for those with a decarbonisation target (self declared or approved by the Science Based Target Initiative) or with at least 5% of revenues aligned with the technical screening criteria for environmentally sustainable economic activities under the EU Taxonomy; (vi) companies operating in "high impact" climate sectors (identified according to the NACE statistical classification, between A and H or equal to L) with an energy consumption intensity above the respective sectoral tolerance thresholds, except for those producing or consuming renewable energy, or having a decarbonisation target (self declared or SBTi approved), or with at least 5% of revenues aligned with the EU Taxonomy technical screening criteria.

With respect to government issuers and agencies, the Company applies restrictions based on (i) the greenhouse gas ("GHG") emission levels of the respective national economies, covering scopes 1, 2 and 3, weighted relative to GDP and adjusted for purchasing power parity, and (ii) the inclusion of the country in the "high risk" list ("black list") of the Financial Action Task Force (FATF), due to deficiencies in anti money laundering, counter terrorism financing and anti proliferation controls.

– Positive screening of ESG factors in the analysis, selection and construction of financial portfolios, in line with good governance practices. This category includes products that promote, among others, environmental or social characteristics, or a combination thereof, or that pursue sustainable investment objectives pursuant to Articles 8 and 9 of the SFDR Regulation. These products aim to build portfolios characterised by: (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return.

– “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

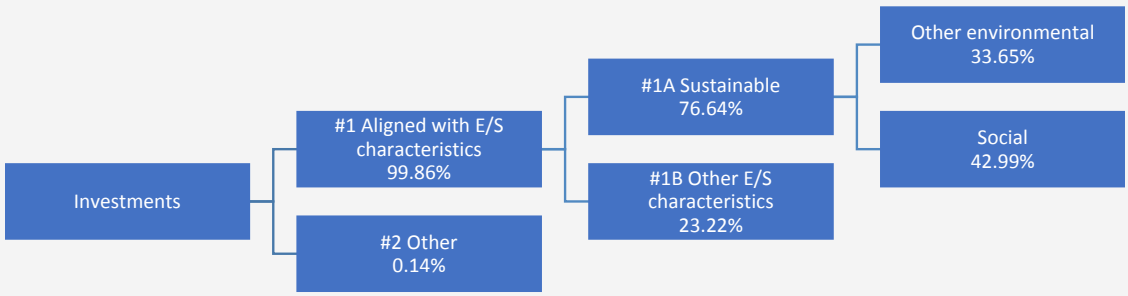
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the Fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Greenhouse gas intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Exposure to companies in high climate impact sectors with high energy consumption and no renewable energy production and consumption
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: December 2025

Largest Investments	Sector	% Assets	Country

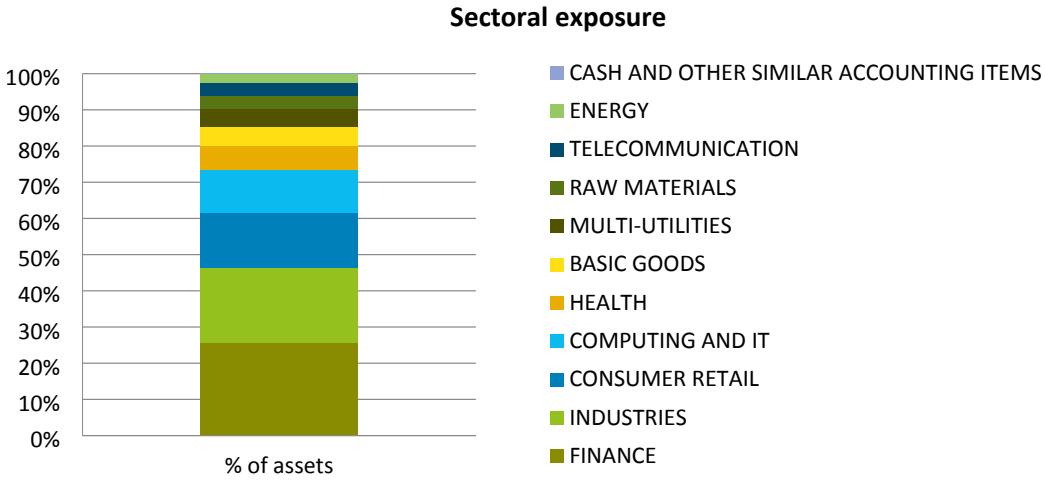
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

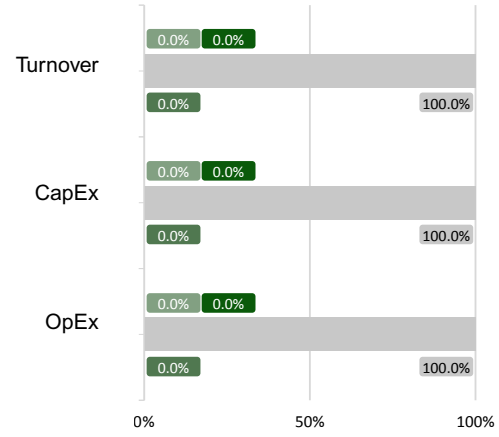
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

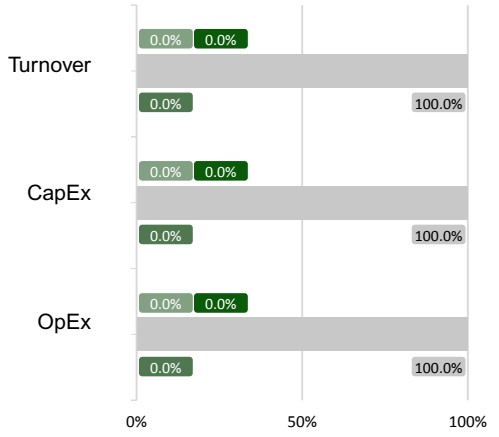
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 33.65% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 42.99% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Included in “#2 Others” are (i) liquidity held; (ii) derivative instruments other than those referring to corporate issuers promoting environmental and/or social characteristics or that are considered sustainable; and (iii) any instruments, such as total return swaps, used for efficient portfolio management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Top European Research

Legal entity identifier: 222100EYOSQCH55BIZ36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **66.73%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.81 Benchmark: 7.77

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

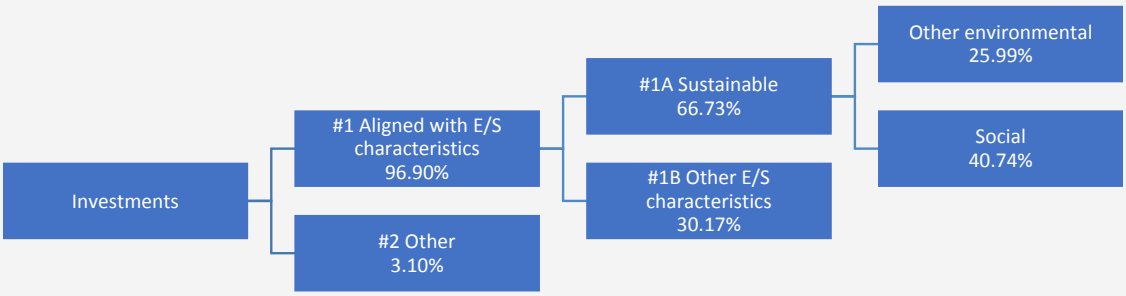
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

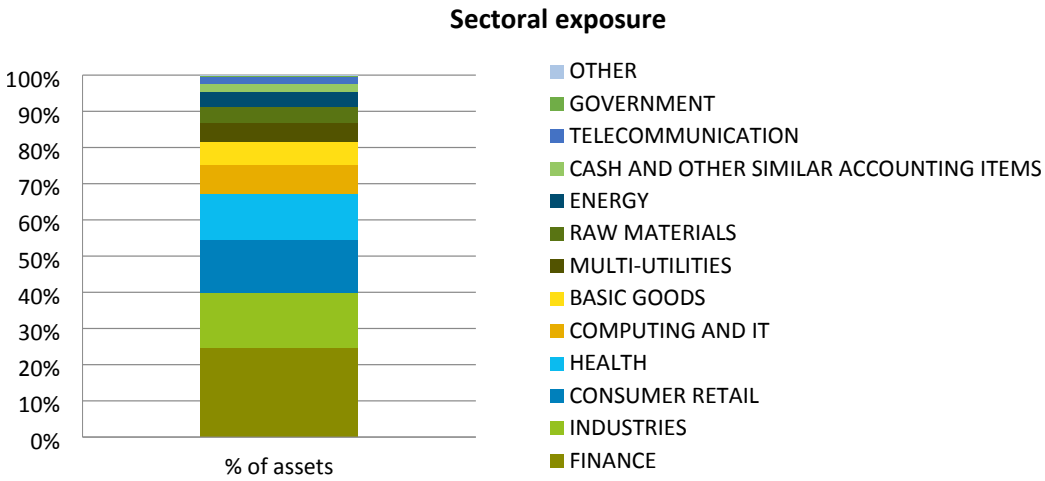
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

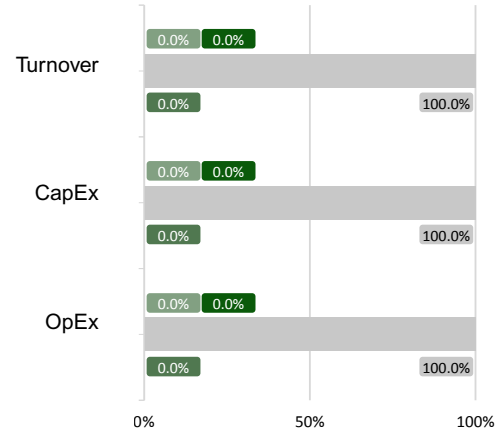
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

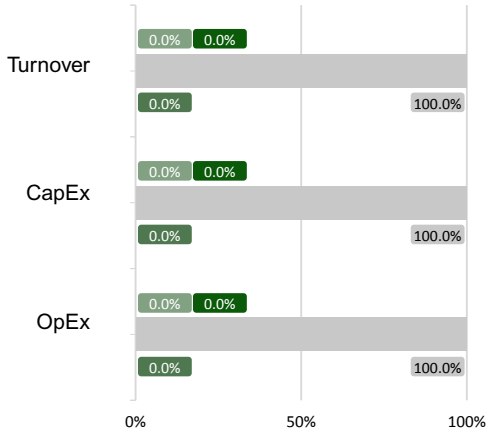
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 25.99% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 40.74% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity Small Mid Cap Europe

Legal entity identifier: 549300Y48WIIWTP5Z179

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **82.44%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.85 Benchmark: 7.81

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

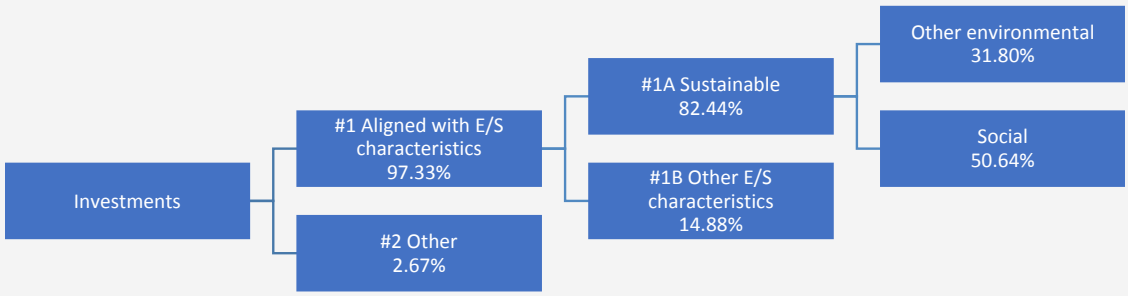
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country
LEONARDO SPA COMMON STOCK	INDUSTRIES	1.43	Italy
SANDOZ GROUP AG COMMON STOCK CHF.05	HEALTH	1.43	Switzerland
ERSTE GROUP BANK AG COMMON STOCK	FINANCE	1.35	Austria

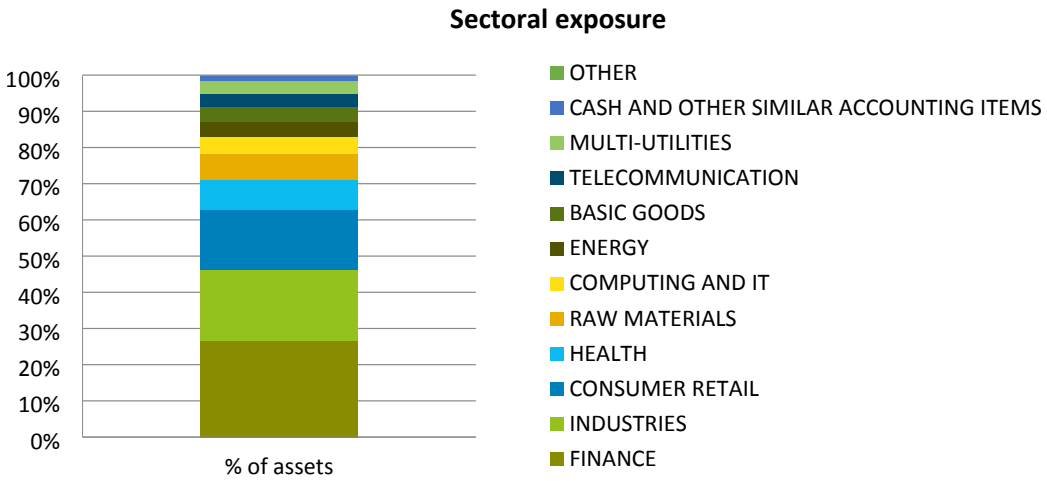
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

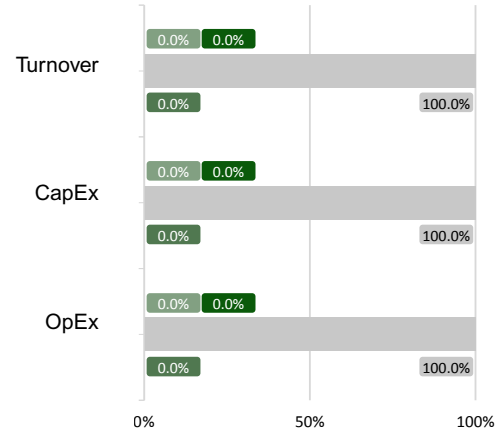
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

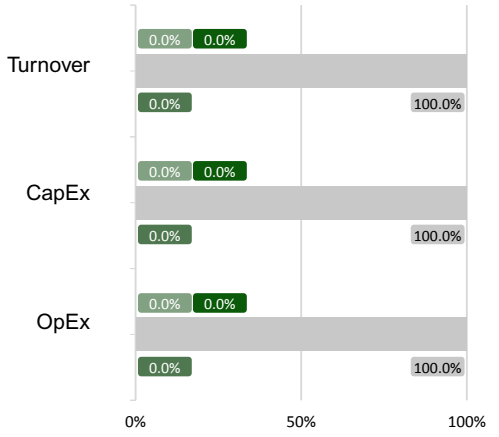
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 31.80% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 50.64% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Top US Research

Legal entity identifier: 549300N22TZ7NMD10A80

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **48.79%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.37 Benchmark: 6.31

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

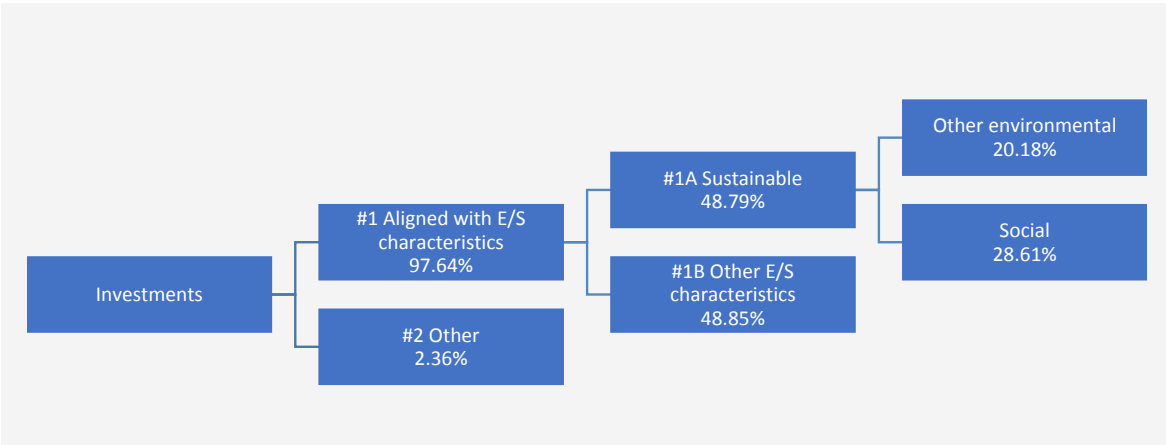
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

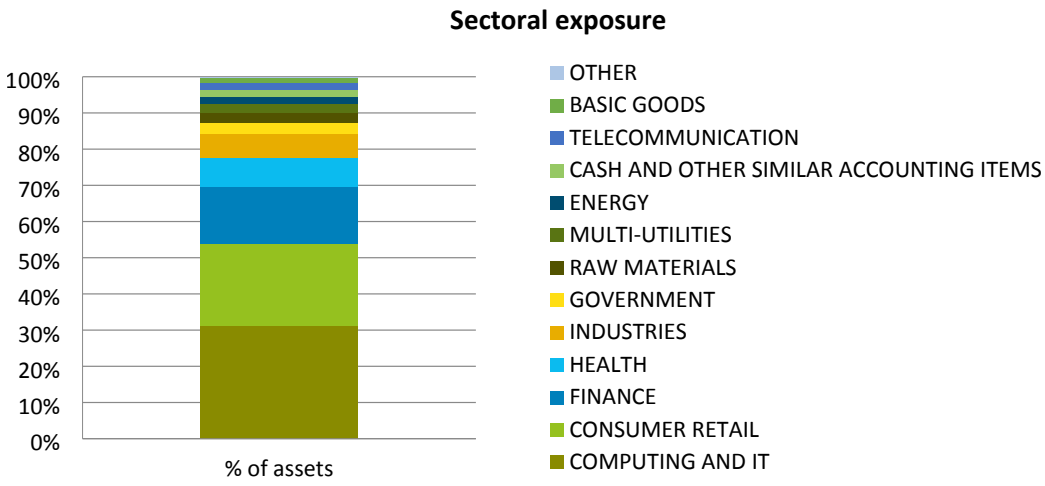
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

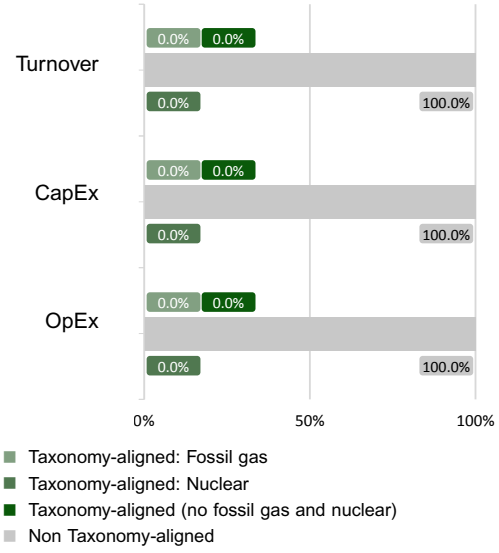
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

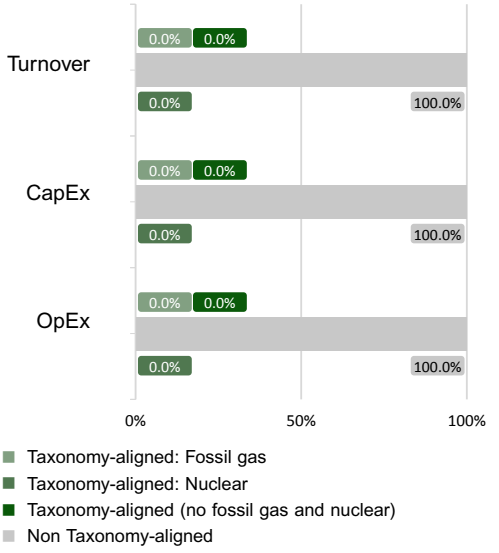
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 97% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 20.18% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 28.61% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Sustainable Japan Equity

Legal entity identifier: 5493004XOURTUGX04P73

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **59.82%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.44 Benchmark: 7.19

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

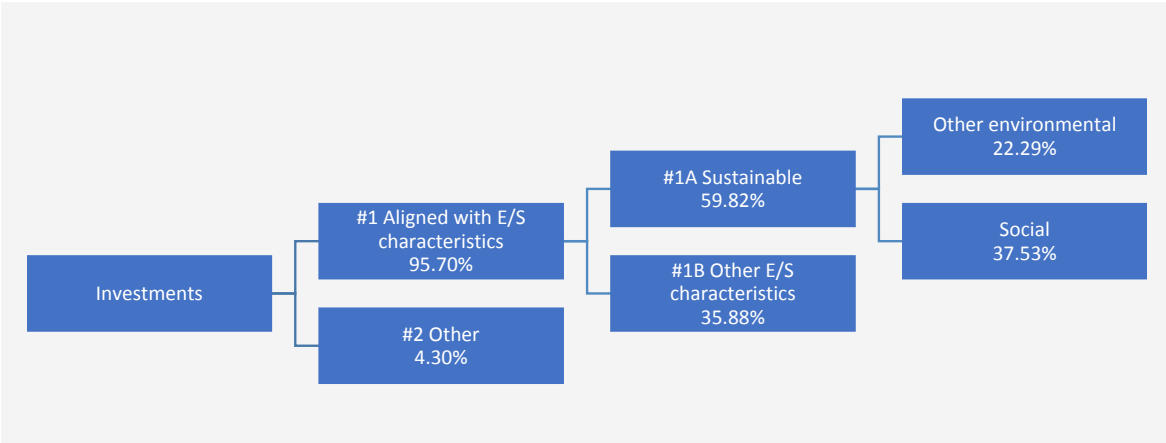
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

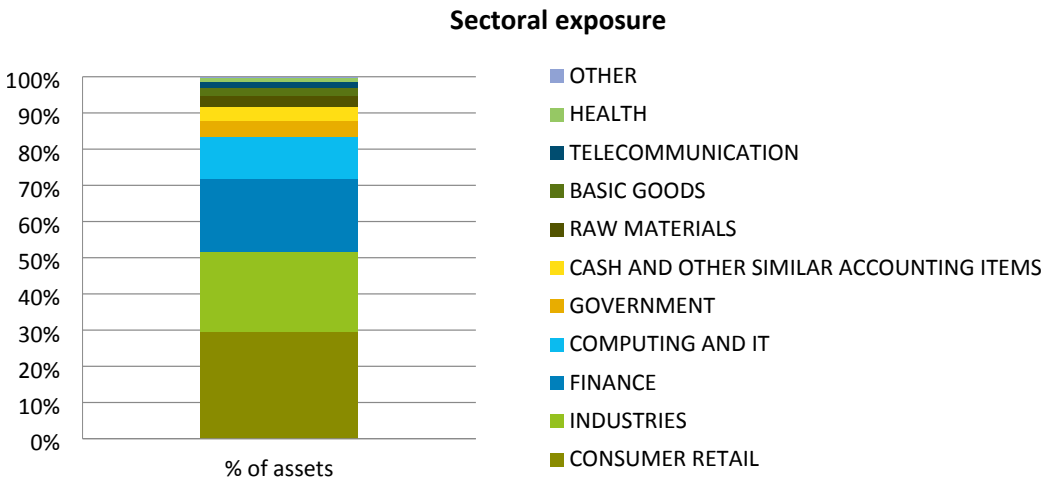
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

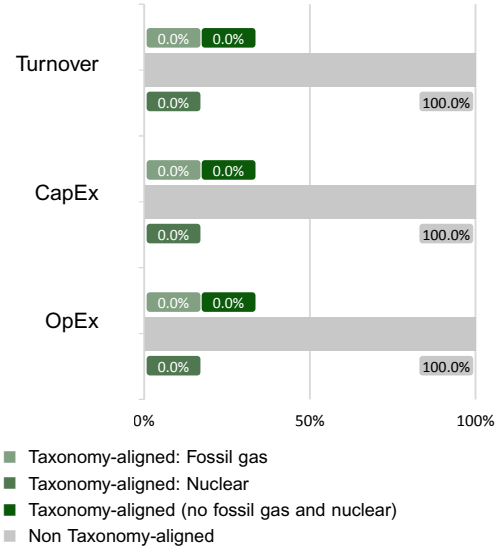
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

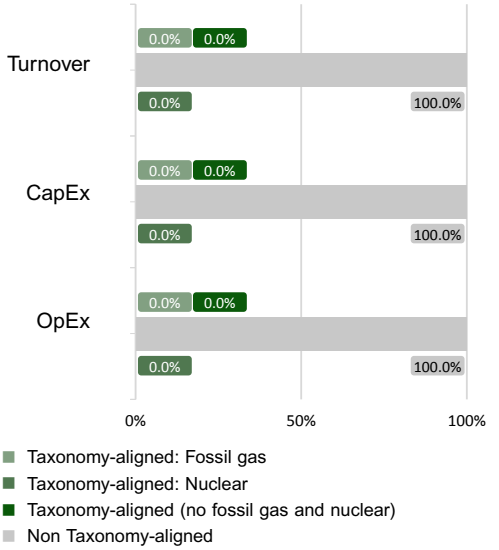
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 96% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 22.29% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 37.53% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Legal entity identifier: 549300IQSMKIXHBFRJ95

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **62.07%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 5.63 Benchmark: 4.53

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. …and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%	2.26%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 4.47 Benchmark: 3.60	Fund: 3.95 Benchmark: 3.20	Fund: 3.95 Benchmark: 3.14

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

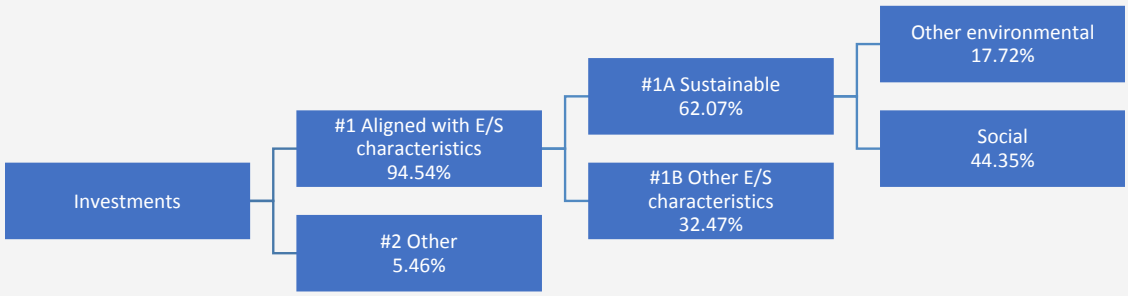
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country

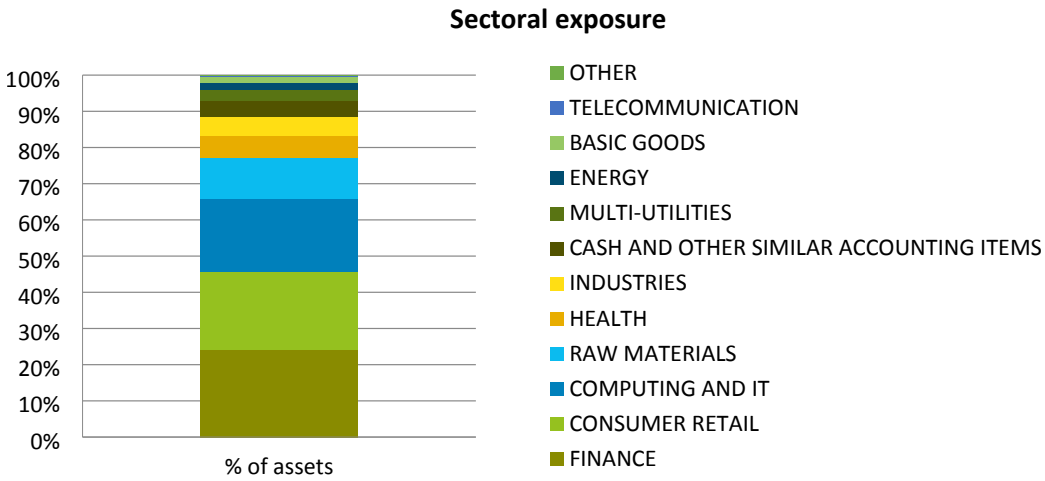
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

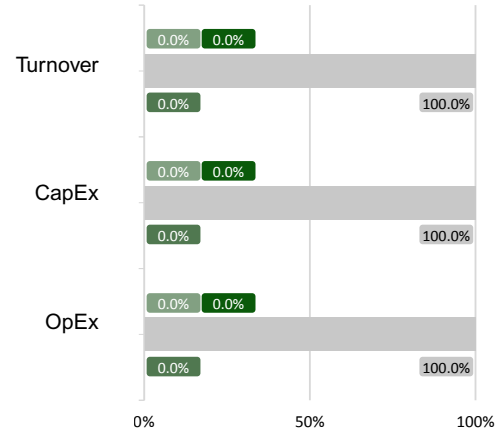
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

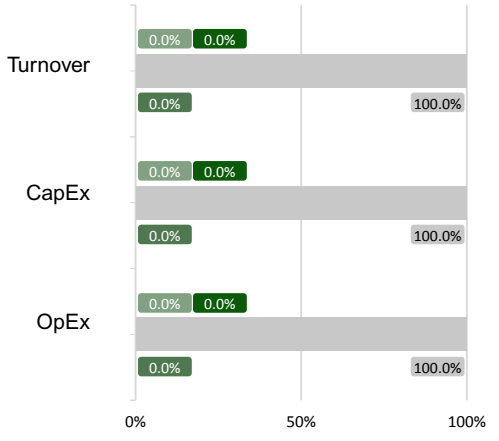
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 17.72% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 44.35% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Asian Equity Opportunities

Legal entity identifier: 549300FTPG064FH2CT76

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **59.06%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.25%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.49 Benchmark: 6.24

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

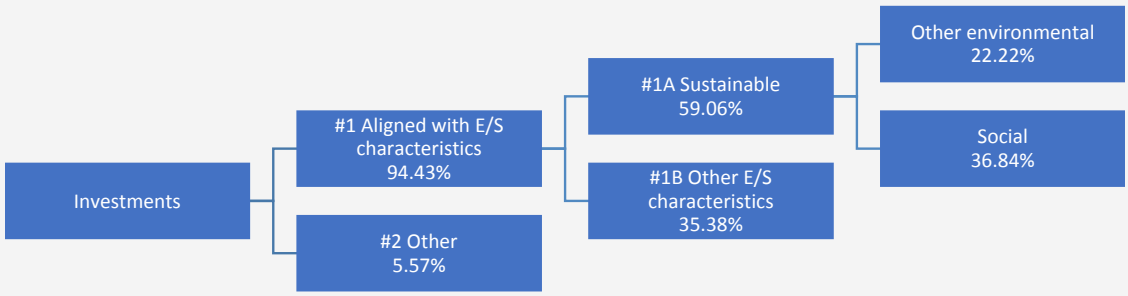
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

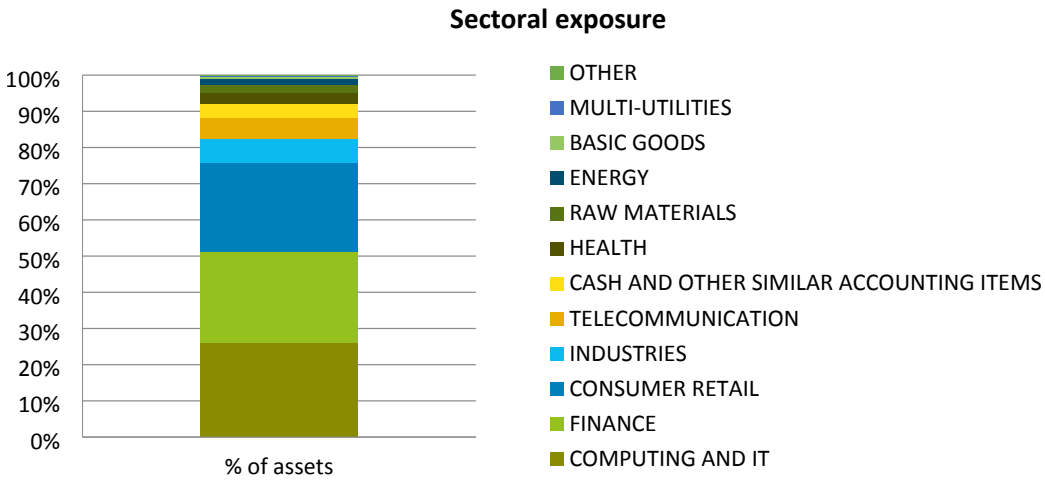
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

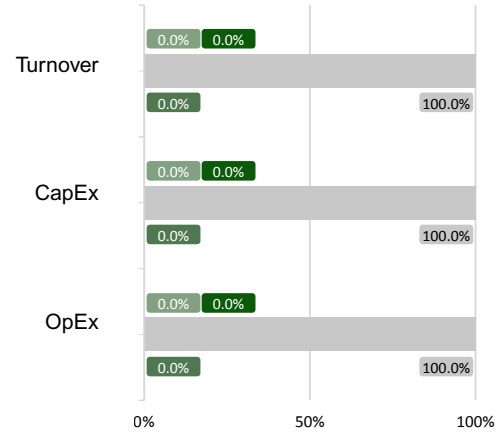
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

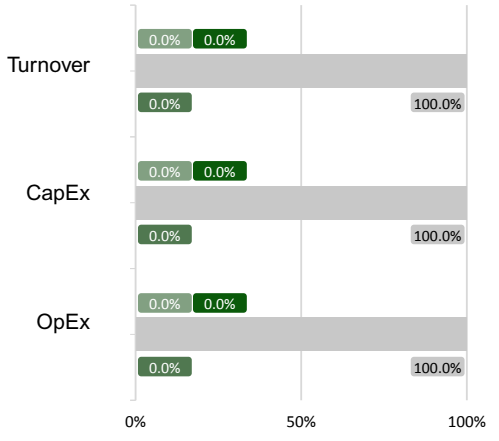
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 22.22% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 36.84% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity Emerging Markets

Legal entity identifier: 5493009TA3BCQ5UYZM58

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **60.15%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.20%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.42 Benchmark: 6.11

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.02%	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.11 Benchmark: 5.80	Fund: 6.19 Benchmark: 5.70

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

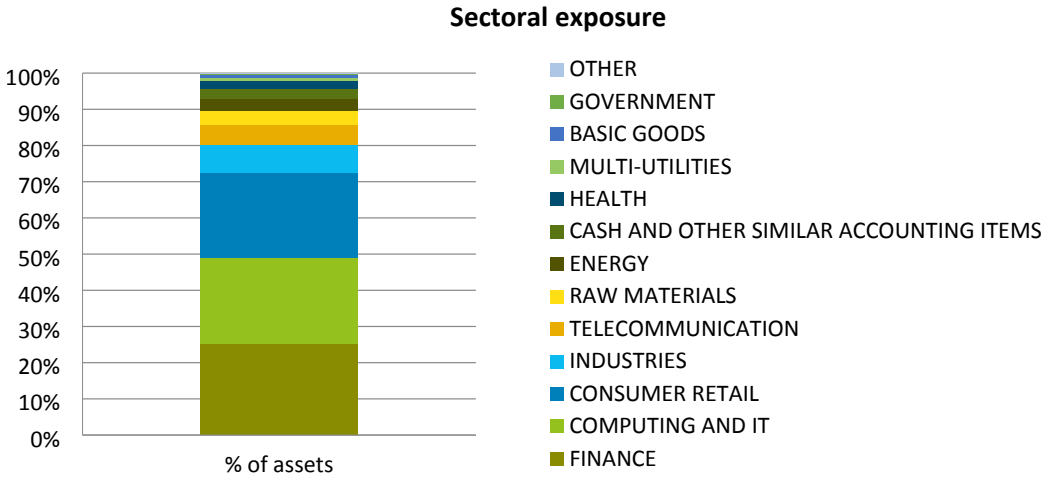
What was the proportion of sustainability-related investments?



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

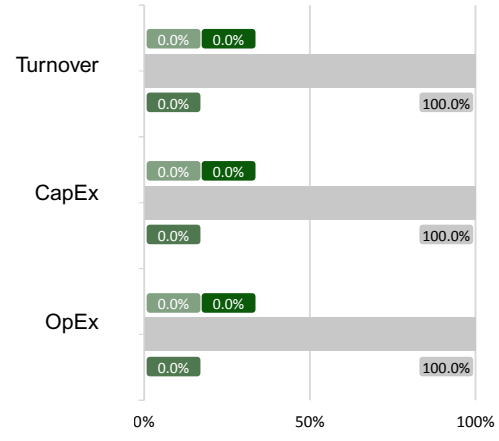
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

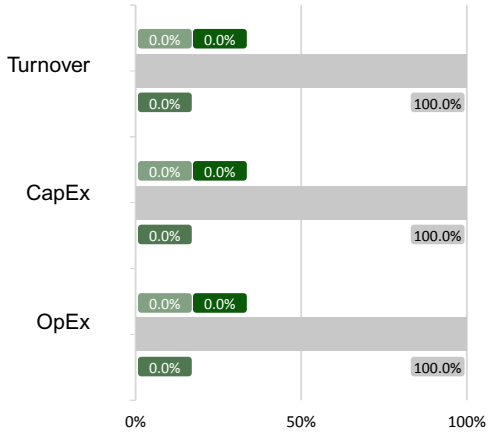
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 23.71% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 36.44% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Global Equity

Legal entity identifier: 391200OMHPU2MRXB0Z02

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **44.44%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund has promoted environmental and/or social characteristics by investing in corporate issuers which respect a negative screening process, aimed at excluding from the investment universe the issuers belonging to sectors considered “not responsible” and/or whose conduct is such to determine significant environmental and/or social adverse impacts and/or most exposed to sustainability risks (so-called “critical issuers”), and it has committed to make a minimum proportion of sustainable investment (“Sustainable Integration”) pursuant to Regulation (EU) 2019/2088 (“SFDR”).

In particular, from an environmental point of view, by investing in corporate issuers, the fund has promoted the limitation of greenhouse gas emissions and the production or consumption of renewable energy and, from a social point of view, the respect of social and labour standards and of human rights.

With reference to the environmental and/or social characteristics promoted by the fund, the main sustainability indicators chosen to measure their compliance are shown for each of them:

Limitation of greenhouse gases emissions:

– Absence of investments in companies that generate revenues from (i) the mining or production of electricity from thermal coal above 25% of their revenues (or 20% if the company has expansion plans) or (ii) oil sands extraction above 10% of their revenues, contributing in this way to limiting greenhouse gas emissions;

– Absence of investments in companies with a greenhouse gas intensity above a specific tolerance threshold, unless having a decarbonization target (self-declared or approved by the Science Based Target Initiative) or at least 5% of their revenues aligned with the technical criteria for environmentally sustainable economic activities of the Regulation (EU) 2020/852 (“EU Taxonomy”).

Production or consumption of renewable energy:

– Absence of investments in companies belonging to “high impact” climate sectors (defined based on the statistical classification of economic activities (so-called “NACE”), included between A-H; L) that have an energy consumption intensity above a specific sector-based tolerance threshold, unless (i) producing or consuming renewable energy; or (ii) having a decarbonization target (self-declared or approved by the Science Based Target Initiative); or (iii) having at least 5% of their revenues aligned with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy.

These exclusions/limitations do not apply to “green bonds” and “sustainability bonds” intended to finance projects that, among other objectives, are aimed at contrasting global warming.

Respect of social and labour standards:

– Absence of investments in companies in violation of the Principles of the United Nations Global Compact (so-called "UNGC Principles"), the Organisation for Economic Co-operation and Development's Guidelines (so-called "OECD Guidelines") for Multinational Enterprises, the Principles of the International Labour Organisation (so-called "ILO Principles") and of the United Nations on business and human rights (so-called "UNGP Principles"), as assessed by the management company

Respect of human rights:

– Absence of investments in companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous).

Sustainable Integration:

– Percentage of investments in sustainable corporate issuers and in bond instruments intended to finance projects that contribute, among other objectives, to contrasting global warming and/or promoting social progress (so-called green/social/sustainability bonds).

Finally, the fund promotes the proactive interaction with corporate issuers by exercising participation and voting rights, and engagement with investees, encouraging effective communication with the management of companies.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be "responsible", identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: "critical" issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Exclusions relating to negative environmental externalities	The weight of issuers (i) with greenhouse gas intensity above a specific tolerance threshold of carbon dioxide (CO2) equivalent per million euro of revenue, except for those with a decarbonisation target (self-declared or approved by the Science Based Target Initiative) or have at least 5% of their revenues aligned with the technical criteria for eco-sustainable economic activities of the EU Taxonomy, (ii) belonging to sectors with a 'high climate impact' (identified according to the statistical classification of economic activities (known as 'NACE'), between A-H; L) with an energy consumption intensity higher than the respective sectoral tolerance threshold, with the exception of those that produce or consume renewable energy, or have a decarbonisation target (self-declared or approved by the Science Based Target Initiative) or have at least 5% of their revenues aligned with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy.	0.00%
Exclusions relating to negative social externalities	The weight of issuers in violation of the UNGC Principles, the OECD Guidelines, the UNGP Principles and the ILO Principles as assessed by the management company.	0.00%
"Sovereign Screening" exclusion	The weight of investments in countries with greenhouse gas emissions (GHG) exceeding 850 tonnes of "CO2 equivalents" per million euros of GDP, taking into account differences in purchasing power.	0.00%
Sustainable Integration	Percentage of investments in corporate issuers deemed sustainable by the management company and in bond instruments intended to finance projects that contribute, among other objectives, to contrasting global warming and/or promoting social progress (so-called green/social/sustainability bonds).	44.44%

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments using data made available by MSCI Solutions, pursuant to which the positive contribution to an environmental and/or social objective for a corporate issuer is assessed as follows:

– the degree to which the issuer's products and services or operations are aligned with the Sustainable Development Goals promoted by the United Nations (SDGs); or

– the alignment of the issuer's revenues and/or capital expenditures (“capex”) with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy; or

– the issuer has set decarbonization targets consistent with limiting global temperature rise to 1.5°C, validated by the “Science Based Target Initiative” (so-called “SBTi”),

provided that such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and the companies benefiting from such investments comply with good governance practices.

In addition, the management company considers as sustainable investments bond instruments intended to finance projects that, among other objectives, aim at contrasting global warming and/or to promote social progress (“green bonds”, “social bonds”, “sustainability bonds”) and issued in compliance with the Green Bond Principles, the Social Bond Principles or the Sustainability Bond Guidelines, as defined by the International Capital Market Association (ICMA) and the European framework known as the Green Bond Standard.

The fund does not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund might invest in activities that may be considered as environmentally sustainable according to its investment policy, but such investments are not per se decisive to the attainment of the fund’s environmental objectives.

Alignment of an issuer’s products and services or operations with the Sustainable Development Goals (SDGs):

The Sustainable Development Goals aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: combating poverty and hunger; the right to health, work and education; gender equality and reduction of inequalities; access to water and energy; urbanization and promotion of resilient infrastructure; combating climate change; and environmental protection including preservation of marine and terrestrial ecosystems.

The management company’s internal methodology aims to select issuers, through a “positive”/”negative” evaluation, whose activities contribute to one or more of the 17 SDGs (i.e., issuers with at least one SDG with a score equal to or above 2) without any misalignment (i.e., with a score equal to or below -2) to any of the 17 SDG. For each SDG, based on data made available by MSCI Solutions, the following are estimated:

– The degree of alignment of an issuer’s products and services, taking into account the revenues and the potential adverse impacts (so-called “Product Alignment”)

– The degree of alignment of an issuer’s operations (including internal policies, objectives and practices implemented and potential adverse impacts) (so-called “Operational Alignment”).

The degree of alignment of the issuer is expressed on a net base, i.e. it takes into account the positive/negative contribution and it is expressed on a scale from -10 “Strongly Misaligned” to +10 “Strongly Aligned”. Issuers with scores:

– equal to or less than -2 have “Misaligned” activities in relation to the individual SDG;

– equal to or higher than 2 present “Aligned” activities in relation to the individual SDG;

– between -2 (excluded) and 2 (excluded) have “Neutral” activities for the individual SDG.

Alignment of an issuer’s revenues and/or capital expenditures with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy:

For the purpose of assessing positive contribution to environmental objectives, the management company’s internal methodology considers whether an issuer’s revenues and/or capex are aligned with the technical criteria for environmentally sustainable economic activities of the EU Taxonomy Regulation, at least to the following degree:

– 20% of turnover; or

– 5% of turnover and 50% of capital expenditures (“capex”).

Issuers with decarbonization targets validated by the “Science Based Target Initiative”:

The management company’s internal methodology considers an issuer to contribute positively to an environmental objective where it has defined science-based net-zero targets consistent with limiting global temperature rise to 1.5° C and these are validated by SBTi.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The methodology adopted by the management company for the selection of sustainable investments, for the purpose of verifying compliance with the principle of not causing significant harm, considered all the main mandatory adverse impact indicators listed in Table 1 of Annex I to Regulation (EU) 2022/1288, applying specific quantitative tolerance thresholds for each indicator, as detailed on the management company website ***https://www.eurizoncapital.com/en/sustainability/sustainability-policy***.

The principle of do not cause significant harm is also assessed taking into account additional safeguards considerations which would prevent an issuer to be considered as “sustainable investment” when:

– its products and services or operations are misaligned to the SDGs, assessed on the basis of selected quantitative and qualitative metrics, including the exposure to controversies;

– it has the lowest ESG rating (“CCC”) assigned by MSCI Solutions;

– it is involved in the cultivation and production of tobacco;

– it lacks a minimum set of disclosure, in particular with regards to its GHG emissions and social matters (unadjusted gender pay gap or diversity in its Board).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The methodology adopted by the management company for the selection of sustainable investments, for the purpose of verifying compliance with the principle of not causing significant harm, considered all the main mandatory adverse impact indicators listed in Table 1 of Annex I to Regulation (EU) 2022/1288, applying specific quantitative tolerance thresholds for each indicator, as detailed on the management company website ***https://www.eurizoncapital.com/en/sustainability/sustainability-policy***.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The management company's internal methodology takes into account adverse impacts on sustainability factors through the definition of specific tolerance thresholds for each indicator, including the violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

In particular, issuers with "very severe" controversies (equivalent to a Controversy Score of 0, on a scale from 0 to 10, where 10 indicates that a company is not involved in any major controversies) related to the violation of OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as determined by MSCI Solutions, do not qualify as "sustainable".

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the "principal adverse impacts" (or "Principal Adverse Impact Indicators", "PAI") of investment decisions on sustainability factors, together with the definition of the related mitigation actions, are an integral part of Eurizon's approach to sustainability.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called Principal Adverse Impact Indicators are taken into consideration within the managed portfolios, pursuant to Article 7 of the SFDR Regulation.

The framework provides for the use of specific indicators, as set out in Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of each financial product, based on the safeguards already established by the Company, which include the use of:

– Negative screening, for the purposes of (i) integrating sustainability risks within the Investment Process of the managed portfolios and (ii) introducing additional restrictions to the investable universe, depending on the sustainability ambition of the products. In this regard, the Company has defined specific limitations (exclusions or restrictions) applicable to certain corporate and/or government issuers, with the aim of avoiding investments in financial instruments more exposed to the risk of value loss due to environmental, social or governance related events or conditions.

With respect to corporate issuers, the Company applies restrictions based on involvement in sectors considered "non responsible" and/or conduct that may result in significant negative environmental and/or social impacts, including:

(i) companies deriving their revenues, beyond the applicable tolerance thresholds, from extraction activities or electricity generation linked to thermal coal or from oil sands exploitation; (ii) companies with clear direct involvement in the manufacturing of unconventional weapons; (iii) companies deemed to be in violation of globally accepted principles, namely the United Nations Global Compact, the OECD Guidelines, as well as ILO and UNGP principles; (iv) companies presenting material environmental, social and/or governance concerns, i.e., characterised by a "critical" ESG profile based on the rating assigned by MSCI Solutions; (v) companies with a greenhouse gas intensity (expressed in tonnes of CO equivalent per million euro of revenues) above the tolerance threshold, except for those with a decarbonisation target (self declared or approved by the Science Based Target Initiative) or with at least 5% of revenues aligned with the technical screening criteria for environmentally sustainable economic activities under the EU Taxonomy; (vi) companies operating in "high impact" climate sectors (identified according to the NACE statistical classification, between A and H or equal to L) with an energy consumption intensity above the respective sectoral tolerance thresholds, except for those producing or consuming renewable energy, or having a decarbonisation target (self declared or SBTi approved), or with at least 5% of revenues aligned with the EU Taxonomy technical screening criteria.

With respect to government issuers and agencies, the Company applies restrictions based on (i) the greenhouse gas ("GHG") emission levels of the respective national economies, covering scopes 1, 2 and 3, weighted relative to GDP and adjusted for purchasing power parity, and (ii) the inclusion of the country in the "high risk" list ("black list") of the Financial Action Task Force (FATF), due to deficiencies in anti money laundering, counter terrorism financing and anti proliferation controls.

– Positive screening of ESG factors in the analysis, selection and construction of financial portfolios, in line with good governance practices. This category includes products that promote, among others, environmental or social characteristics, or a combination thereof, or that pursue sustainable investment objectives pursuant to Articles 8 and 9 of the SFDR Regulation. These products aim to build portfolios characterised by: (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return.

– “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

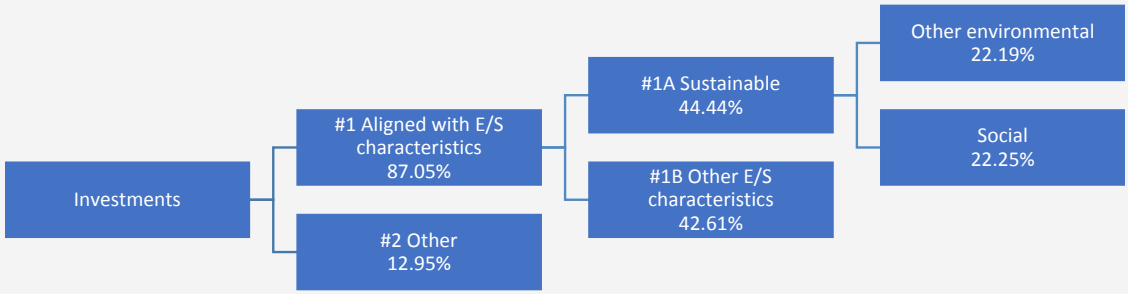
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the Fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Greenhouse gas intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Exposure to companies in high climate impact sectors with high energy consumption and no renewable energy production and consumption
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Exposure to controversial weapons

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: October 2025 - December 2025

Largest Investments	Sector	% Assets	Country
NVIDIA CORP COMMON STOCK USD.001	COMPUTING AND IT	5.50	United States

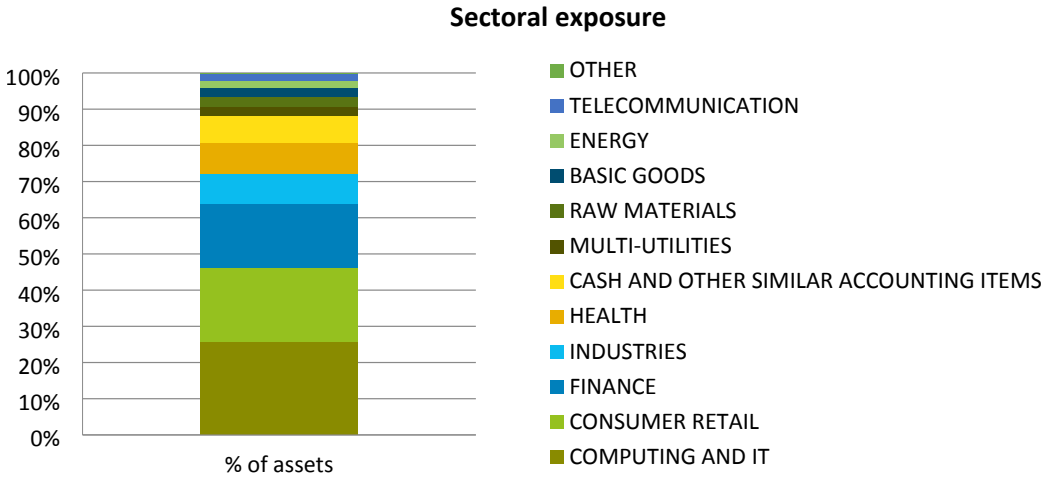
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

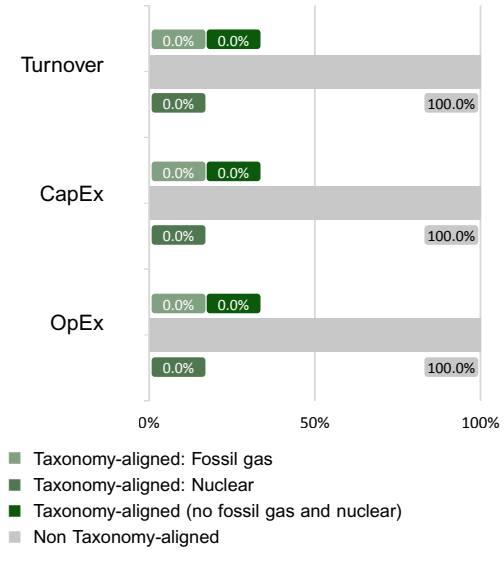
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

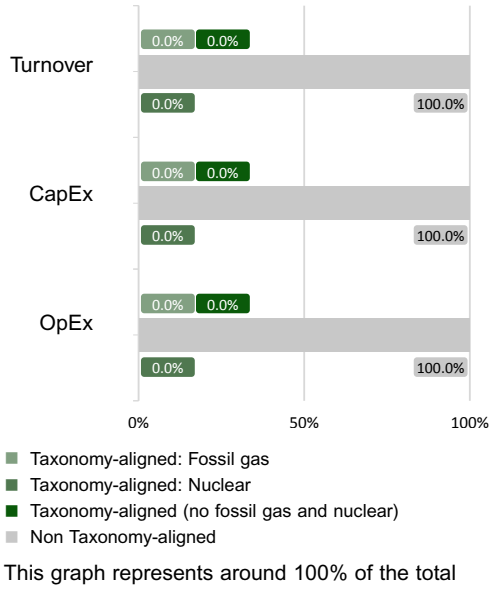
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 22.19% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 22.25% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Included in “#2 Others” are (i) liquidity held; (ii) derivative instruments other than those referring to corporate issuers promoting environmental and/or social characteristics or that are considered sustainable; and (iii) any instruments, such as total return swaps, used for efficient portfolio management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Global Equity Infrastructure

Legal entity identifier: 549300SYG2YH766FGV02

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **56.58%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO_2) generated by the investee issuers expressed as weighted average of the CO_2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.63 Benchmark: 7.23
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers.	Fund: 735.33 Benchmark: 957.82

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.38 Benchmark: 7.06	Fund: 7.41 Benchmark: 7.02	Fund: 7.52 Benchmark: 7.00
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers	Fund: 802.38 Benchmark: 961.64	Fund: 827.75 Benchmark: 1079.48	Fund: 861.34 Benchmark: 1149.56

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

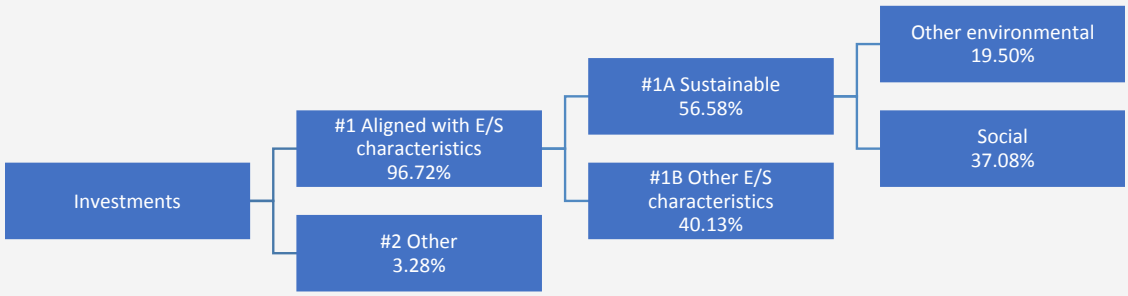
For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity

- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country
FERROVIAL SE COMMON STOCK EUR.01	INDUSTRIES	5.27	Netherlands

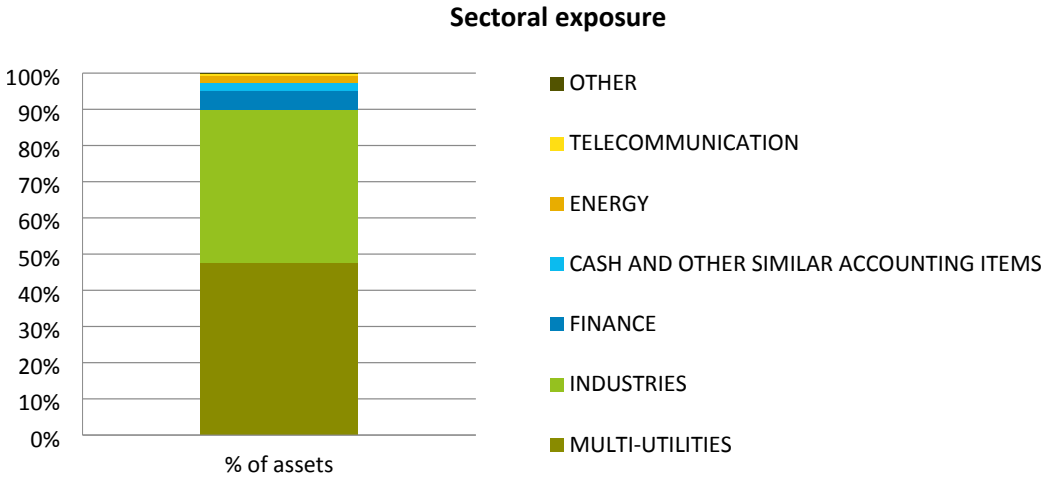
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

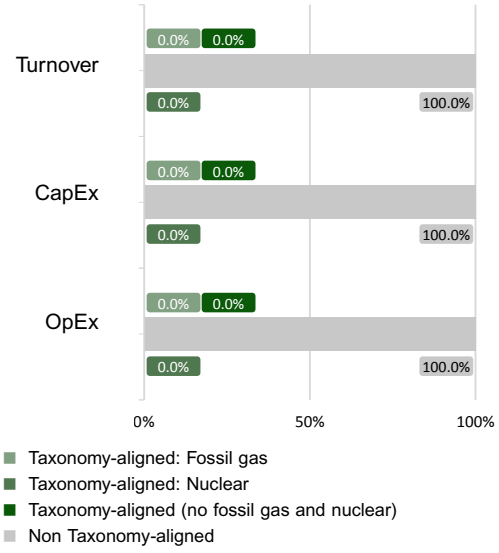
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

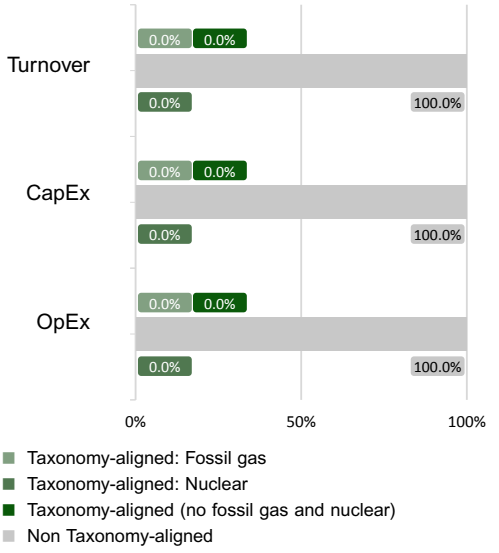
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 19.50% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 37.08% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Sustainable Global Equity

Legal entity identifier: 549300RNJ0W1IVOBL073

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **71.22%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO_2) generated by the investee issuers expressed as weighted average of the CO_2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.65 Benchmark: 6.69
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers.	Fund: 47.05 Benchmark: 94.46

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.88 Benchmark: 6.92	Fund: 7.80 Benchmark: 6.93	Fund: 7.47 Benchmark: 6.67
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers	Fund: 49.85 Benchmark: 97.96	Fund: 56.38 Benchmark: 121.23	Fund: 83.32 Benchmark: 150.21

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more

conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

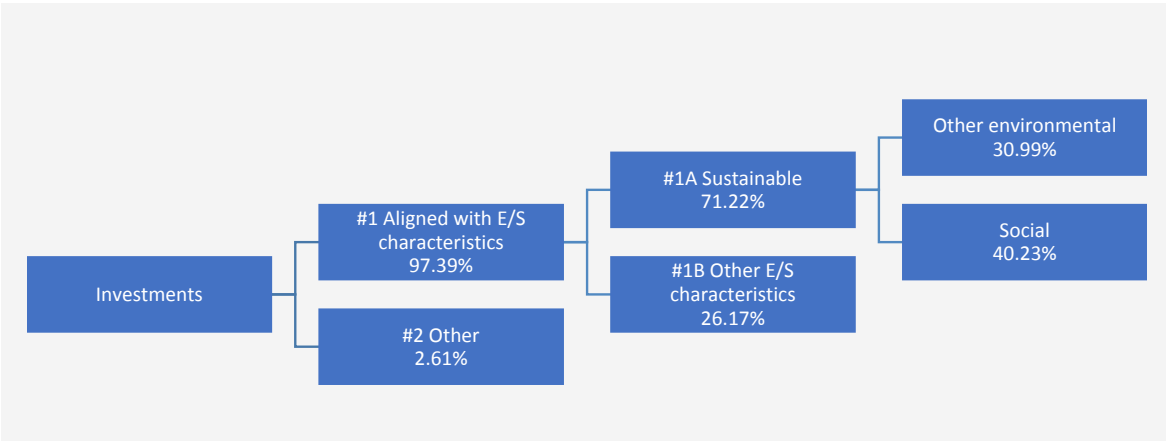
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

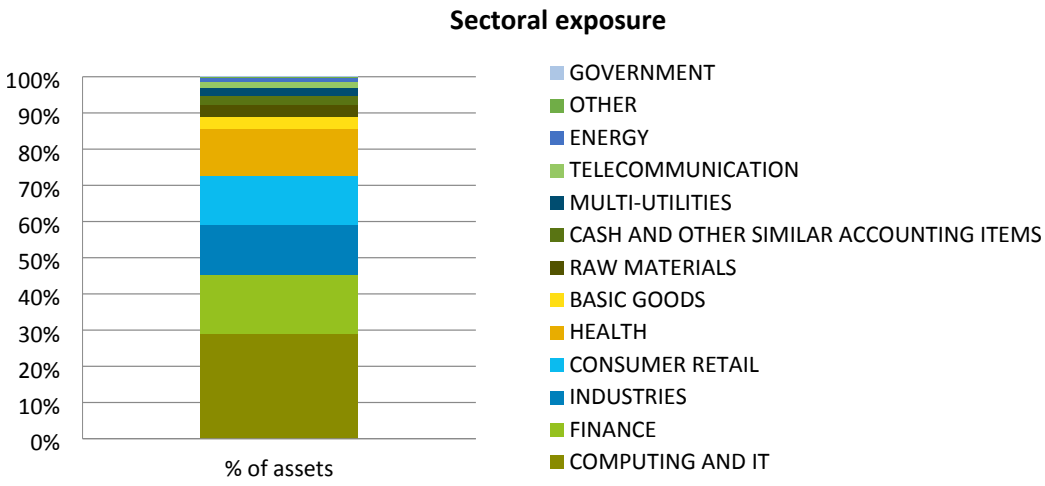
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

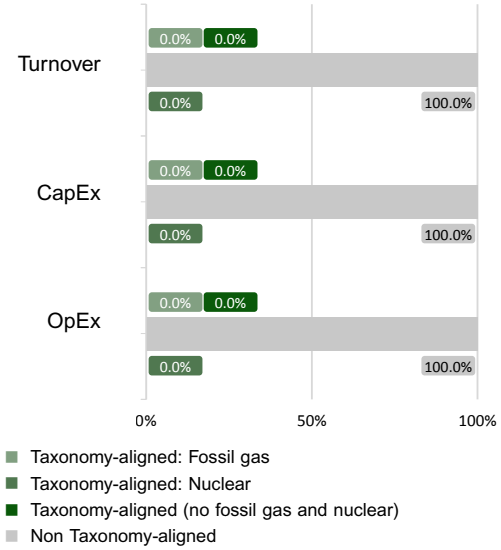
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

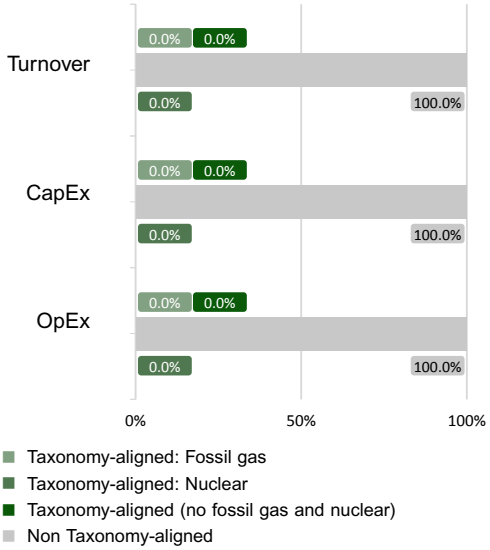
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 30.99% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 40.23% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity Planet

Legal entity identifier: 549300IKPFWCH028ZQ26

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **66.12%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO_2) generated by the investee issuers expressed as weighted average of the CO_2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.17 Benchmark: 6.69
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers.	Fund: 73.45 Benchmark: 94.39

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.37 Benchmark: 6.92	Fund: 7.38 Benchmark: 6.93	Fund: 7.43 Benchmark: 6.67
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers	Fund: 76.89 Benchmark: 97.93	Fund: 89.90 Benchmark: 121.22	Fund: 111.15 Benchmark: 150.21

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more

conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

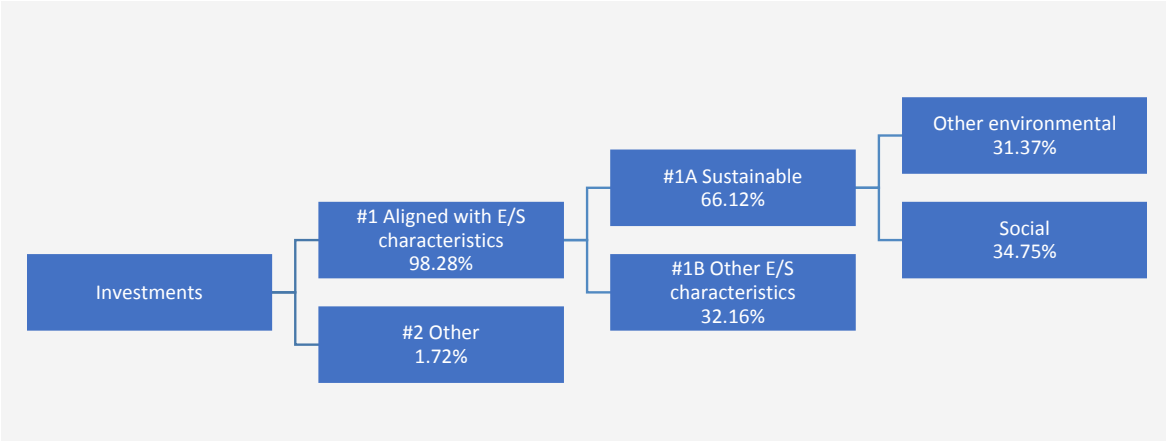
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

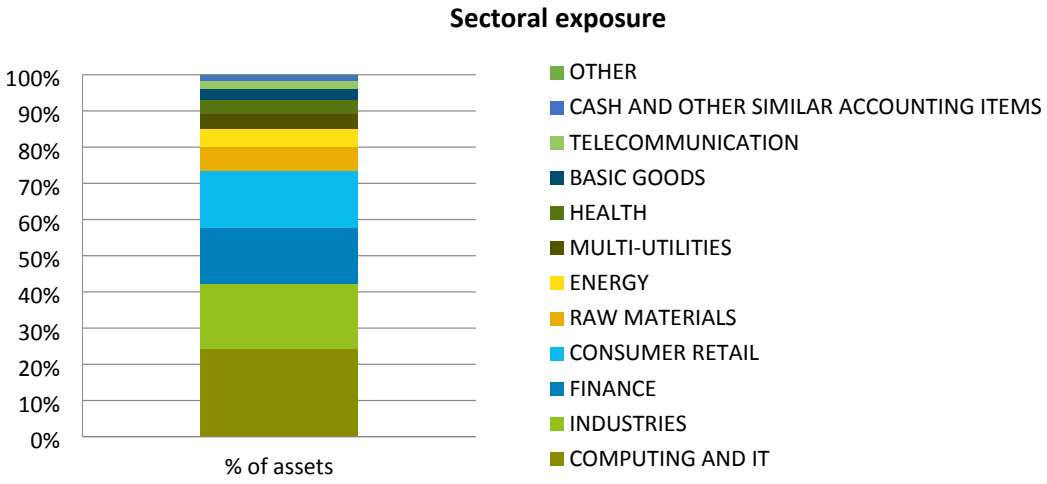
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

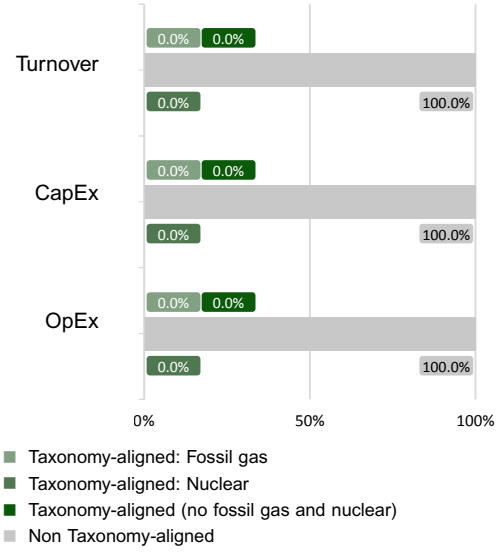
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

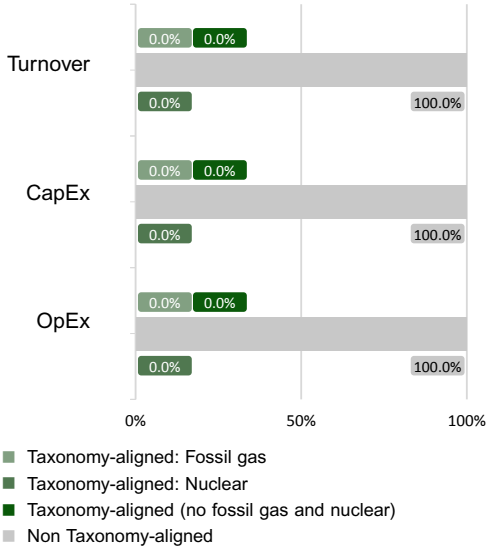
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 31.37% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 34.75% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity Innovation

Legal entity identifier: 549300XJ1BMSX5305U71

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **56.25%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.85 Benchmark: 6.69

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

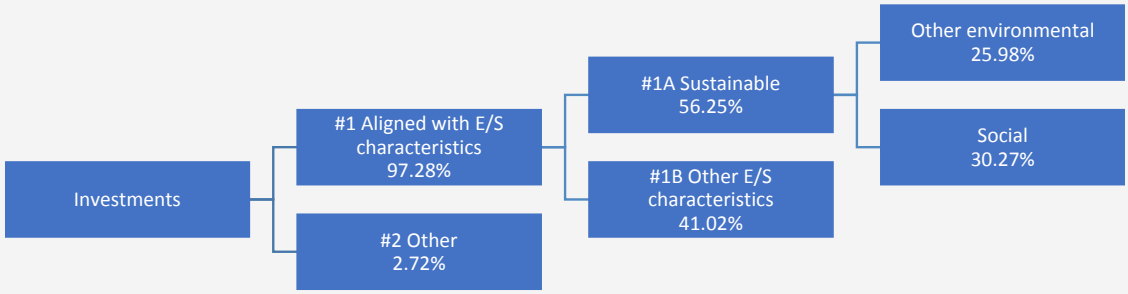
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

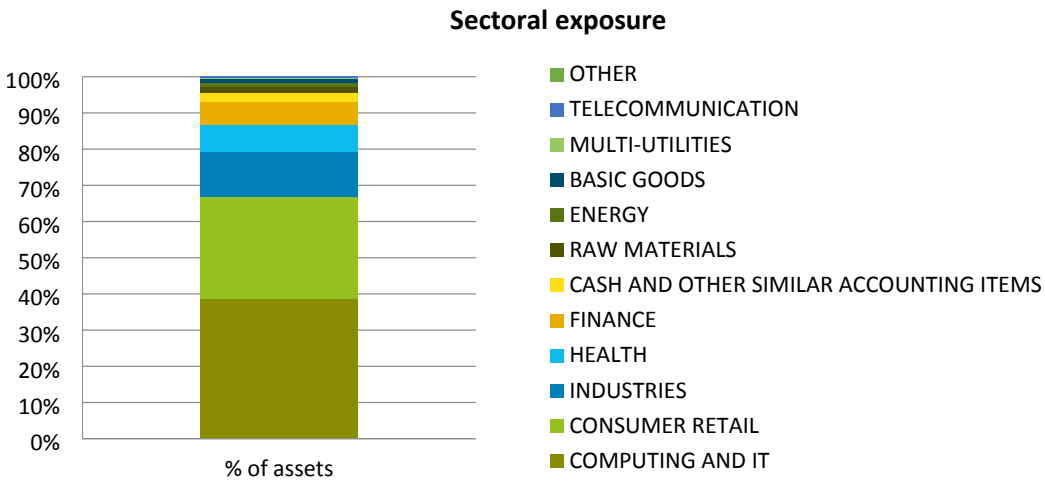
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

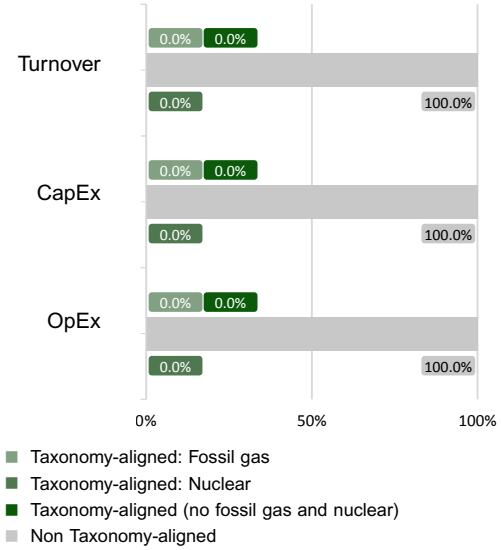
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

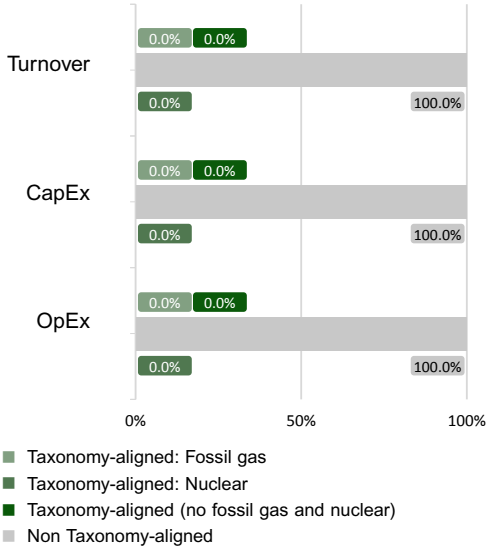
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 25.98% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 30.27% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity People

Legal entity identifier: 549300KTCY7ZH3LX6I58

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **53.60%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.73 Benchmark: 6.69

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

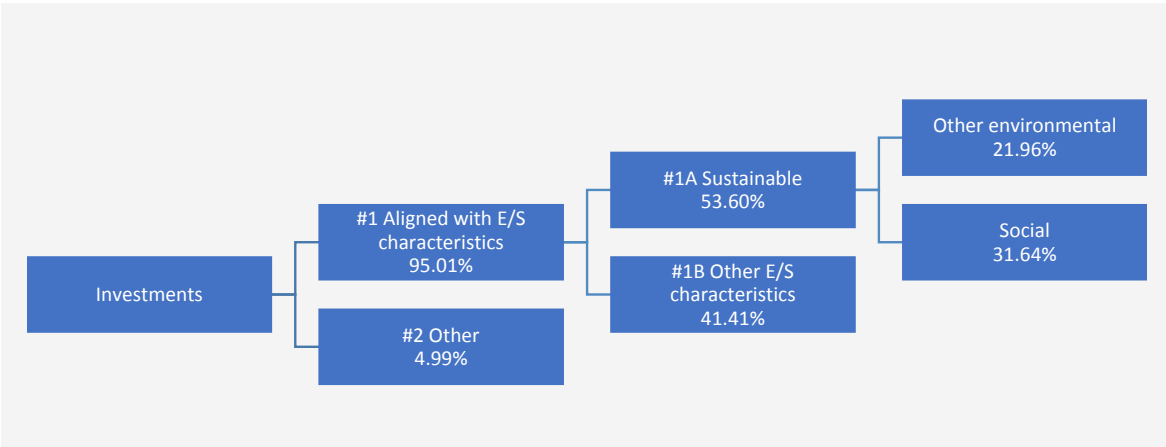
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

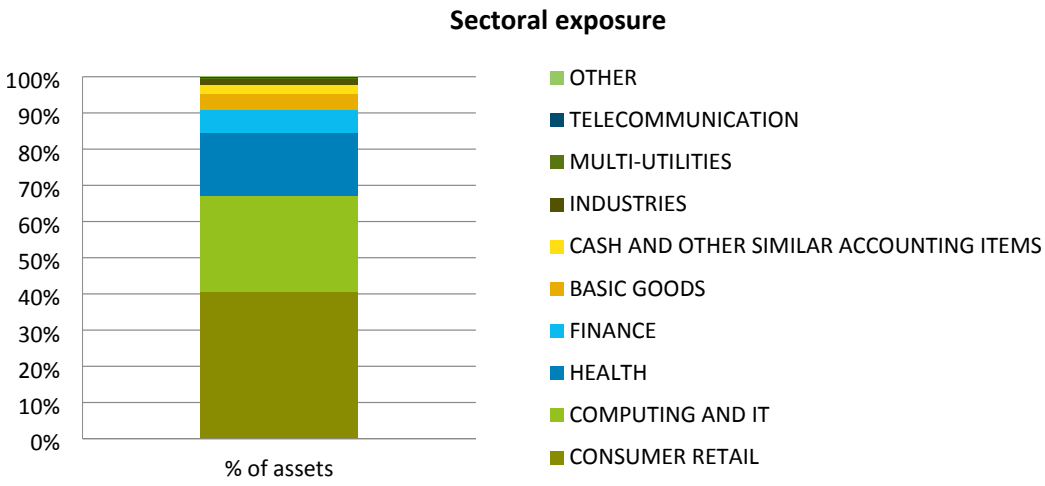
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

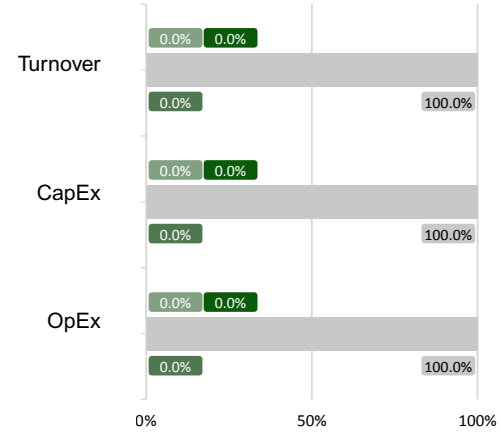
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

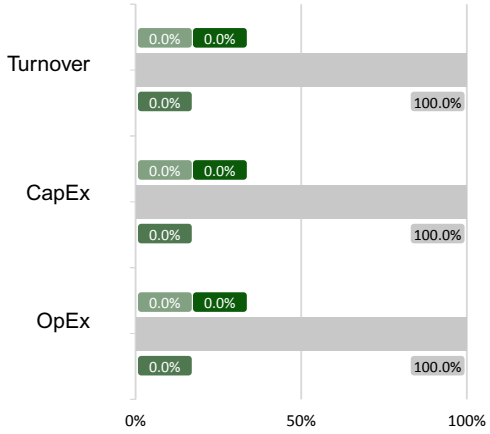
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 21.96% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 31.64% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity Circular Economy

Legal entity identifier: 549300CIDSVFR55QNS56

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **66.84%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its benchmark, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO_2) generated by the investee issuers expressed as weighted average of the CO_2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.47 Benchmark: 6.69
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers.	Fund: 47.82 Benchmark: 94.39

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. …and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.78 Benchmark: 6.92	Fund: 7.67 Benchmark: 6.93	Fund: 7.32 Benchmark: 6.73
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers	Fund: 63.83 Benchmark: 97.95	Fund: 71.16 Benchmark: 121.20	Fund: 91.95 Benchmark: 154.76

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more

conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

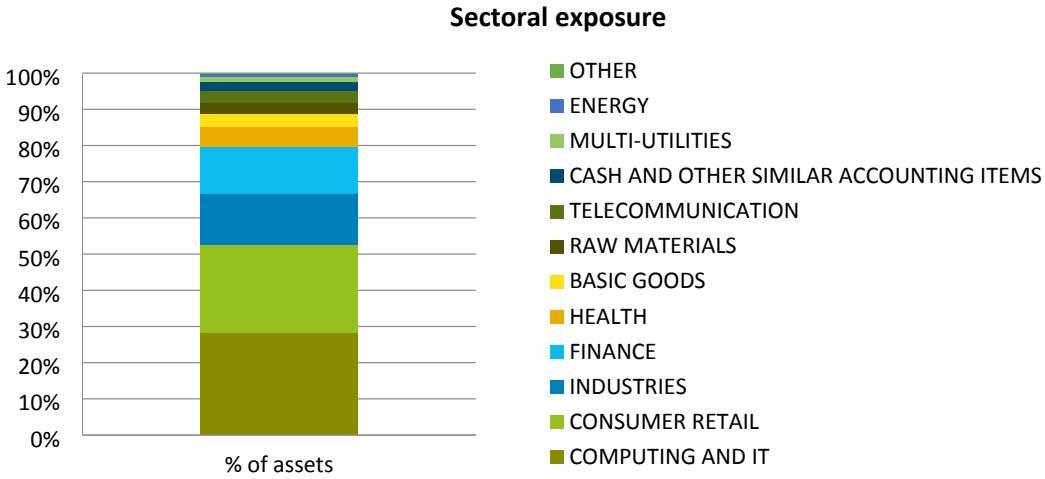
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

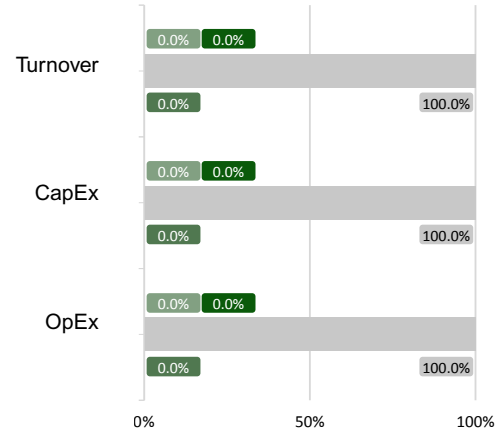
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

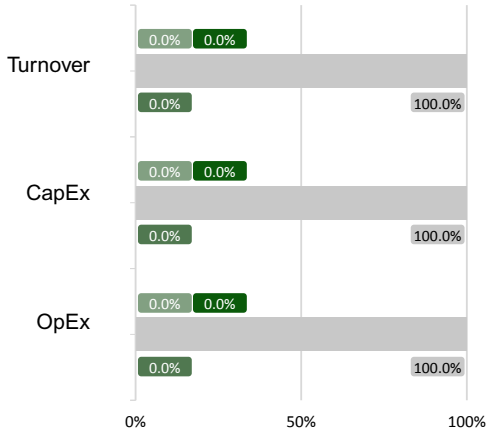
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 29.77% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 37.07% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity High Dividend

Legal entity identifier: 54930019VNMHY4HB4P36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **54.43%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.96 Benchmark: 6.69

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

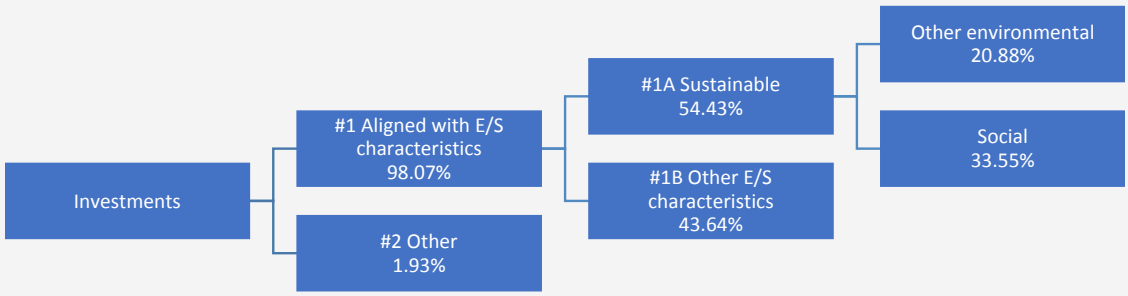
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP COMMON STOCK USD.00000625	COMPUTING AND IT	5.48	United States

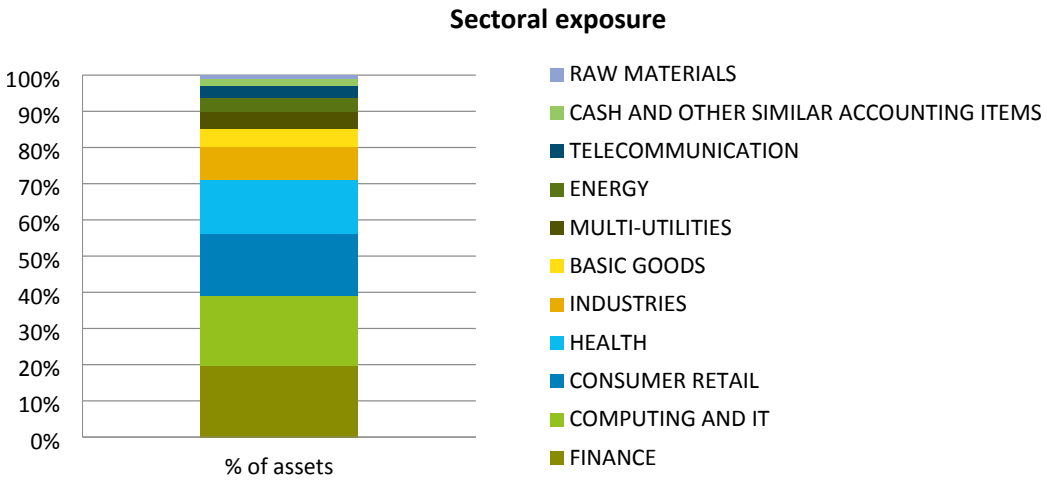
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

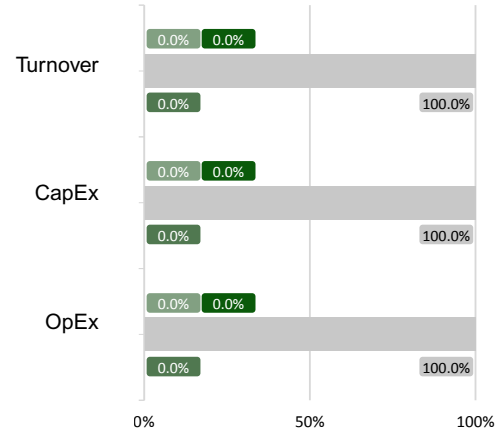
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

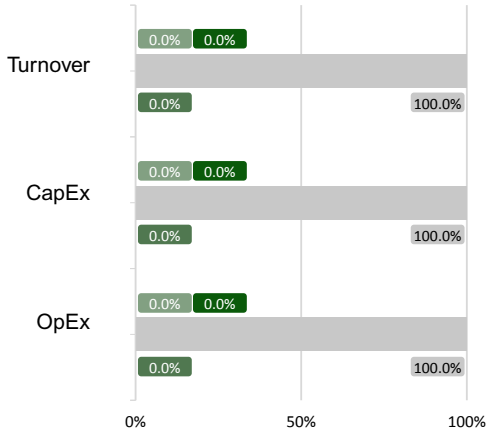
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 20.88% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 33.55% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Equity Real Estate

Legal entity identifier: 549300HZ88MZIPCKGJ29

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **89.34%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which the maximum direct investment allowed is equal to the weight of the issuer in the reference benchmark.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its benchmark. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.62 Benchmark: 6.27

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

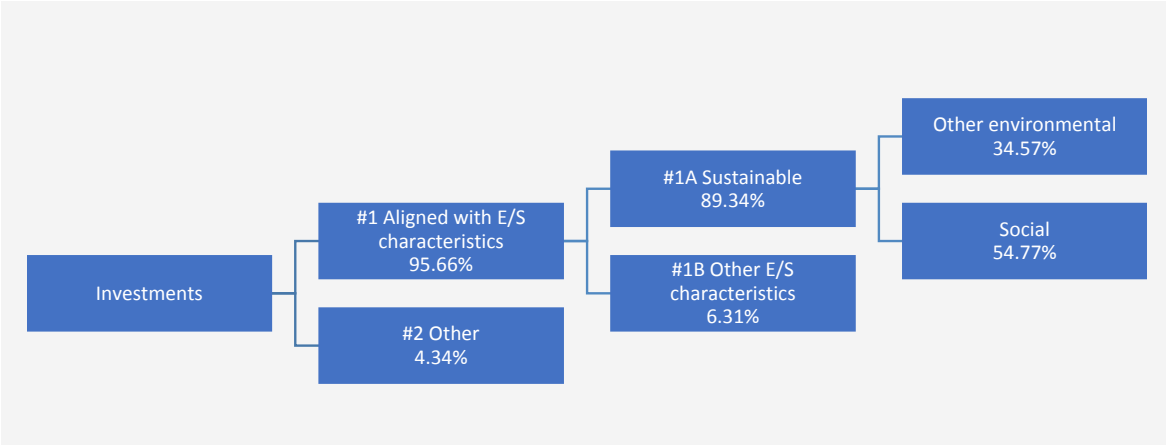
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country
WELLTOWER INC REIT USD1.0	FINANCE	6.63	United States
VENTAS INC REIT USD.25	FINANCE	6.26	United States

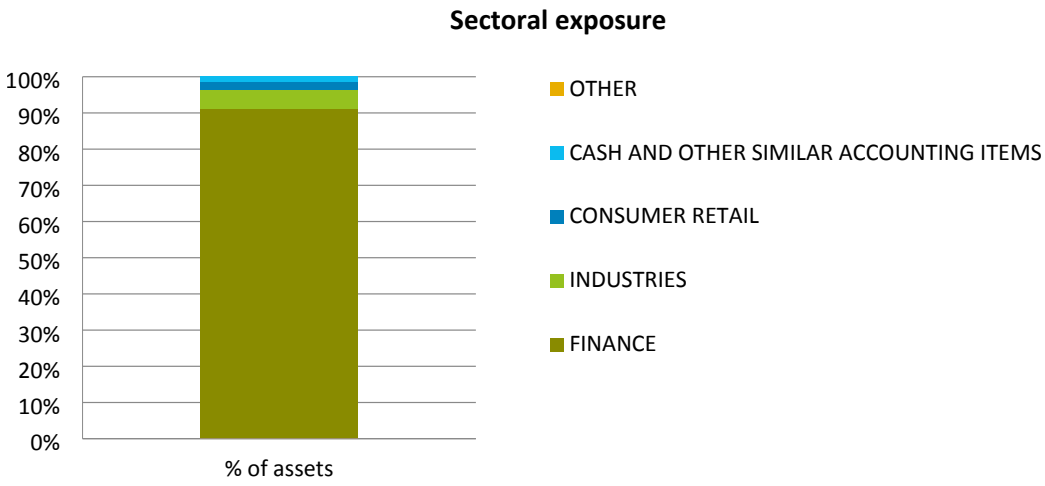
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

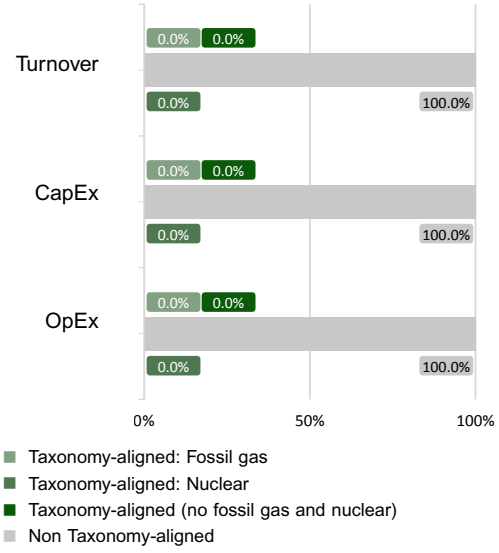
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

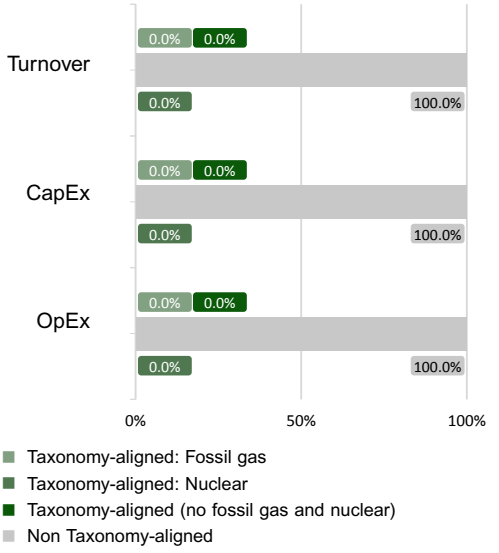
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 34.57% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 54.77% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Absolute Green Bonds

Legal entity identifier: 54930037WL2JEAS2P906

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☑ **Yes**	●○ ☐ **No**
☑ It made **sustainable investments with an environmental objective**: 95.18%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___**%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☑ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☑ It made **sustainable investments with a social objective**: 0.04%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The management company has adopted a sustainable investment selection methodology based on the 17 Sustainable Development Goals (so called "Sustainable Development Goals" or "SDGs") promoted by the United Nations. This methodology, in accordance with good governance practices, aims to proposes to select securities issued by companies whose products/services and processes contribute to one or more of the SDGs, provided that said investments do not cause any significant harm to any of the environmental or social objectives set forth in Regulation (EU) 2019/2088.

In addition, the management company considers as sustainable investments, financial instruments of a bond/monetary nature aimed at financing projects that are environmentally friendly and have a positive social impact (green/sustainable bonds).

Therefore, during the reporting period, the management company monitored investments that are sustainable in accordance with Regulation (EU) 2019/2088 and investments in bond issues whose proceeds are intended to finance environmental and/or social projects.

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

Impact Investing: the fund adopts investment selection methodologies aimed at generating a social or environmental impact along with a measurable financial return.

Sustainable investment objective of this fund is attained by investing more than 80% in corporate or government bonds issued to finance climate and environmentally friendly projects such as renewable energy, energy efficiency, pollution prevention, clean transport, water management, circular economy, biodiversity conservation and green construction (green bonds).

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
Impact investing	Weight in the fund of the corporate bonds or government securities exclusively issued for financing climate- and environment-friendly projects such as renewable energy, energy efficiency, pollution prevention, clean transportation, water management, circular economy, biodiversity conservation and green construction (green bonds or other similar instruments such as social bonds and sustainable bonds).	95.17%

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%	0.00%
Impact investing	Weight in the fund of the corporate bonds or government securities exclusively issued for financing climate- and environment-friendly projects such as renewable energy, energy efficiency, pollution prevention, clean transportation, water management, circular economy, biodiversity conservation and green construction (green bonds or other similar instruments such as social bonds and sustainable bonds).	96.33%	96.72%	95.20%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of ‘do not significant harm’ (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the Fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Share of consumption of non-renewable energy
- Share of production of non-renewable energy
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies
- Investee countries subject to social violations

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

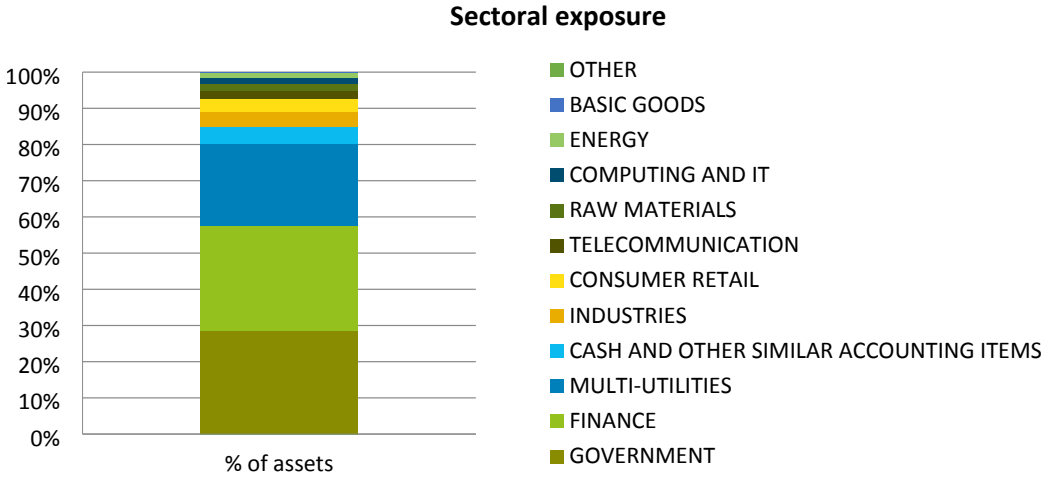
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

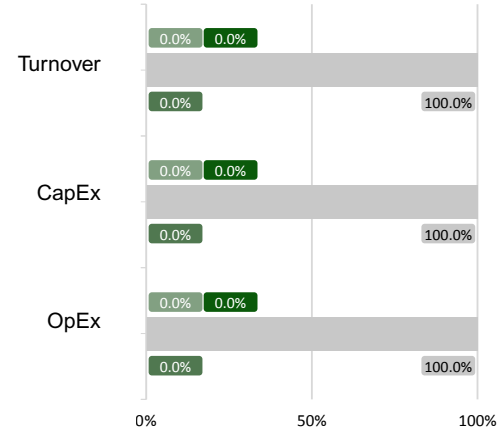
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

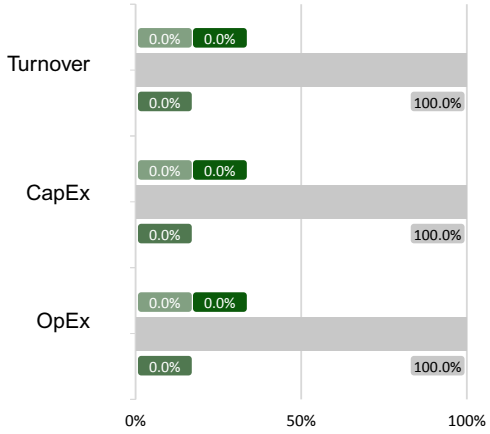
☐ Yes:

☐ In fossil gas ☐ In fossil gas



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 71% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: : 0.00%

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 95.18% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

The fund had a socially sustainable investment share of 0.04% of total investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Not sustainable": (i) any other assets according to the fund's investment policy, (ii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets, (iii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure according to its investment policy and its sustainable investment objective; (iv) instruments and techniques only used for efficient fund management as detailed in the fund's prospectus.

However "#2 Not sustainable” investments do not prevent the attainment of the sustainable investment objective. Given the nature of these investments, minimum environmental or social safeguards are not applicable

What actions have been taken to attain the sustainable investment objective during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The pursuit of the sustainable investment objective is ensured through specific investment limits.

How did this financial product perform compared to the reference sustainable benchmark?

No specific index has been designated as a reference benchmark to meet the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective

- **How did the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - High Yield Short Term

Legal entity identifier: 549300DH1CKJGW3MUW81

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **56.35%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 6.92 Investment Universe: 6.46

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

rights, anti-corruption and anti-bribery matters.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

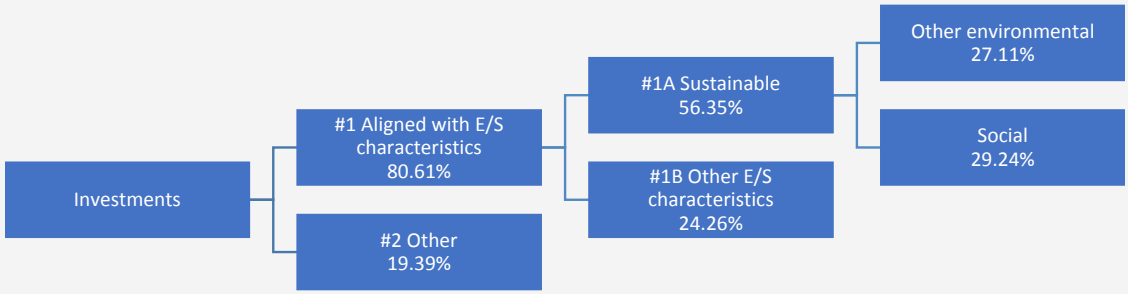
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

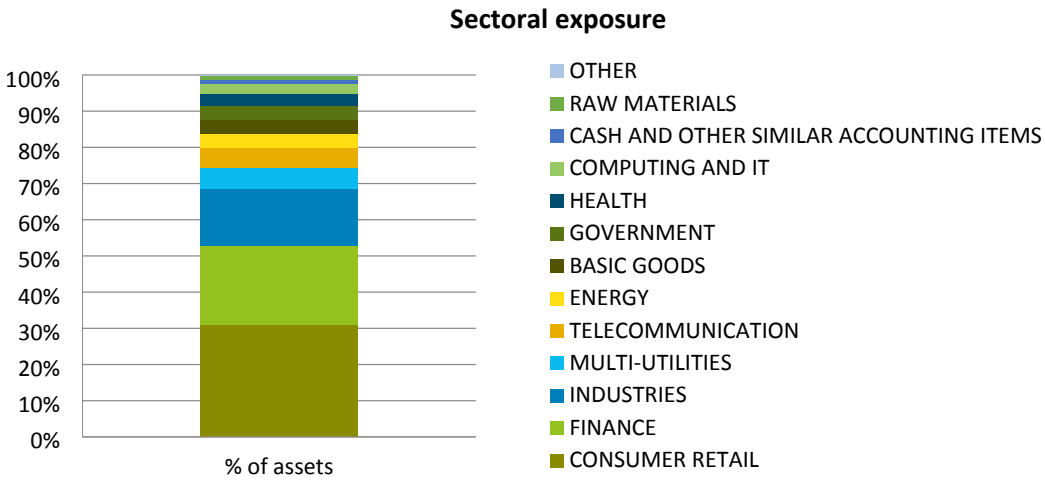
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

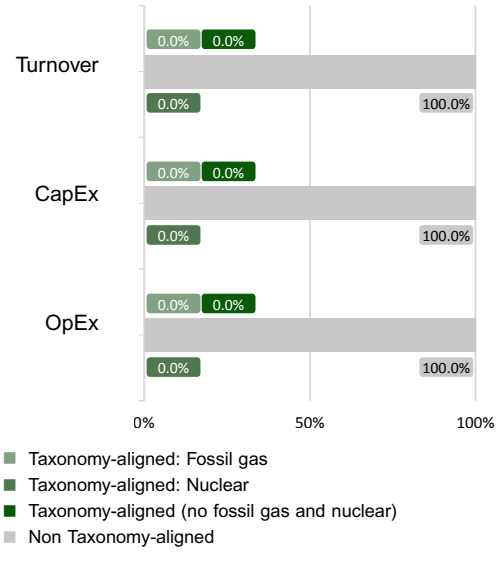
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

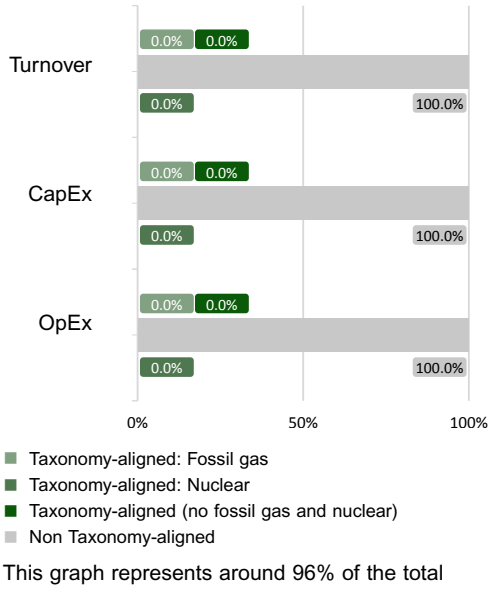
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 96% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 27.11% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 29.24% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Absolute Prudent

Legal entity identifier: 549300218827MPVDYO63

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **25.07%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

rights, anti-corruption and anti-bribery matters.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

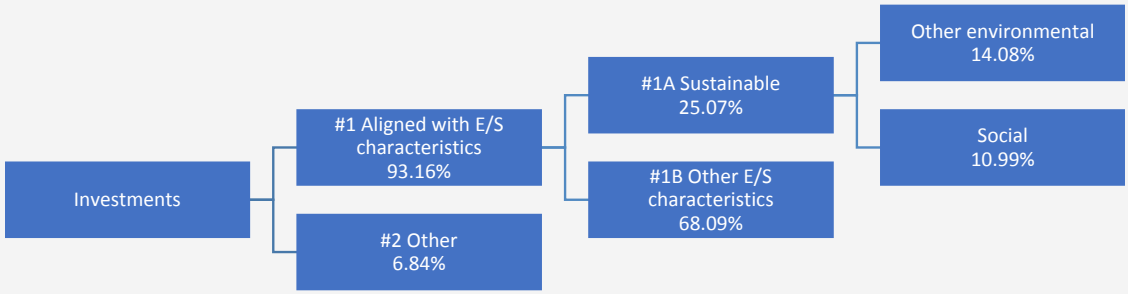
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

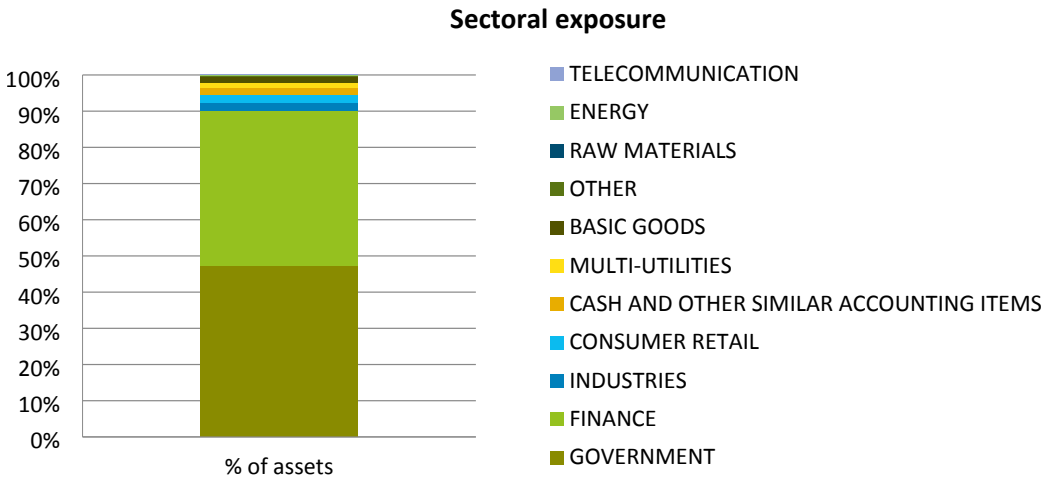
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

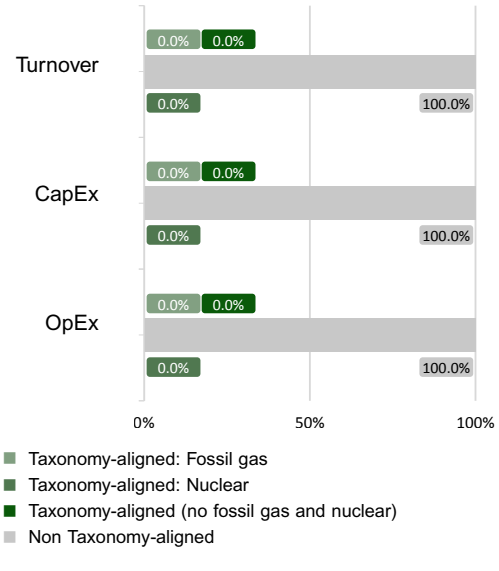
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

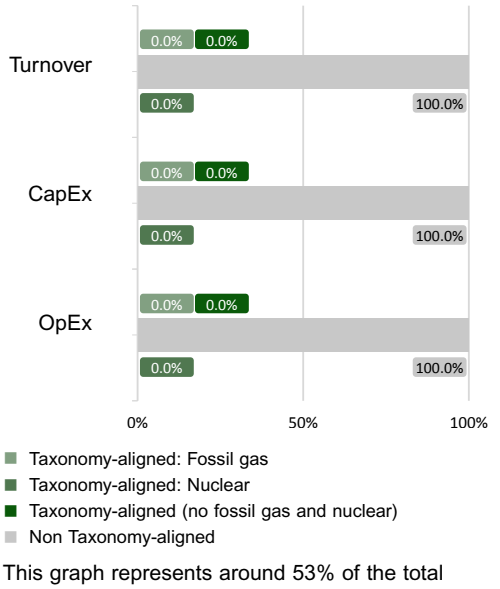
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 53% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 14.08% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 10.99% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Active Allocation

Legal entity identifier: 54930048XIABWU68BF17

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **24.64%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.90 Investment Universe: 6.74

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

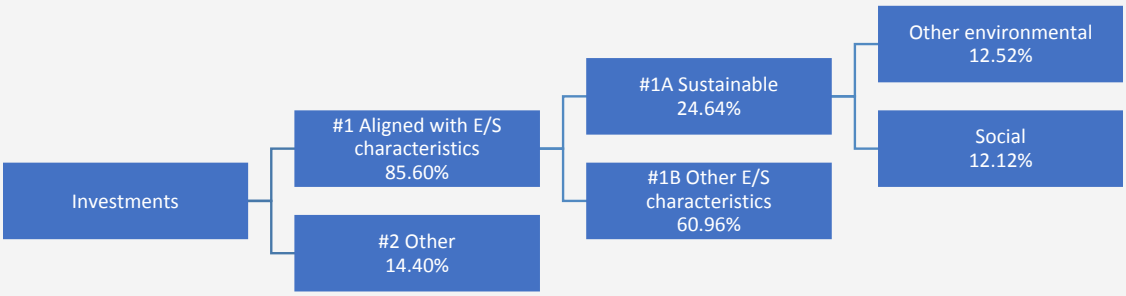
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

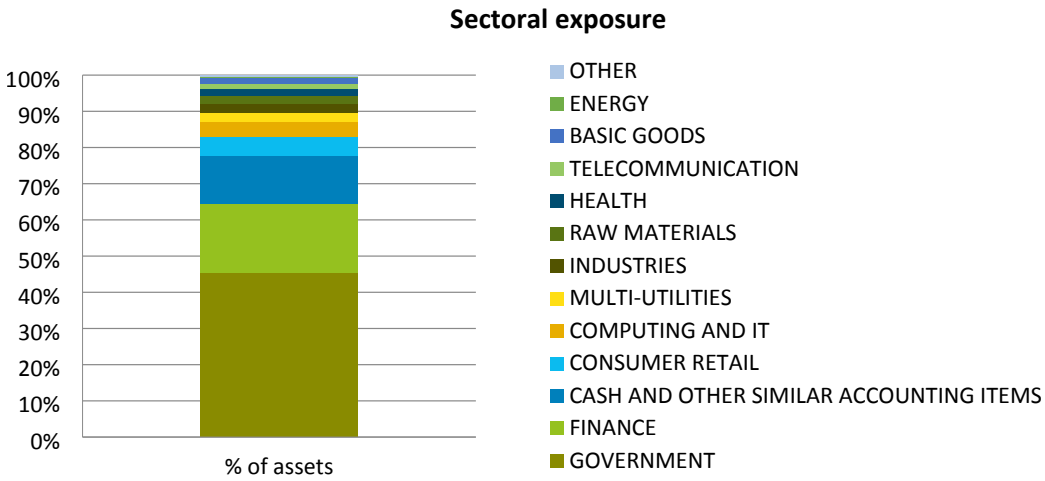
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

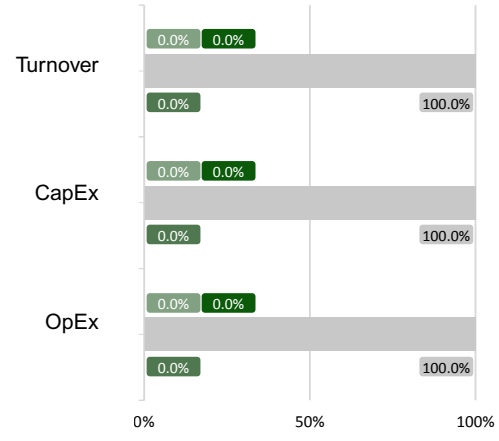
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

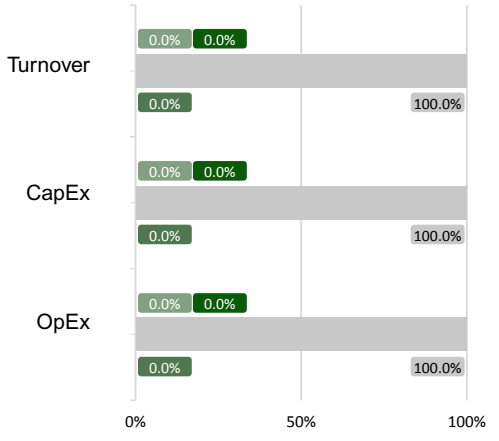
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 55% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 12.52% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 12.12% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **41.46%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Carbon footprint: the fund also aims to build a portfolio with a lower carbon footprint than that of its investment universe, by measuring direct (i.e.: Scope 1, i.e. from sources controlled or owned by the company) and indirect (i.e.: Scope 2, i.e. from energy purchased and consumed by the company) carbon dioxide emissions (CO_2) generated by the investee issuers expressed as weighted average of the CO_2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.14 Investment Universe: 6.93
Carbon footprint	Direct (i.e.: Scope 1) and indirect (i.e.: Scope 2) carbon dioxide emissions (CO2) generated by the investee issuers expressed as weighted average of the CO2 intensity (with respect to their generated sales) per the weight of each corporate issuer in portfolio. Value represents tons of carbon dioxide (CO2) per million dollars of revenue (direct and indirect Greenhouse Gas emissions). Measures CO2 emissions generated by issuers.	Fund: 75.48 Investment Universe: 86.40

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more

conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

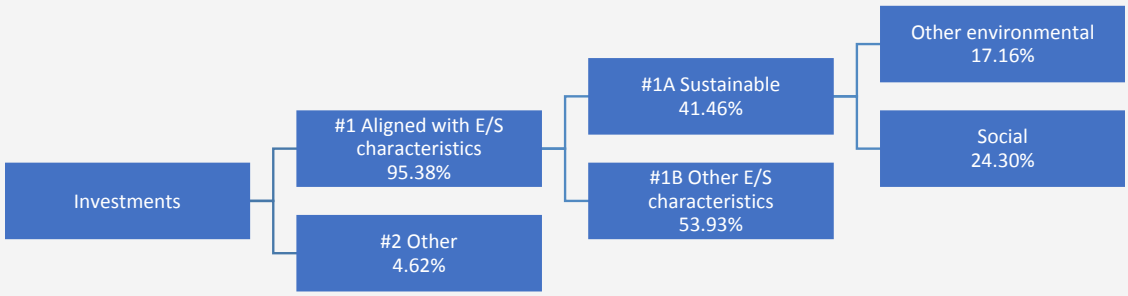
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

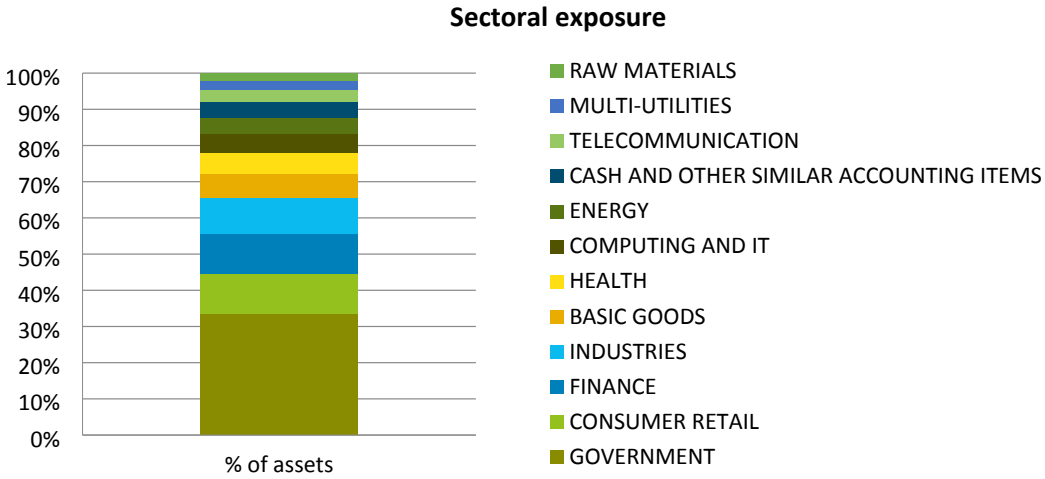
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

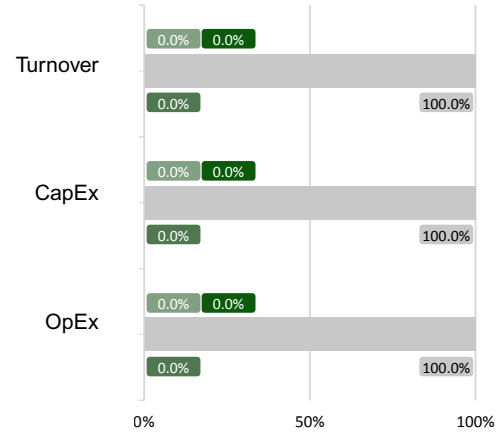
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

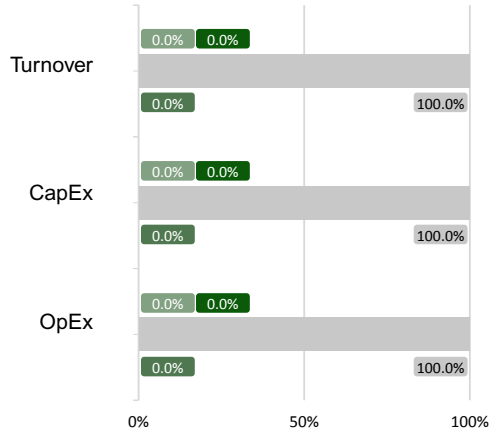
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 66% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 17.16% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 24.30% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of ‘do not significant harm’ (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

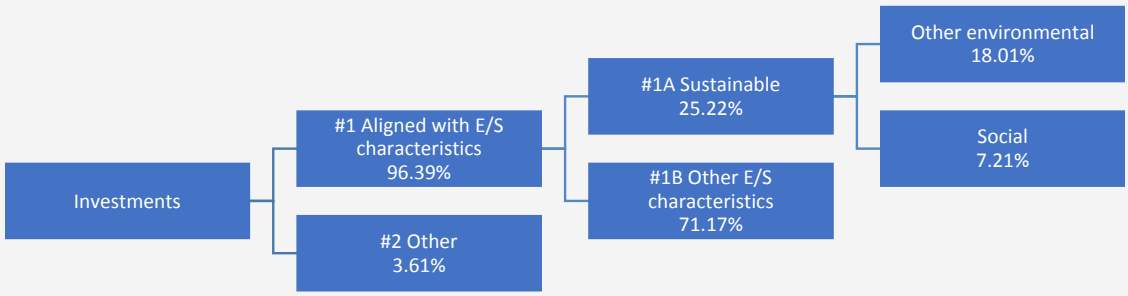
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

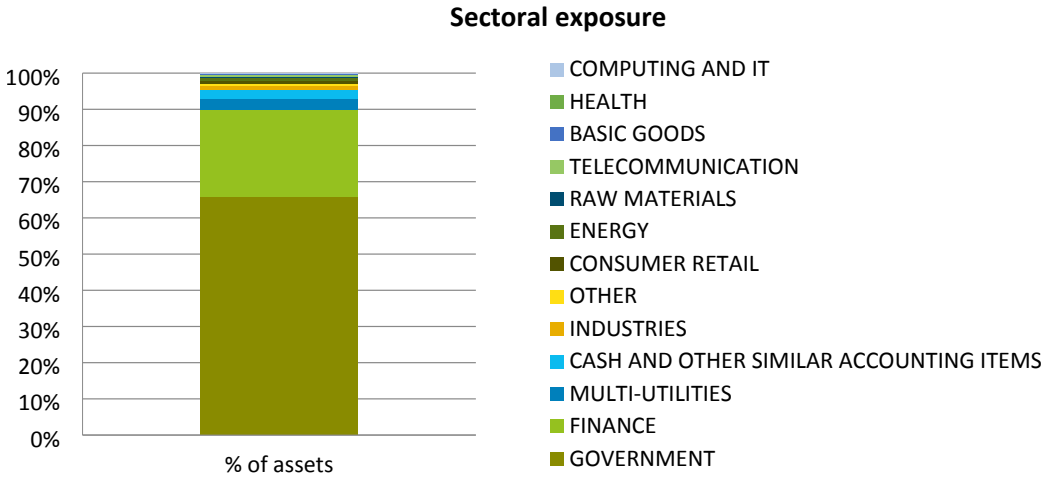
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

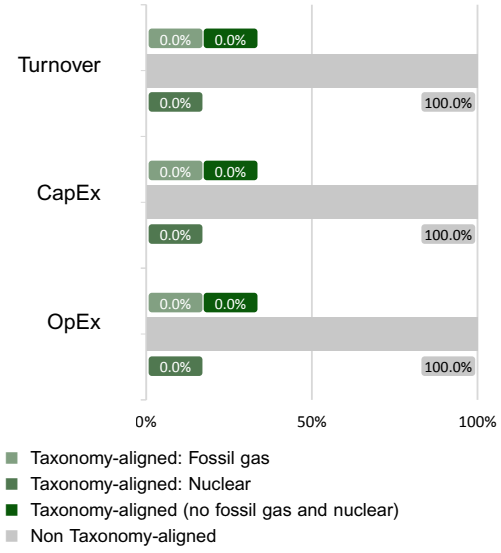
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

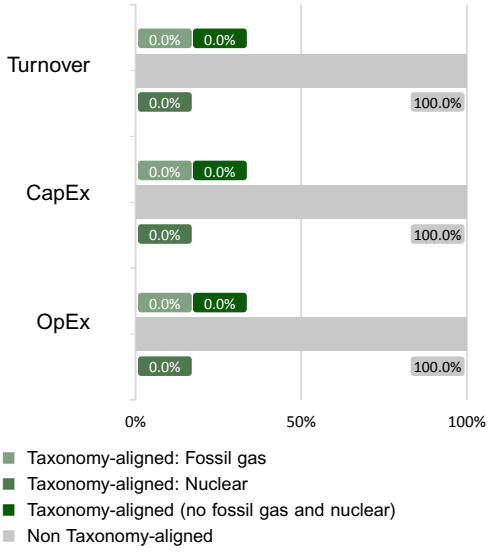
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 34% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 18.01% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 7.21% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - China Opportunity

Legal entity identifier: 5493005OR8IMCNJO7V88

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **21.22%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies.

1604

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 5.76 Investment Universe: 2.93

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

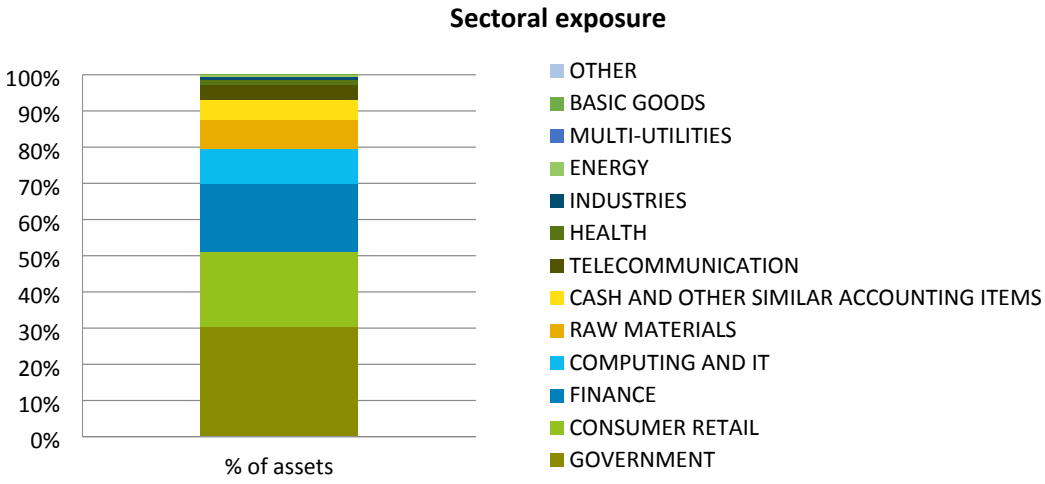
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

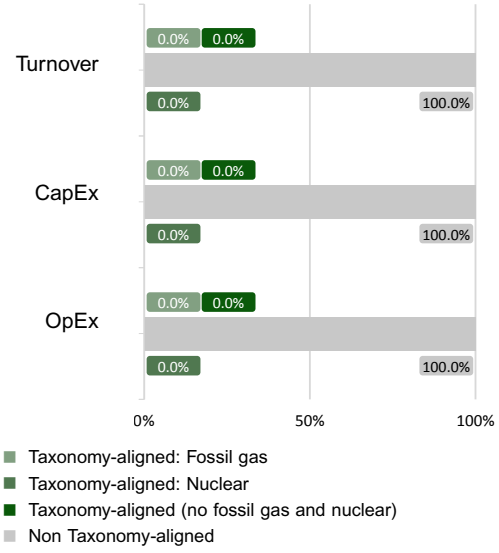
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

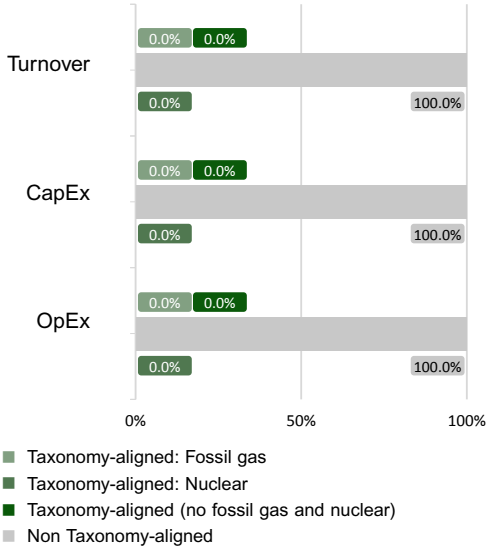
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 70% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 5.66% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 15.56% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Conservative Allocation

Legal entity identifier: 549300C7CW2DWMIHKN76

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **45.57%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.28 Investment Universe: 6.63

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?

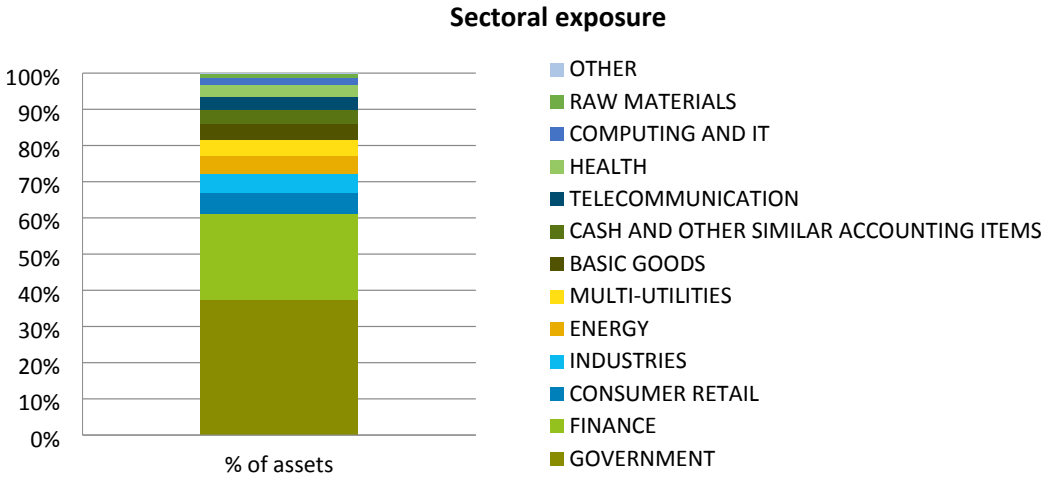
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

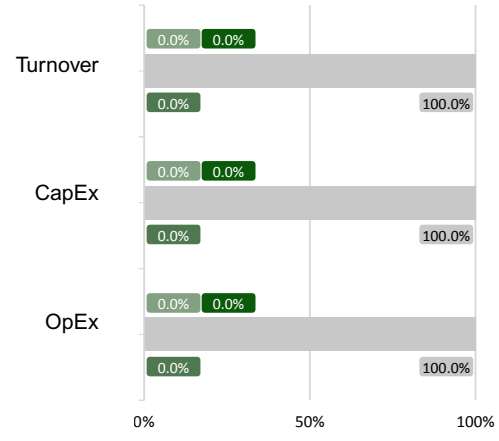
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

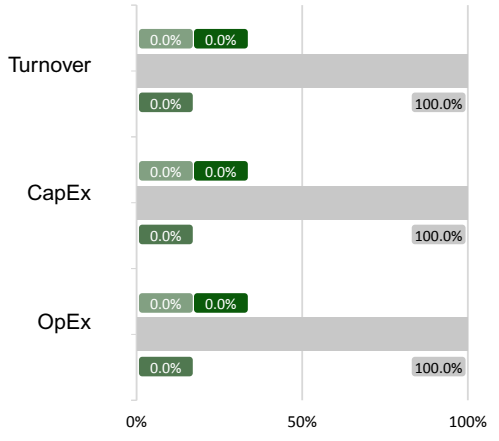
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 63% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 28.58% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 16.99% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **30.84%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.29 Investment Universe: 6.73

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund did not pursue a sustainable investment objective within the meaning of art. 2(17) of Regulation (EU) 2019/2088. However, the fund has invested in assets considered sustainable according to the methodology adopted by the management company.

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. “Principal adverse impacts” (or “PAI”) should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

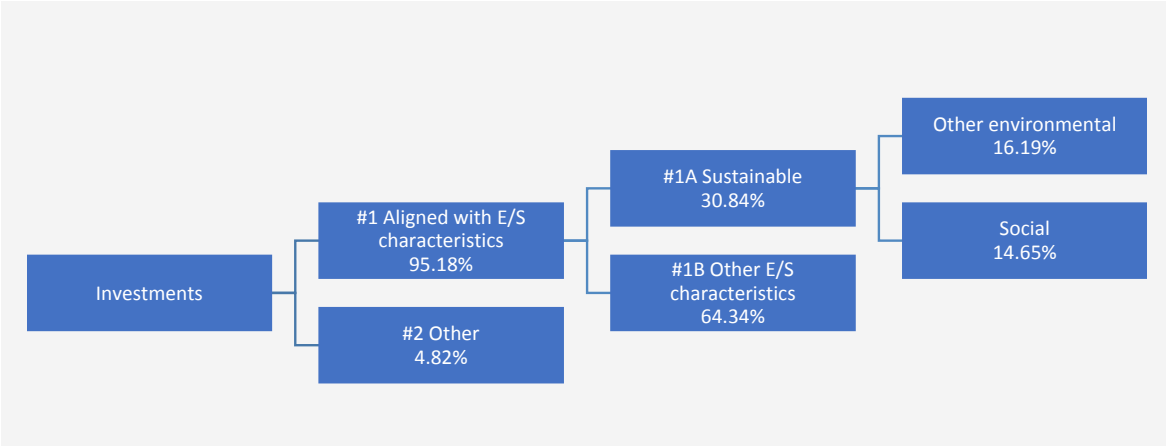
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

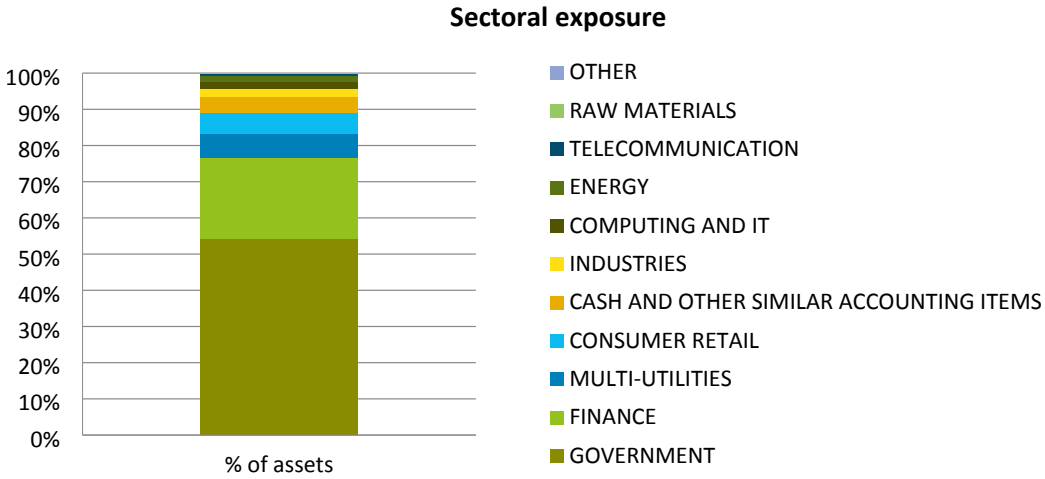
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has promoted environmental and/or social characteristics but has not committed itself to make sustainable investments within the meaning of art. 2(17) of Regulation (EU) 2019/2088.

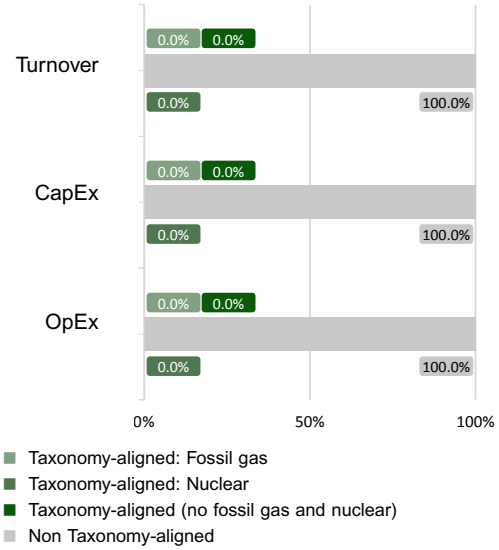
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

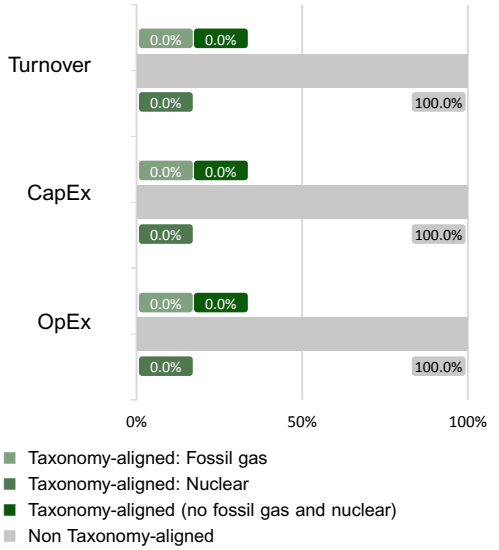
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 46% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

have greenhouse gas emission levels corresponding to the best performance.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 16.19% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 14.65% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Flexible Europe Strategy

Legal entity identifier: 5493001D7WLFSLEQ8C47

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **42.78%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 7.60 Investment Universe: 7.32

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

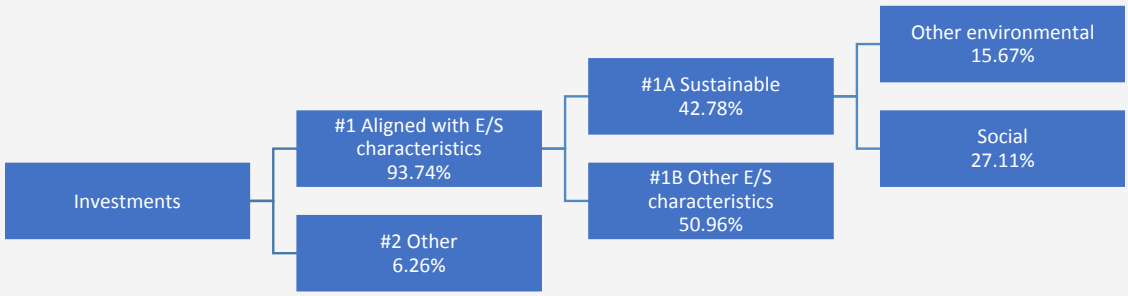
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

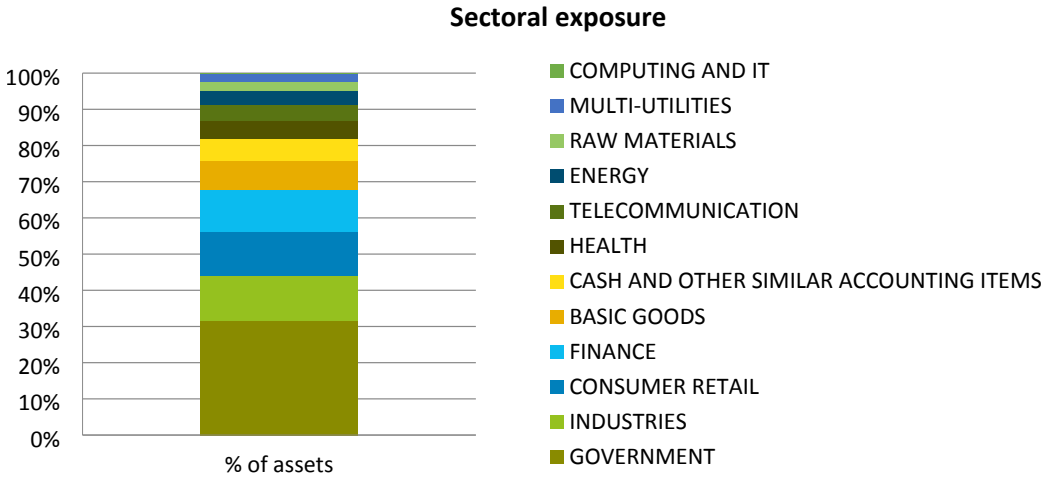
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

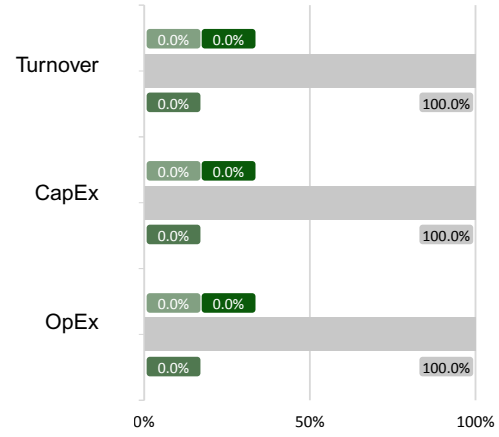
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

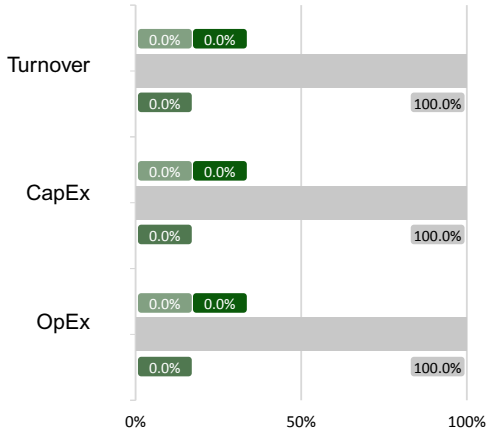
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 68% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 15.67% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 27.11% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Flexible US Strategy

Legal entity identifier: 549300HDQIRP844RBU87

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **40.18%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The ESG score is calculated on a scale of 0 to 10.	Fund: 6.80 Investment Universe: 6.37

The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%	0.00%	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%	0.00%	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies. The fund also promoted a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies. For more information go to ***https://www.eurizoncapital.com/en/sustainability/stewardship-policy***

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

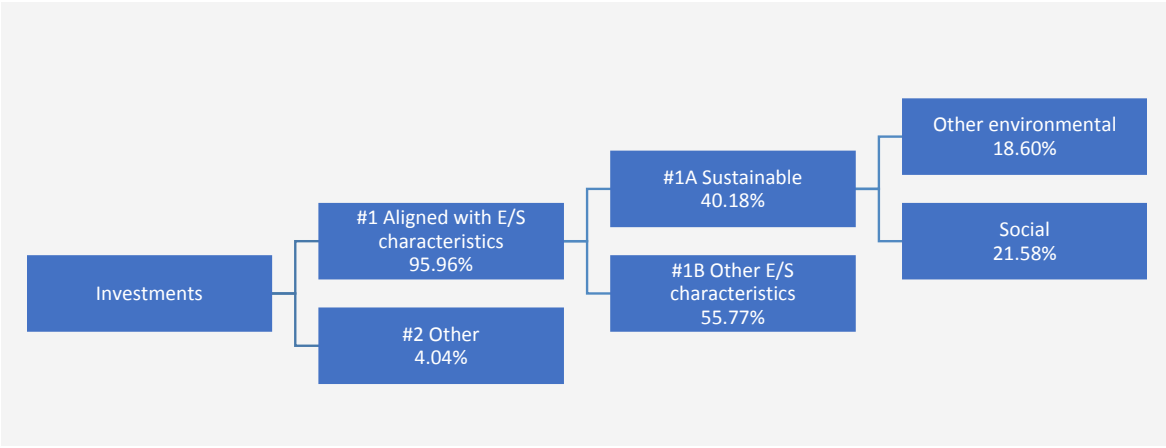
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

Largest Investments	Sector	% Assets	Country

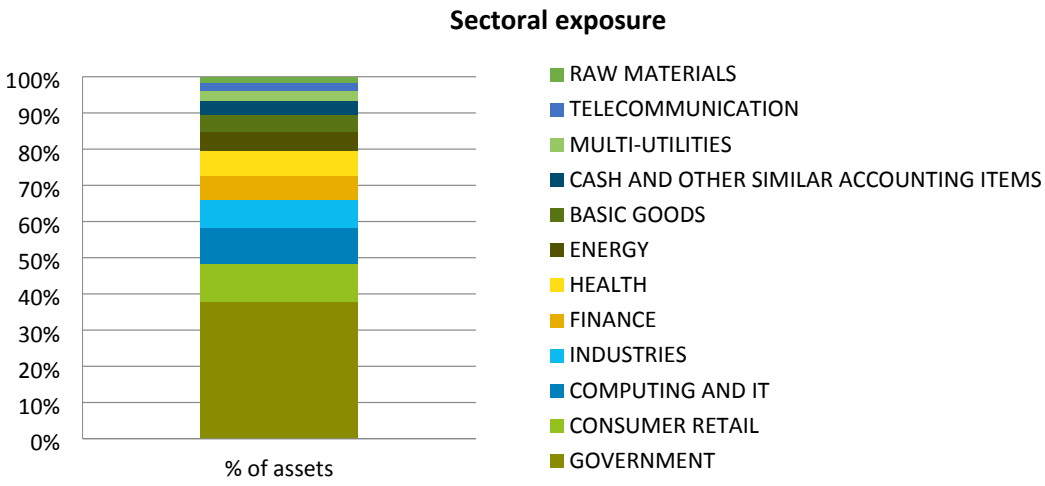
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

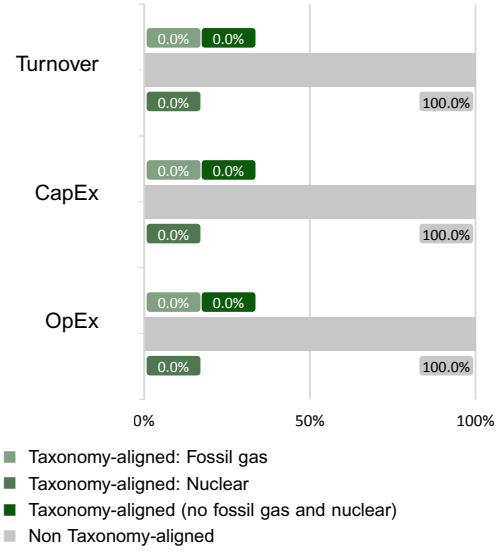
Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

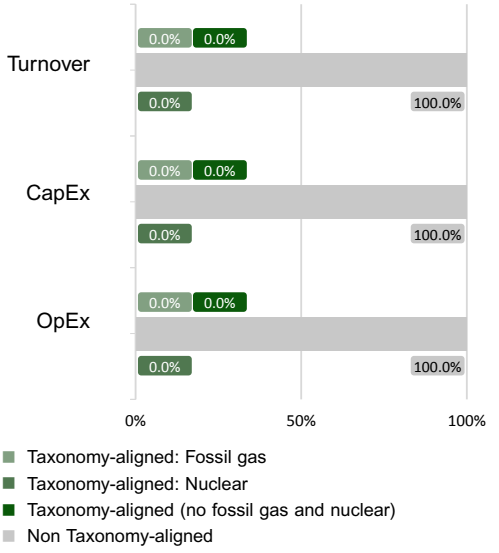
☐ Yes:

☐ In fossil gas ☐ In nuclear energy



☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 62% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 18.60% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 21.58% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Global Multi Credit

Legal entity identifier: 5493001INX5MYSRJTV14

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☑ No
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **53.61%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%
ESG Score integration	"ESG Score" of the fund as determined by the specialised ESG infoprovider on the basis of environmental, social and governance profile of the investee companies.	Fund: 6.55 Investment Universe: 6.14

	The ESG score is calculated on a scale of 0 to 10.	

…and compared to previous periods?

Sustainability Indicator	Description	31 December, 2024	31 December, 2023	31 December, 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund’s environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

rights, anti-corruption and anti-bribery matters.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- "Negative screening", with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered 'non responsible', specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- "Positive screening" of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of

environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;

- "Stewardship", which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

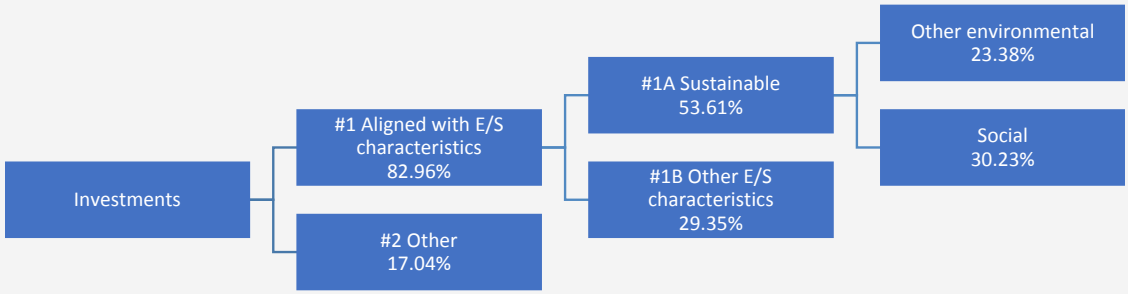
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the "Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries", available on the Company's website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

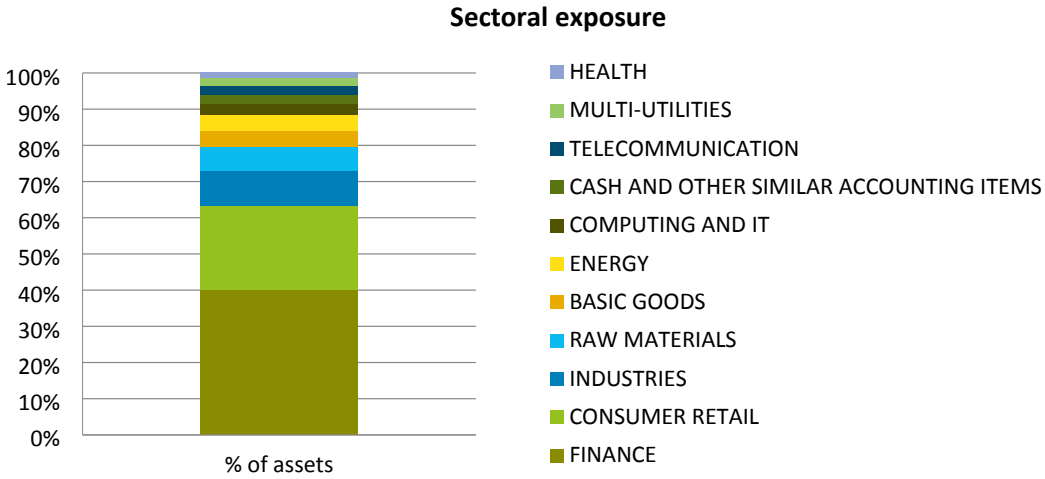
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

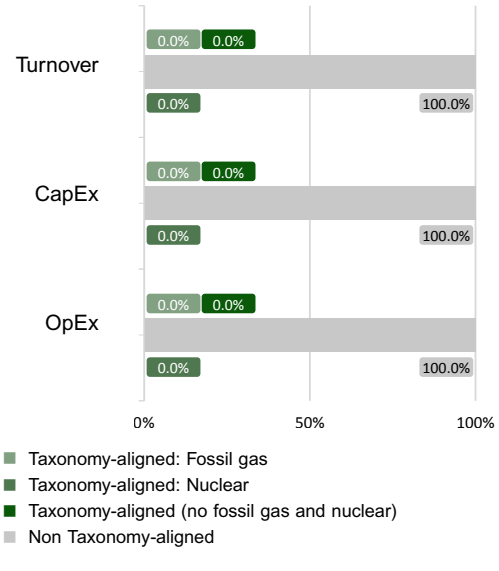
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

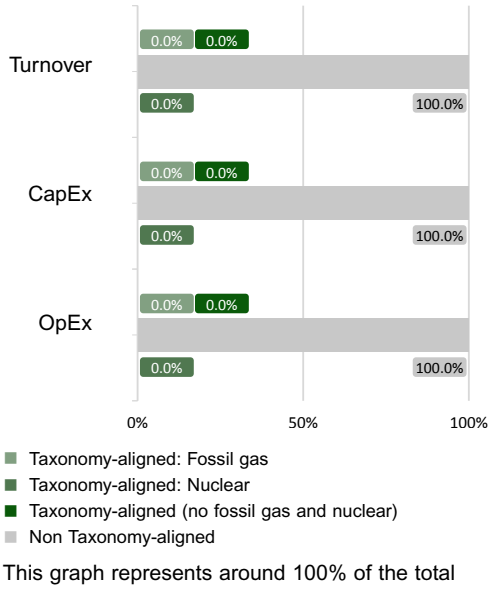
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 100% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 23.38% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 30.23% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

- **How did this financial product perform compared with the broad market index?**

  Not Applicable

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Eurizon Fund - Sustainable Multiasset

Legal entity identifier: 549300N5ZO5BP5ICOJ03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☑ **No**
☐ It made **sustainable investments with an environmental objective**: ___%	☑ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **59.49%** of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☑ with a social objective
☐ It made **sustainable investments with a social objective**: ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sector exclusion: the fund does not invest in issuers operating in sectors considered "not responsible", that is, (i) in companies characterized by a clear direct involvement in the manufacture of unconventional weapons, (ii) in companies that derive at least 25% of their turnover from mining or electricity production activities linked to thermal coal or (iii) in companies that derive at least 10% of their turnover from the extraction of oil sands.

Issuer exclusion: the fund does not invest in “critical” issuers (i.e. those issuers with the lowest ESG rating level in the equity and bond investment universe, as assigned by MSCI Solutions and assessed by the management company) unless an escalation process (so-called “engagement”) on a specific issuer has been activated and is ongoing, for which no further investments are permitted.

ESG Score integration: in accordance with good governance practices, the fund aims to pursue an "ESG score" - calculated at the overall portfolio level - higher than that of its investment universe. The ESG score is representative of the environmental, social, and corporate governance opportunities and risks to which an issuer is exposed and takes into account the issuer's management of these risks. The fund’s ESG score is calculated as a weighted average of the ESG scores of the issuers of the financial instruments held in the fund’s portfolio.

Active ownership - engagement: the fund also promotes a proactive engagement with issuers by exercising participating and voting rights and by engagement with the investee companies by encouraging an effective communication with the management of the companies

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Description	31 December, 2025
Sector exclusion	Weight in the fund of issuers operating in sectors deemed not to be “responsible”, identified on the basis of data provided by specialised ESG and SRI infoproviders.	0.00%
Issuer exclusion	Weight in the fund of issuers with a high exposure to environmental, social and corporate governance (ESG) risks (i.e.: “critical” issuers), identified on the basis of data provided by specialised ESG infoproviders.	0.00%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The management company has adopted a methodology for the selection of sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations. This methodology aims to select instruments issued by companies whose activities contribute to one or more of the SDG (aiming to foster a more conscious and lasting global development, including the well-being of human beings, the protection and care of the natural environment and responses to major social issues) through their own products and services or production processes, provided that (i) such investments do not significantly harm any of the environmental or social objectives set out in Regulation (EU) 2019/2088 and (ii) the companies benefiting from such investments comply with good governance practices.

The Sustainable Development Goals (SDGs) aim to foster a more conscious and sustainable global development; specifically, these goals include, among others: the fight against poverty and hunger, the right to health, work and education, gender equality and the reduction of inequalities, access to water and energy, urbanisation and the promotion of resilient infrastructure, the fight against climate change and the protection of the environment including the preservation of marine and terrestrial ecosystems.

The portion of sustainable investments is calculated as the weighted weight of issuers that are found to have, with reference to their products/services and production processes: (i) a positive net alignment to at least one of the 17 SDGs and (ii) no net misalignment to any of the 17 SDGs, plus any weighted weight of bonds with proceeds earmarked for financing of environmental and/or social projects.

Specifically, the contribution to one or more of the SDGs takes into account selected quantitative and qualitative metrics, including exposure to controversies, which help to highlight any adverse impacts caused by the issuer.

However, the fund did not promote the specific environmental objectives set out in Regulation (EU) 2020/852. The fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The assessment of an Issuer's contribution to one or more of the 17 Sustainable Development Goals (SDGs) promoted by the United Nations took into account selected quantitative and qualitative metrics designed to highlight any adverse impacts caused by the Issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

On the basis of controls it has defined, the management company has considered specific environmental and social indicators for the assessment of the principal adverse sustainability impacts determined by the investment activities of the fund.

Although the negative effects of investment decisions on sustainability factors should be considered according to the different range of assets, geographic areas and sectors to which managed products are exposed, the management company believes that adequate monitoring of exposure to social and environmental issues is a priority in order to mitigate the potential negative effects of its investments.

In particular, the methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations has taken into account, with varying degrees of intensity, principal adverse impacts through quantitative and qualitative metrics.

Qualitative indicators include the potential (i) presence of disputes related to climate change, contaminants released into the soil, air and/or water, discrimination, labour standards in the supply chain or respect for human rights; (ii) absence of transition plans accompanied by emission reduction targets; (iii) generation of energy from fossil fuels and related products or presence of usable fossil fuel reserves; and (iv) absence of Board diversity or pay discrimination.

Quantitative indicators include the exclusion from the investable universe of companies that derive (i) at least 25% of their turnover from mining or electricity production activities related to thermal coal or (ii) at least 10% of their turnover from the extraction of oil sands, as well as companies involved in the manufacture or sale of unconventional weapons (such as, among others, landmines, cluster bombs, chemical weapons and biological weapons).

The principle of 'do not significant harm' (DNSH) is verified through the absence of net misalignment against each of the 17 SDGs. The synthetic score for each SDG is determined by analysing the scores given to the 2 components: (i) the net alignment of an issuer's products and services to the targets associated with each SDG; and (ii) the net alignment of issuing companies' production processes to specific sustainable development goals.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The methodology to select sustainable investments based on the Sustainable Development Goals (SDGs) promoted by the United Nations adopted by the management company considers principal adverse impacts through quantitative and qualitative metrics as, for example, the exposure of the issuer to eventual controversies. Within this context, the management company assesses, for example, the issuers involvement in controversies regarding human rights, worker rights and own business conduct.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The assessment of the principal adverse impacts of investment choices on sustainability factors and the definition of related mitigation actions are an integral part of Eurizon's approach to sustainability. "Principal adverse impacts" (or "PAI") should be understood as those impacts of investment decisions and advice that result in negative effects on sustainability factors.

In this context, the Company has adopted an internal methodology (framework) that defines how the so called 'Principal Adverse Impact indicators' ('PAI') are taken into account within the assets under management, pursuant to Article 7 of the SFDR Regulation.

This framework foresees the use of specific indicators, as set out in Commission Delegated Regulation (EU) 2022/1288, associated according to the characteristics and objectives of the individual financial products on the basis of the safeguards already defined by the Company, which include the use of the following mechanisms:

- “Negative screening”, with the aim of mitigating sustainability risks and avoiding investment in financial instruments that are more exposed to the risk of loss of value due to an environmental, social or corporate governance event or condition; in this regard, the Company has defined specific limitations towards companies operating in sectors considered ‘non responsible’, specifically towards:

(i) companies that generate revenues from the mining or production of electricity from thermal coal or from oil sands extraction above their respective tolerance thresholds;

(ii) companies characterised by an evident direct involvement in the manufacture of unconventional weapons (Landmines; Cluster bombs; Nuclear weapons; Impoverished uranium; Biological weapons; Chemical weapons; Non-detectable fragment weapons; Blinding lasers; Incendiary weapons, White Phosphorous);

- “Positive screening” of ESG factors in the analysis, selection and composition of financial portfolios, in accordance with good governance practices; this category includes products that promote, among others, environmental or social characteristics, or a combination of them or that have sustainable investment objectives, in accordance with Articles 8 and 9 of the SFDR Regulation, aiming to build portfolios characterised by (i) an ESG score above that of its investment universe, (ii) investment selection processes based on specific positive and negative criteria as provided for in offering documentation, such as ethical and thematic products; (iii) sustainable investment criteria based investment selection processes under the SFDR Regulation by investing in issuers whose activities contribute to one or more sustainable development goals, such as the Sustainable Development Goals (SDGs) promoted by the United Nations; (iv) investment selection process based on the selection of units of other UCIs (the target UCI), (v) investment selection processes that take into account logics for the construction of the respective benchmarks identified on the basis of environmental, social and governance criteria or involving the implementation of strategies in derivative financial instruments that provide exposure, including through indexes, to issuers selected on the basis of environmental and/or social factors, (vi) processes for selecting governmental issuers using both the indicators provided by the "Sustainable Development Report", (vii) with a lower ecological footprint than the investment universe, or (viii) implement investment selection methodologies in order to contribute to the SDGs within the meaning of the SFDR Regulation or generate a social or environmental impact together with a measurable financial return;
- “Stewardship”, which means a proactive interaction with the investee companies, achieved both by exercising the rights of intervention and voting (where applicable) and by engaging with the companies themselves.

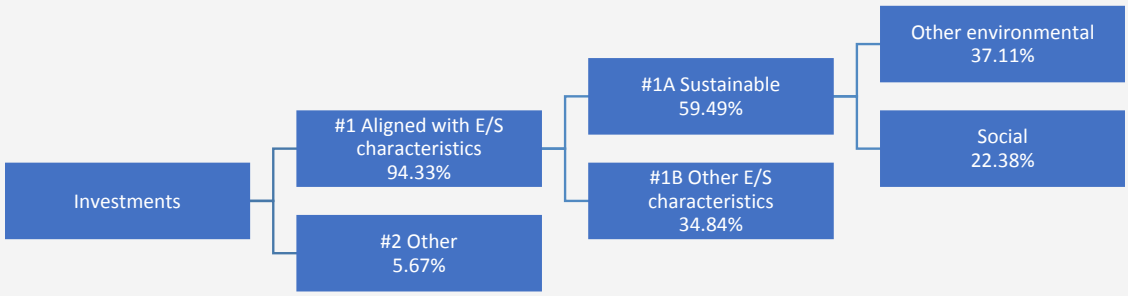
The indicator data are calculated using the methodologies, information and datasets provided by the specialised data provider. The methodologies implemented vary according to the specificities of the different indicators required under applicable regulations and have been calculated taking into account the formulas and guidance provided by EU legislation. The indicators are based on quarterly observations (i.e., as of 31 March, 30 June, 30 September and 31 December), using the most recent data made available by the specialised data provider.

For further information, reference is made to the “Statement on the principal adverse impacts of investment decisions on sustainability factors of Eurizon Capital SGR S.p.A. and its subsidiaries”, available on the Company’s website.

In this context, the fund has considered specific environmental and social indicators for assessing the principal adverse impacts on sustainability factors arising from its investment activities, as outlined below:

- Activities that adversely affect biodiversity sensitive areas
- Gender diversity on the board of directors
- Exposure to controversial weapons
- Greenhouse Gas (GHG) Emissions intensity
- Greenhouse Gas (GHG) Emissions intensity of investee companies
- Exposure to fossil fuel companies

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Year 2025

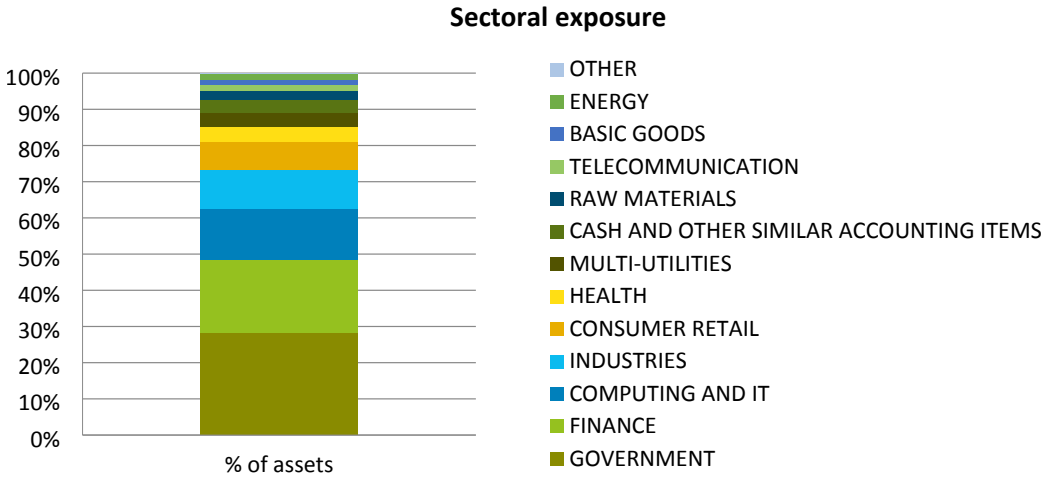
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

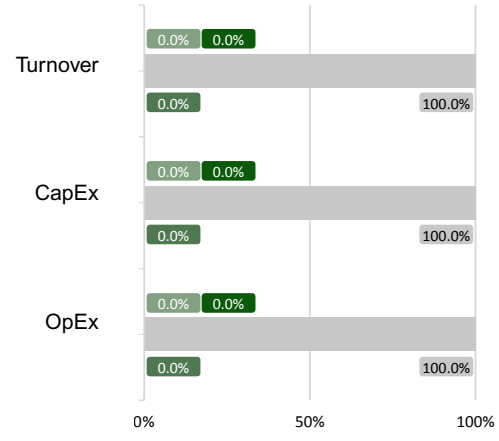
Currently, considering the information set available to Eurizon as of the date of this periodic report, the fund's proportion of environmentally sustainable investments within the meaning of Regulation (EU) 2020/852 is equal to 0%. However, the fund may have invested in activities that may be considered as environmentally sustainable according to its investment policy, but such investments were not per se decisive to the attainment of the fund's environmental characteristics.

Finally, it should be noted that the investments underlying this fund do not take into account the European Union's criteria for environmentally sustainable economic activities

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

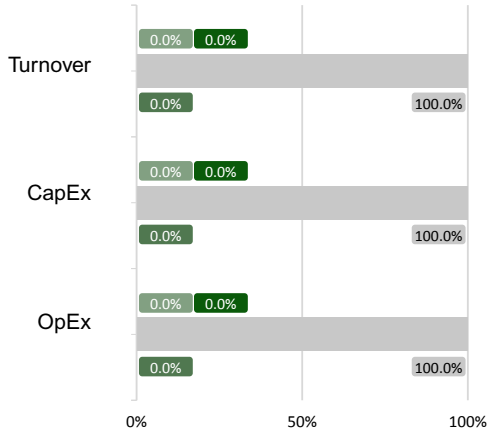
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1]?

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☑ No



Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents around 72% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

Transitional activities: 0.00%

Enabling activities: 0.00%

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

  Compared to the previous reference periods, the percentage of investments that were aligned with the EU Taxonomy, both including and excluding sovereign bonds, remained unchanged and equal to 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective is entirely not aligned with the EU Taxonomy and was 37.11% of total investments.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The fund has promoted environmental and/or social characteristics and had a socially sustainable investment share of 22.38% of total investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The following investments are included under "#2 Other": (i) potential investments in issuers with no ESG score; (ii) derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure; (iii) liquid assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets; (iv) instruments and techniques only used for efficient fund management.

For the investments included under “#2 Other”, there are no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The management company monitored compliance with the financial instrument selection strategies set out in previous section in line with the principles of Sustainable and Responsible Investment (SRI) and environmental, social and governance (ESG) factors promoted by the fund.

The promotion of environmental and/or social characteristics has been assessed by internal departments on an ongoing basis through the definition of specific investment limits that allow for both ex-ante control during the order preparation phase and ex-post control during the portfolio valuation phase.

How did this financial product perform compared to the reference benchmark?

No specific index has been designated as a reference benchmark to determine whether the fund is aligned with the environmental and/or social characteristics that it promotes.

- **How does the reference benchmark differ from a broad market index?**

  Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

  Not Applicable

- **How did this financial product perform compared with the reference benchmark?**

  Not Applicable

- **How did this financial product perform compared with the broad market index?**

  Not Applicable
